The Grammar of Space Soteria Svorou,1994-04-06 A cross linguistic study of grammatical morphemes expressing spatial relationships that discusses the relationship between the way human beings experience space and the way it is encoded grammatically in language The discussion of the similarities and differences among languages in the encoding and expression of spatial relations centers around the emergence and evolution of spatial grams and the semantic and morphosyntactic characteristics of two types of spatial grams The author bases her observations on the study of data from 26 genetically unrelated and randomly selected languages It is shown that languages are similar in the way spatial grams emerge and evolve and also in the way specific types of spatial grams are used to express not only spatial but also temporal and other non spatial relations Motivation for these similarities may lie in the way we as human beings experience the world which is constrained by our physical configuration and neurophysiological apparatus as well as our individual cultures

The Routledge Handbook of North American Languages Daniel Siddiqi,Michael Barrie,Carrie Gillon,Jason Haugen,Eric Mathieu,2019-09-25 The Routledge Handbook of North American Languages is a one stop reference for linguists on those topics that come up the most frequently in the study of the languages of North America including Mexico This handbook compiles a list of contributors from across many different theories and at different stages of their careers all of whom are well known experts in North American languages The volume comprises two distinct parts the first surveys some of the phenomena most frequently discussed in the study of North American languages and the second surveys some of the most frequently discussed language families of North America The consistent goal of each contribution is to couch the content of the chapter in contemporary theory so that the information is maximally relevant and accessible for a wide range of audiences including graduate students and young new scholars and even senior scholars who are looking for a crash course in the topics Empirically driven chapters provide fundamental knowledge needed to participate in contemporary theoretical discussions of these languages making this handbook an indispensable resource for linguistics scholars   **On**

Ancient Grammars of Space Silvia Kutscher,Daniel A. Werning,2013-12-18 This volume presents new research by the Topoi group The Conception of Spaces in Language on the expression of spatial relations in ancient languages The six articles in this volume discuss static and dynamic aspects of the spatial grammars of Ancient to Medieval Greek Akkadian Hittite and Hieroglyphic Ancient Egyptian as well as field data on eight modern languages Arabic Hebrew English German Russian French Italian and Spanish Among the grams discussed are spatial particles motion verbs case and most prominently spatial prepositions All ancient language data are fully explained in linguistic word by word glosses and are therefore accessible to scholars who are not themselves experts on the respective languages Taken together these contributions extend the scope of research on spatial grammar back to the third millennium BCE *Language Typology and Language Universals / Sprachtypologie und sprachliche Universalien / La typologie des langues et les universaux linguistiques. 1. Halbband* Haspelmath Martin,2008-07-14 No detailed description available for HASPELMATH ET AL LANG TYPOLOGY 1 TLBD HSK 20 1 E BOOK **Language Typology and Language Universals** Martin Haspelmath,2001 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an verview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes

are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume   **World Lexicon of Grammaticalization** Tania Kouteva,Bernd Heine,Bo Hong,2019-08-08 Based on analysis of more than 1 000 languages this volume reconstructs more than 500 processes of grammatical change in the languages of the world   *Metaphorical Landscapes and the Theology of the Book of Job* Johan de Joode,2018-10-22 Metaphorical Landscapes and the Theology of the Book of Job demonstrates how spatial metaphors play a crucial role in the theology of the book of Job Themes as pivotal as trauma ill being retribution and divine character are conceptualized in terms of space its imagery is thus dependent on spatial configurations such as boundaries distance direction containment and contact Not only are spatial metaphors ubiquitous in the book of Job possibly the most frequent conceptual metaphors in the book they are essential to its theological reasoning Job s spatial metaphors form a metaphorical landscape in which God s character and his creation are challenged in unprecedented ways In the theophany God reacts to that landscape This book introduces a pragmatic synthesis of both conceptual metaphor theory and spatial semantics and it demonstrates their exegetical and hermeneutic potential

   Space in Diachrony Silvia Luraghi,Tatiana Nikitina,Chiara Zanchi,2017-08-14 Space is a fundamental dimension of human life and is pervasive in human experience Research on space has highlighted the possible asymmetrical nature of spatial relations Differences in the encoding of goals and sources of motion are a case in point and cross linguistic coding tendencies show that path is less frequently flagged by a dedicated case than goal source origin and static location locative Interestingly such asymmetries may correlate with certain types of landmark as in the case of toponyms or of animate entities Even though these issues have been focused upon both in typological and psycholinguistic research they remain largely open The papers in this collection aim to show that a diachronic approach may shed light on the way in which asymmetries in the space domain come about over time thus contributing to the clarification of synchronically puzzling facts

   Variation in Indigenous Minority Languages James N. Stanford,Dennis Richard Preston,2009 Indigenous minority languages have played crucial roles in many areas of linguistics phonetics phonology morphology syntax typology and the ethnography of communication Such languages have however received comparatively little attention from quantitative or variationist sociolinguistics Without the diverse perspectives that underrepresented language communities can provide our understanding of language variation and change will be incomplete To help fill this gap and develop broader viewpoints this anthology presents 21 original fieldwork based studies of a wide range of indigenous languages in the framework of quantitative sociolinguistics The studies illustrate how such understudied communities can provide new insights into language variation and change with respect to socioeconomic status gender age clan lack of a standard exogamy contact with dominant majority languages internal linguistic factors and many other topics   From Space to Time Eugene H. Casad,2012-12-19 Eugene Casad s posthumous monograph is an in depth study of the TIME IS SPACE metaphor in Cora an

