Sand In Our Souls Leone Huntsman,2013-05-09 Images of the beach pervade Australian popular culture However the deeper significance of the experience of the beach and its influence on Australian culture generally have not yet been seriously explored How why and when did the beach become part of the Australian way of life In Sand in our Souls Leone Huntsman describes the forces and pressures that encouraged or impeded Australians enjoyment of sand and surf from early enjoyment of bathing through nearly a century of repressive restrictions to freedom won in the face of drawn out opposition The ways in which artists writers film makers and the advertising industry have depicted the beach are examined for the light they throw on the beach s significance She traces the development of a distinctively Australian way of being at the beach suggesting that the beach experience has been absorbed into our emerging culture and continues to shape it in subtle ways Huntsman s provocative arguments will stimulate debate on the concept of national identity appropriate for a new Australian century and promote a deeper understanding of an aspect of life in Australia that is cherished by many of those who live here

Methodology in Sports History Wray Vamplew,Dave Day,2018-12-07 The process of converting the past into history involves engagement with a multitude of different sources and methods and sports historians inevitably participate in the same debates over approaches and methodologies as their counterparts in other historical disciplines At its heart history remains a genre of empirical knowledge that is based upon the remains of the past and without suitable evidence there can be no sports history A burgeoning range of sources has stimulated new ways of thinking and a significant expansion in the sports historians evidentiary base as textual sources have been supplemented by photos films and cartoons uniforms architecture maps and landscapes and material culture more generally This book deals with some of these innovations It is divided into two sections the first offering chapter length studies of particular methodologies and the second brief responses from experts in their fields to the question what can sports historians learn from other disciplines **Out of Line** Margaret Maynard,2001 Shows how Australian women have created their own sense of national and regional identity through their dress and in so doing puts a new slant on the history of Australian women s fashion in the twentieth century This book argues that Australian women s fashions may be superficially derivative but that there are patterns of dress Recreational Uses of Coastal Areas P. Fabbri,2012-12-06 Human clustering in coastal areas The coastal zone has gained a solid reputation as a place vocated for recreational activities and this is generally related to the presence of the sea The relationship however does not appear univocal or simple the sea can be perceived as a hostile element by humans and the more general question of whether the presence of the shore is in itself a favourable repulsive or irrelevant factor to settlement is a debatable point at least for pre industrial societies Back in the early part of the 19th century Friedrich Hegel regarded oceans and rivers as unifying elements rather than dividing ones thus implying a trend towards the concentration of human settlements along them The sea he wrote stimulates 1 courage and conquest as well as profit and plunder although he realized that this did not equally apply to all maritime peoples In Hegel s view different approaches to the sea were mainly the results of cultural factors and in fact he recognized that some people living in coastal areas perceive the sea as a dangerous and alien place and the shore as aftnis terrae Roads, Tourism and Cultural History Rosemary Kerr,2018-12-20 Roads and road tourism loom

Water-based Tourism, Sport, Leisure, and Recreation Experiences Gayle Jennings, 2007 Offers a unique insight into these growing areas of the tourism industry looking at their interaction market profiles advantages and their effects on the environment Gayle Jennings Griffith University Australia

The Australian Experience R. L. Heathcote, 1988 The 26th International Geographical Congress the first to be held in Australia was held in Sydney in August 1988 and provided the initial stimulus for this book In it twenty six geographers have contributed essays to illustrate the scope of the unique processes of land settlement and resource management which have taken place on the continent over the last two hundred years The essays cover a wide range of themes from the roles of international political theory international capital and international relations on the one hand to the roles of federal and state governments and the conservation lobby on the other from the attempts to come to terms with the environmental constraints of this wide brown land to the environmental impacts of intensive often destructive resource management and finally from demography to the social role of cricket and the future role of the nation in its region The scope of these essays is a reminder not only of the complex linkages which have created the current Australian landscape but also of the geographers role in interpreting those linkages for contemporary society p 4 of cover
