History of English Reflexive Pronouns Elly van Gelderen, 2000-01-01 This book brings together a number of seemingly distinct phenomena in the history of English the introduction of special reflexive pronouns e g myself the loss of verbal agreement and pro drop and the disappearance of morphological Case It provides vast numbers of examples from Old and Middle English texts showing a person split between first second and third person pronouns Extending an analysis by Reinhart Reuland the author argues that the strength of certain pronominal features Case person number differs cross

linguistically and that parametric variation accounts for the changes in English The framework used is Minimalist and Interpretable and Uninterpretable features are seen as the key to explaining the change from a synthetic to an analytic language

Knowledge of Reflexives in a Second Language Margaret Ann Thomas, 1993-01-01 This study addresses the debate about whether adult language learners have access to the principles and parameters of universal grammar in constructing the grammar of a second language The data are based on two related experiments The first examines the interpretation of English reflexive pronouns by native speakers of Japanese and of Spanish The second experiment examines the interpretation of the Japanese reflexive *zibun* by native speakers of English and of Chinese Three hypotheses are evaluated a that UG is unavailable and that processing strategies or other non linguistic principles guide second language acquisition b that UG is available only in the form in which it is instantiated in the learner's native language c that UG is fully available including the ability to re set parameters to UG sanctioned values not instantiated in the learner's native language The results show that learners observe constraints defined by Manzini and Wexler's parameterized version of Principle A of the binding theory and support the proposal that adult learners have access to universal grammar A final chapter reviews the experimental data in the light of recent accounts of cross linguistic variation in the grammar of anaphors which reject parameterization of the binding principles in favor of a movement to INFL analysis

Second Language Acquisition Theory and Pedagogy Fred R. Eckman, Jean Mileham, Rita Rutkowski Weber, Diane Highland, Peter W. Lee, 2013-10-08 A volume on second language acquisition theory and pedagogy is at the same time a mark of progress and a bit of an anomaly The progress is shown by the fact that the two disciplines have established themselves as areas of study not only distinct from each other but also different from linguistic theory This was not always the case at least not in the United States The anomaly results from the fact that this book deals with the relationship between L2 theory and pedagogy despite the conclusion that there is currently no widely accepted

theory of SLA Grouped into five sections the papers in this volume consider questions about L2 theory and pedagogy at the macro level from the standpoint of the L2 setting consider input in terms of factors which are internal to the learner examine the question of external factors affecting the input such as the issue of whether points of grammar can be explicitly taught deal with questions of certain complex linguistic behaviors and the various external and social variables that influence learners and discuss issues surrounding the teaching of pronunciation factors that affect a non native accent The Blackwell Companion to Syntax Martin Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at www.companiontosyntax.com This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians There exists no other comparable collection of research that documents the development of syntax in this way Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds Sandra Chung Susan Rothstein Adriana Belletti Jim Huang Howard Lasnik and Marcel den Dikken among many others A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field Explores a comprehensive range of syntax topics from an historical perspective Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures Each multi volume set is also accompanied by a CD Rom of the entire Companion Like the prestigious Blackwell Handbooks in Linguistics series this multi volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated

Reflexive Pronouns: A Theoretical and Experimental Synthesis Darcy Sperlich, 2021-01-04 This book presents a comprehensive picture of reflexive pronouns from both a theoretical and experimental perspective using the well researched languages of English German Dutch Chinese Japanese and Korean In order to understand the data from varying theoretical perspectives the book considers selected syntactic and pragmatic analyses based on their current importance in the field The volume consequently introduces the Emergentist Reflexivity Approach which is a novel theoretical synthesis incorporating a sentence and pragmatic processor that accounts for reflexive pronoun behaviour in these six languages Moreover in support of this model a vast array of experimental literature is considered including first and second language acquisition bilingual psycholinguistic neurolinguistic and clinical studies It is through both the intuitive and experimental data linguistic theorizing relies upon that brings out the strengths of the modelling adopted here paving new avenues for future research In

sum this volume unites a diverse array of the literature that currently sits largely divorced between the theoretical and experimental realms and when put together a better understanding of reflexive pronouns under the auspices of the Emergentist Reflexivity Approach is forged

Chinese Reflexives William Xian-fu Yu, 2000 This book presents the Chinese reflexivisation system investigating the different types of Chinese reflexive constructions and offering an analysis of these in an attempt to integrate syntactic morphological and discourse related aspects of the phenomena In Chinese two distinct types of reflexive have been widely discussed in the literature simplex reflexive *ziji* self which is a long distance reflexive and complex reflexive pronoun *ziji* such as *taziji* himself which must be locally bound In addition Chinese has a kind of double reflexive construction such as *ziji* *benshen* and reflexive clitics *zi* self and *ziwo* self This book argues that reflexive clitics must be locally bound and that under certain conditions both simplex reflexive *ziji* and complex reflexives can be locally bound long distance bound or even free in an entire sentence This study proposes that every type of reflexive has two structures one is an anaphoric structure while the other is a logophoric structure When a verb assigns an anaphoric theta role the reflexive can have the anaphoric structure and the head of the reflexive NP is allowed to adjoin the head of the VP at LF If a reflexive cannot receive an anaphoric theta role it can have a logophoric structure In the logophoric structure the head of the reflexive DP must be a pro in order to receive the disjoint theta role from the verb