Uto Aztecan language spoken in the state of Nayarit Mexico within the framework of Ronald Langacker s Cognitive Grammar The author provides an introduction to Cora speakers and their history and traces the evolution of Cora locative expressions comparing them with cognate or corresponding expressions in other Uto Aztecan languages e g Huichol to reconstruct the development of Cora temporal meanings Based on a meticulous analysis of synchronic and diachronic data Casad postulates distinct Cora models of time grammatical aspect and event structure among which the topographically based model of time is especially prominent This important book can be regarded as the opus magnum of the author It should be of interest to scholars working in conceptual metaphor theory grammaticalization and the history and typology of Uto Aztecan languages

Multiple Preverbs in Ancient Indo-European Languages Chiara Zanchi,2019-08-26 The book investigates multiple preverbs PVs in some ancient IE languages Vedic Homeric Greek Old Church Slavic and Old Irish After an introduction it opens with the theoretical framework and a typologically oriented overview of PVs It then gives quantitative data about multiple PV composites and carries out philological formal semantic and syntactic analyses on them The comparison among these languages suggests that a process of accumulation lies behind multiple PV composites Also PV ordering is explained by different factors semantic solidarity between PVs and verbs PVs tendency to be specified by event participants PVs etymologies influence from other languages The book also contributes to casting light on the reasons for PVs grammaticalization and lexicalization These are two distinct reanalyses triggered by the same factor i e the mentioned semantic solidarity which makes PVs be felt as redundant They are thus reassigned salient pieces of information as actional markers grammaticalization or reinterpreted as part of the verb lexicalization *Exploring Functional-Cognitive Space* Christopher S. Butler,Francisco Gonzálvez-García,2014-08-28 This book intended primarily for researchers and advanced students expands greatly on previous work by the authors exploring the topography of the multidimensional functional cognitive space within which functional cognitive and or constructionist approaches to language can be located The analysis covers a broad range of 16 such approaches with some additional references to Chomskyan minimalism and is based on 58 questionnaire items each rated by 29 experts on particular models for their importance in the model concerned These ratings are analysed statistically to reveal overall patterns of dis similarity across models The questionnaire ratings and experts comments are then used together with the authors close reading of the literature in detailed discussion leading to a final dichotomous rating for each feature in each model the results again being analysed statistically The final chapter presents the overall conclusions and suggests how existing collaborations between approaches could be strengthened and new ones created in future research Exploring Functional Cognitive Space has been awarded the 2016 prize of the Spanish Association for Applied Linguistics Asociaci n Espa ola de Ling stica Aplicada AESLA for work by experienced researchers **Space in Languages** Maya Hickmann,Stéphane Robert,2006-01-01 Space is presently the focus of much research and debate across disciplines including linguistics anthropology psychology and philosophy One strong feature of this collection is to bring

together theoretical and empirical contributions from these varied scientific traditions with the collective aim of addressing fundamental questions at the forefront of the current literature the nature of space in language the linguistic relativity of space the relation between spatial language and cognition Linguistic analyses highlight the multidimensional and heterogeneous nature of space while also showing the existence of a set of types parameters and principles organizing the considerable diversity of linguistic systems and accounting for mechanisms of diachronic change Findings concerning spatial perception and cognition suggest the existence of two distinct systems governing linguistic and non linguistic representations that only partially overlap in some pathologies but they also show the strong impact of language specific factors on the course of language acquisition and cognitive development **Syntax and Semantics of Prepositions** Patrick Saint-Dizier,2006-01-18 This book is the first to provide an integrated view of preposition from morphology to reasoning via syntax and semantics It offers new insights in applied and formal linguistics and cognitive science It underlines the importance of prepositions in a number of computational linguistics applications such as information retrieval and machine translation The reader will benefit from a wide range of views and applications to various linguistic frameworks among which most notably HPSG The book is for researchers working in the fields of computational linguistics linguistics and artificial intelligence Verb Classification in Australian Languages William B. McGregor,2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates **Substrate and Adstrate** Micah Corum,2015-04-24 This volume provides a large scale in depth analysis of locative structures in Nigerian Pidgin and Ghanaian Pidgin English and compares those structures to locatives in their lexifier substrate and adstrate languages The work draws on new research methods for investigating substrate and adstrate influence in semantics and creole genesis The Construal of Spatial Meaning Carita Paradis,Jean Hudson,Ulf Magnusson,2013-04-25 This book considers how language users express and understand literal and metaphorical spatial meaning not only in language but also through gesture and pointing Researchers explore the ways in which theoretical developments in language and cognition new empirical techniques and new computational facilities have led to a greater understanding of the relationship between physical space and mental space as expressed in human communication *The Oxford Handbook of the Word* John R.
