Sunny Days And Starry Nights Nature Activities For Ages 26:

Nature Contemplation in Clement of Alexandria Doru Costache, 2025-06-13 This book examines Clement of Alexandria's interdisciplinary approach to nature contemplation which he terms physiology and physics showing its internal consistency even in the absence of a clear methodological outline. It reconstructs Clement's method of nature contemplation which while discernible throughout his writings does not feature as such in one place. Yet it exists within the second stage of the broader threefold roadmap of spiritual advancement which progresses from ethics to physics to divine vision epoptics. Specifically Clement's physics itself has three steps: analysis, interpretation, and the spiritual vision of the world. To advance through the three stages of physics, one must acquire virtue, contemplative skills, and sound information regarding the nature of things. But only transformed people whom Clement calls holy gnostics, saintly sages, have access to the final stage, gnostic physiology. This third step amounts to an insightful noetic perception of nature irreducible to either keen observation or the information gathered and processed by way of analysis and interpretation. This book presents Clement's method against the backdrop of ancient disciplines of nature contemplation and as paving the way for contemporary science engaged theology. The volume is suitable for postgraduate students and scholars of the history of science and religion, religious studies, early Christian and late antique studies, and patristic studies, particularly those working on Clement of Alexandria. Review Index, 2006 Every 3rd issue is a quarterly cumulation. *Eyewitness Explorer: Weather Watcher* DK, 2015-09-01 From light breezes to heavy storms, Weather Watcher helps young readers understand the different weather conditions that affect our everyday lives. With over 30 activities, kids can study clouds and fog, make a rainbow, create a snowflake, track a storm, and make tornadoes and hurricanes using everyday objects. Eyewitness Explorers encourage hands-on learning with 30 easy activities that help children observe, explore, and learn about the natural world. Each book explains the science behind the activities, laying the essential groundwork for contextualizing the experience to come. But at the heart of the books are the activities themselves: a chance to learn by doing with experiments that can be carried out right at home. Most can even be completed with materials already on hand, so there's no complicated preparation or specialized equipment needed. Simply choose one of the projects and follow the step-by-step, photographically illustrated instructions. **Boletín Internacional**
