process is far from standardized nor is it simple. While all individuals associated with important decisions about national security and the lives of America's service members take their responsibilities seriously, the processes by which they reach their conclusions are varied and complicated. The book traces eight traditional and emerging theories or models of decision making by first explaining the components of each model and then by analyzing its practical application through three case studies. Each chapter concludes with a discussion of the utility and explanatory power of the particular model.
