Ministry of Information,1941 *Travels with Savannah* CP Kramarsky,2010-09-23 There is no available information at this time **Progressives in Navy Blue** Scott Mobley,2018-05-15 This study examines how intellectual and institutional developments transformed the U S Navy from 1873 to 1898 The period was a dynamic quarter century in which Americans witnessed their Navy evolve Cultures of progress clusters of ideas beliefs values and practices pertaining to modern warfare and technology guided the Navy s transformation The agents of naval transformation embraced a progressive ideology They viewed science technology and expertise as the best means to effect change in a world contorted by modernizing and globalizing trends Within the Navy s progressive movement two new cultures Strategy and Mechanism influenced the course of transformation Although they shared progressive pedigrees each culture embodied a distinctive vision for the Navy s future **Ship Island, Mississippi** Theresa Arnold-Scriber,Terry G. Scriber,2012-02-17 Ship Island was used as a French base of operations for Gulf Coast maneuvers and later during the War of 1812 by the British as a launching point for the disastrous Battle of New Orleans But most memorably Ship Island served as a Federal prison under the command of Union Major General Benjamin F Butler during the Civil War This volume traces this fascinating and somewhat sinister history of Ship Island The main focus of the book is a series of rosters of the men imprisoned Organized first by the state in which the soldier enlisted and then by the company in which he served entries are listed alphabetically by last name and include information such as beginning rank date and place of enlistment date and place of capture physical characteristics and where possible the fate and postwar occupation of the prisoner **Towards a New Cognitive Neuroscience: Modeling Natural Brain Dynamics** Klaus Gramann,Tzzy-Ping Jung,Daniel P. Ferris,Chin-Teng Lin,Scott Makeig,2014-10-03 Decades of brain imaging experiments have revealed important insights into the architecture of the human brain and the detailed anatomic basis for the neural dynamics supporting human cognition However technical restrictions of traditional brain imaging approaches including functional magnetic resonance

tomography fMRI positron emission tomography PET and magnetoencephalography MEG severely limit participants movements during experiments As a consequence our knowledge of the neural basis of human cognition is rooted in a dissociation of human cognition from what is arguably its foremost and certainly its evolutionarily most determinant function organizing our behavior so as to optimize its consequences in our complex multi scale and ever changing environment The concept of natural cognition therefore should not be separated from our fundamental experience and role as embodied agents acting in a complex partly unpredictable world To gain new insights into the brain dynamics supporting natural cognition we must overcome restrictions of traditional brain imaging technology First the sensors used must be lightweight and mobile to allow monitoring of brain activity during free participant movements New hardware technology for electroencephalography EEG and near infrared spectroscopy NIRS allows recording electrical and hemodynamic brain activity while participants are freely moving New data driven analysis approaches must allow separation of signals arriving at the sensors from the brain and from non brain sources neck muscles eyes heart the electrical environment etc Independent component analysis ICA and related blind source separation methods allow separation of brain activity from non brain activity from data recorded during experimental paradigms that stimulate natural cognition Imaging the precisely timed distributed brain dynamics that support all forms of our motivated actions and interactions in both laboratory and real world settings requires new modes of data capture and of data processing Synchronously recording participants motor behavior brain activity and other physiology as well as their physical environment and external events may be termed mobile brain body imaging MoBI Joint multi stream analysis of recorded MoBI data is a major conceptual mathematical and data processing challenge This Research Topic is one result of the first international MoBI meeting in Delmenhorst Germany in September 2013 During an intense workshop researchers from all over the world presented their projects and discussed new technological developments and challenges of this new imaging approach Several of the presentations are compiled in this Research Topic that we hope may inspire new research using the MoBI paradigm to investigate natural cognition by recording and analyzing the brain dynamics and behavior of participants performing a wide range of naturally motivated actions and interactions
