Bulletin Milwaukee Public Museum, 1928 *The Wisconsin Archeologist*, 1928 Decorative Art and Basketry of the Cherokee Frank Gouldsmith Speck, 1920 *Prehistoric Copper Mining in Michigan* John R. Halsey, 2018-01-01 Isle Royale and the counties that line the northwest coast of Michigan's Upper Peninsula are called Copper Country because of the rich deposits of native copper there. In the nineteenth century explorers and miners discovered evidence of prehistoric copper mining in this region. They used those ancient diggings as a guide to establishing their own much larger mines and in the process destroyed the archaeological record left by the prehistoric miners. Using mining reports, newspaper accounts, personal letters, and other sources, this book reconstructs what these nineteenth-century discoverers found, how they interpreted the material remains of prehistoric activity, and what they did with the stone, wood, and copper tools they found at the prehistoric sites. This volume represents an exhaustive compilation of the early written and published accounts of mines and mining in Michigan's Upper Peninsula. It will prove a valuable resource to current and future scholars. Through these early historic accounts of prospectors and miners, Halsey provides a vivid picture of what once could be seen. John M. O'Shea, curator of Great Lakes Archaeology, University of Michigan Museum of Anthropological Archaeology.

The Grand River Mound Group and Camp Site Alton K. Fisher, 19?? Indigenous Life around the Great Lakes Richard W. Edwards IV, 2020-09-30 Enormous changes affected the inhabitants of the Eastern Woodlands area during the eleventh through fifteenth centuries AD. At this time, many groups across this area, known collectively to archaeologists as Oneota, were aggregating and adopting new forms of material culture and food technology. This same period also witnessed an increase in intergroup violence as well as a rise in climatic volatility with the onset of the Little Ice Age. In *Indigenous Life around the Great Lakes*, Richard W. Edwards explores how the inhabitants of the western Great Lakes region responded to the challenges of climate change, social change, and the increasingly violent physical landscape. As a case study, Edwards focuses on a group living in the Koshkonong Locality in what is now southeastern Wisconsin. Edwards contextualizes Koshkonong within the larger Oneota framework and in relation to the other groups living in the western Great Lakes and surrounding regions. Making use of a canine surrogacy approach, which avoids the destruction of human remains, Edwards analyzes the nature of groups' subsistence systems, the role of agriculture, and the risk management strategies that were developed to face the challenges of their day. Based on this analysis, Edwards proposes how the inhabitants of this region organized themselves and how they interacted with neighboring groups. Edwards ultimately shows how the Oneota groups were far more agricultural than previously thought and also demonstrates how the maize agriculture of these groups was related to the structure of their societies. In bringing together multiple lines of archaeological evidence into a unique synthesis, *Indigenous Life around the Great Lakes* is an innovative book that will appeal to archaeologists who study the Midwest and surrounding regions, and it will also appeal to those who research risk management, agriculture, and the development of hierarchical societies more generally.
