Sukhoi Interceptors Yefim Gordon, Dmitriy Komissarov, 2024-07-02 The first twenty years of Sukhoi supersonic interceptor development including the Su 15 a symbol of the Cold War and true guardian of the Soviet skies Closed in 1949 the Sukhoi Design Bureau was reborn in 1953 to meet an urgent demand for a fast interceptor that would counter the threat posed by NATO bombers It wasted no time developing a succession of missile armed Mach 2 interceptors characterized by delta wings the single engined Su 9 entered service in 1960 followed by the up armed Su 11 in 1964 and the twin engined Su 15 in 1967 Though built in modest numbers the three types became an important asset for the Soviet air defense force particularly the more capable Su 15 which unfortunately became notorious for shooting down two intruding South Korean airliners within five years The Su 15 outlasted the Soviet Union the last being retired in 1996 There were also several Sukhoi interceptors that remained in prototype or project form All known versions are described as are operational details The book features many rare and previously unpublished photos *Global Security Watch—Russia* Richard Weitz, 2009-11-25 This book offers an expert analysis of Russia's foreign and military defense policies since the Federation was established in the aftermath of the collapse of the Soviet Union To help readers understand the current state of this crucially important country *Global Security Watch Russia A Reference Handbook* provides a comprehensive overview of the main foreign and defense policies of the Russian Federation *Global Security Watch Russia* focuses on political military developments in the nation that emerged in the aftermath of the Soviet Union's collapse in December 1991 The book looks at a variety of factors that characterize Russia's position in world security matters such as its leading position as an arms exporter and its still overwhelming nuclear capability Coverage includes critical recent events such as the growing alienation between Russia and the West the August 2008 Georgian War and the effects of the global financial crisis on Russia's vulnerable economy

weaponry dictated policy or deviously spied and subverted Whittaker Chambers the translator whose book *Witness* started the hunt for bigger game Communists in our government Lavrenti Beria the head of the Soviet nuclear weapons program who apparently killed Joseph Stalin Col Ed Hall the leader of America's advanced missile system whose own brother was a Soviet spy Adm James Stockwell the prisoner of war and eventual vice presidential candidate who kept his terrible secret from the Vietnamese for eight long years Nancy Reagan the Queen of Hearts who was both loving wife and instigator of palace intrigue in her husband's White House From Eisenhower's decision to beat the Russians at their own game to the Missile Gap of the Kennedy Era to Reagan's vow to lean on the Soviets until they go broke all the pivotal events of the period are portrayed in new and stunning detail with information only someone on the front lines and in backrooms could know Yet *At the Abyss* is more than a riveting and comprehensive recounting It is a cautionary tale for our time a revelation of how those years came to be known as the Cold War not World War III , *Chrome Dome 1960-68* Peter E.

Davies,2024-07-18 In 1960 SAC's B 52s began a nonstop eight year nuclear armed patrol Fully illustrated this study explains how one of the Cold War's most challenging operations was conceived and flown Operation Chrome Dome was Strategic Air Command's unprecedented nuclear deterrence operation a hugely elaborate and costly response to the perceived nuclear missile threat from the Soviet Union In this book Cold War aviation historian Peter E Davies explains how for eight years Chrome Dome required 12 B 52 Stratofortresses to maintain a ceaseless airborne alert within striking distance of Soviet targets orbiting over the Mediterranean and north of Alaska Each bomber stayed aloft for 24 hours flying for around 10 000 miles until relieved by another In each cockpit a top secret Combat Mission Folder contained details of the routes and procedures for a nuclear attack on a pre determined Soviet target Dramatic and controversial the years of unrelenting Chrome Dome missions saw several B 52 crashes and losses of nuclear weapons most famously those in Greenland and off the Spanish coast Drawing on first hand information from the personnel who flew and supported these gargantuan efforts and packed with archive photos superb new artwork maps and diagrams this book offers an authoritative history of how SAC flew its most challenging operation of the Cold War *A Nation in Flames* Nick Armbrister,2007-11 This is Nick Armbrister's first collection of short stories written from the late 90's to the present day They cover several topics like his poems but in much more depth from satanic actions by people worshipping an evil god Loss of the Ice Queen to warriors of the sky using man's most powerful weapons in anger Final Flight to an attempt to control fate Spell to Find Amelia Earhart and to a post nuclear townscape Second History set in Oldham Two of the stories are fragments of larger uncompleted lost work that deserve inclusion here One day these projects may well see the light of day but for now the author hopes the reader will enjoy his dark work in time he hopes to do a follow up These stories span his entire writing career Though he prefers poetry as a means of incisive concentrated power of expression he loves short stories for their fun even those that give one a glimpse into the dark side that lurks beneath the surface of life F-105 Wild Weasel vs SA-2 'Guideline' SAM Peter E.

Davies,2011-12-20 A detailed account of the suppression of North Vietnam's surface to air missile defences during the Vietnam War initiating a totally new concept of air war The Vietnam War was the first conflict that saw extensive use of surface to air anti aircraft missiles and thus became a training ground for the tactics of this new type of battle as USAF pilots battled with supersonic Soviet ground to air missiles Featuring illustrations throughout this instalment in Osprey's Duel series presents this story in the context of two of the main opponents America's top fighter bomber and the NVA's best anti aircraft missile *Ultimate Allied Fighters of the Second World War* Justo Miranda,2024-01-07 During the five years of the Second World War the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast The basis for this huge achievement was exotic fuels short lived artificially overpowered engines propellers with four five and even six blades and thinner wings with special sections of laminar flow Then the faster Allied fighters began to be attacked by a demon that lived in the air scientists called it compressibility buffeting and different type of aircraft suffered it at different speeds and manifested itself in different ways The American and British designers never understood the true causes behind the aerodynamic phenomenon They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest
