Free Global Cities Christian H Kälin, 2025-03-20 This book proposes a new solution to the problem of the migration crisis engulfing the world by creating safe harbours or Free Global Cities In the face of the largest displacement crisis on record even the most optimistic view of the future suggests that in the years ahead more and more people will migrate in order to survive The world requires places where refugees and other migrants forced to leave their homes have the opportunity to work study create start businesses and rebuild new lives for themselves and their families Free Global Cities can deal with this growing global crisis in a completely new way They are autonomous self governed subnational entities that provide a safe environment and rule of law that will create wealth and prosperity for its residents as well as for the nations hosting them Such a model would contribute significantly to handle the largest migration crisis in

history which the world will be experiencing in the coming decades *Insurgencies and Revolutions* Haripriya Rangan, Mee Kam NG, Libby Porter, Jacquelyn Chase, 2016-10-26 Over the past six or more decades John Friedmann has been an insurgent force in the field of urban and regional planning transforming it from its traditional state centered concern for establishing social and spatial order into a radical domain of collaborative action between state and civil society for creating the good society in the present and future By opening it up to theoretical engagement with a wide range of disciplines Friedmann's contributions have revolutionised planning as a transdisciplinary space of critical thinking social learning and reflective practice *Insurgencies and Revolutions* brings together former students close research associates and colleagues of John Friedmann to reflect on his contributions to planning theory and practice The volume is organized around five broad themes where Friedmann's contributions have risen to challenge established paradigms and generated the space for revolutionary thinking and action in urban and regional planning Theorising hope Economic development and regionalism World cities and the Good city Social learning empowered communities and citizenship and Chinese cities The essays by the authors reflect their engagement with his ideas and the new directions in which they have taken these in their work in planning theory and practice *Paulding's Works: Book of St. Nicholas, tr. from the ... Dutch of Dominie N.A. Oudernarde* James Kirke Paulding, 1836 *The Oxford Handbook of Critical Improvisation Studies* George Lewis, Benjamin Piekut, 2016 V 1 Cognitions v 2 Critical theories **Olympic Cities** Gavin Poynter, Iain MacRury, 2009 Drawing upon historical cultural economic and socio demographic perspectives this book examines the role of London's hosting the 2012 Olympic and Paralympic Games as a means to promote urban regeneration and social renewal in East London and the Thames Making Up Our Mind Sigal R. Ben-Porath, Michael C. Johanek, 2019-04-24 If free market advocates had total control over education policy would the shared public system of education collapse Would school choice revitalize schooling with its innovative force With proliferating charters and voucher schemes would the United States finally make a dramatic break with its past and expand parental choice Those are not only the wrong questions they're the wrong premises argue philosopher Sigal R Ben Porath and historian Michael C Johanek in Making Up Our Mind Market driven school choices aren't new They predate the republic and for generations parents have chosen to educate their children through an evolving mix of publicly supported private charitable and entrepreneurial enterprises The question is not whether to have school choice It is how we will regulate who has which choices in our mixed market for schooling and what we as a nation hope to accomplish with that mix of choices Looking beyond the simplistic divide between those who oppose government intervention and those who support public education the authors make the case for a structured landscape of choice in schooling one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest After 1989 Ralf Dahrendorf, 1997-10-13 The essays assembled in this volume are a thoughtful and lively commentary on Europe after the revolution of 1989 Must revolutions fail Certainly the open society has its own problems not least that of citizens in

search of meaning The Good Society has to square the circle of prosperity civility and liberty Social science can help us understand what needs to be done and intellectuals have a responsibility to initiate and accompany change All this raises questions for Europe which extend far beyond the all too narrow confines of the European Union The British Educator, 1856 The Tombs Clive Cussler, Thomas Perry, 2012-09-04 Husband and wife team Sam and Remi Fargo are in a race to find the famed burial site of Attila the Hun in this adventure in the 1 New York Times bestselling series When an archeologist friend requests their help to excavate a top secret historical site the Fargos are intrigued But they have no idea that their discoveries will set them on a hunt for a prize beyond all imagination The clues point to the hidden tomb of Attila the Hun who was reportedly buried with a vast fortune of gold jewels and plunder a bounty that has never been found As they follow a trail throughout Europe it leads them not to one tomb but five The Fargos also find themselves pitted against a thieving group of treasure hunters a cunning Russian businessman and a ruthless Hungarian who claims direct descent from Attila himself and will stop at nothing to achieve his destiny **The Idea of a Social Studies Education** James A. Duplass, 2017-09-22 Offering a fresh take on the purpose of social studies today James A Duplass positions philosophical counseling as a way for teachers to engage students in thinking deeply about what it means to be a citizen in a democratic society The Idea of a Social Studies Education takes a uniquely humanistic approach to the idea of a social studies education to show how teachers can act as philosophical counselors in preparing students for active civic engagement Duplass reminds the reader of the needs of students in modern society who seek to develop an identity worth living and the role social studies can play in students achieving that process By focusing on the cultivation of students autonomy authenticity efficacy and agency Duplass approach avoids political biases and instead encourages critical thinking to decipher what a democratic ideology truly is *Nonprofits in Urban America* Cynthia Jackson-Elmoore, Richard C. Hula, 2000-09-30 From their experience in nonprofit operations and their understanding of the realities of urban politics the editors of this wide ranging volume and their contributors dig into issues seldom explored in the literature They study the role of nonprofits in local governing coalitions the potential of nonprofits to replace social welfare programs their efforts to restructure key elements of the local political process and the unanticipated internal impacts of the changing roles of nonprofit organizations in the urban community The result is a compelling argument that to understand life in contemporary American cities we must take into account the expanding role of nonprofit organizations their response to increased service demands and their participation in common efforts to direct policy choices Hula Jackson Elmoore and their panel of scholars researchers and close observers of urban policymaking focus on the delivery of social services to illustrate the complex and important set of roles that nonprofits have assumed As social programs are cut at all levels of government it is often believed that nonprofits can and should take up the slack and restore at least some portion of the cutbacks in such services They examine how some nonprofit organizations have taken a proactive stance in this regard by implementing efforts that do not simply react to

political and social change but attempt to initiate and guide it instead They attempt to change the political environment in which they operate and the result has been to change the face of local politics in many jurisdictions Each chapter of their book explores these expanding and emerging roles Themes and focuses vary which in turn reflects the variation and complexity within the nonprofit sector itself At the same time each chapter presents an emerging political or policy role now being played by today's nonprofits and voluntary associations and a theoretical context in which such activities and behavior can best be understood Scholars and advanced students in public administration economics and nonprofit management as well as executive level nonprofit managers will find here an important update on what is happening in their special worlds and the knowledge they need to make sense of it

The Old Guard, 1869 **The Role of Non-State Actors in the Green Transition** Jens Hoff, Quentin Gausset, Simon Lex, 2019-09-02 This book argues that there is no way to make progress in building a sustainable future without extensive participation of non state actors The volume explores the contribution of non state actors to a sustainable transition starting with citizens and communities of different kinds and ending with cities and city networks The authors analyse social cultural political and economic drivers and barriers for this transition from individual behaviour to structural restraints and investigate interplay between the two Through a series of wide ranging case studies from the UK Australia Germany Italy and Denmark and a number of comparative case studies the volume provides an empirically and theoretically robust argument that highlights the need to develop widen and scale up collective action and community based engagement if the transition to sustainability is to be successful This book will be of great interest to students and scholars of climate change sustainability and environmental policy

"Invisible Cities" and the Urban Imagination Benjamin Linder, 2022-11-08 In 1972 Italo Calvino published *Invisible Cities* a literary book that masterfully combines philosophy and poetry rigid structure and free play theoretical insight and glittering prose The text is an extended meditation on urban life and it continues to resonate not only among literary scholars but among social scientists architects and urban planners as well To commemorate the 50th anniversary of *Invisible Cities* this collection of essays serves as both an appreciation and a critical engagement Drawing from a wide array of disciplinary perspectives and geographical contexts this volume grapples with the theoretical pedagogical and political legacies of Calvino's work Each chapter approaches *Invisible Cities* not only as a novel but as a work of evocative ethnography place writing and urban theory Fifty years on what can Calvino's dreamlike text offer to scholars and practitioners interested in actually existing urban life
