The Great Ascent The Struggle For Economic Development In Our Time:

The Great Ascent Robert Louis Heilbroner, 1963 The Great Ascent Robert L. Heilbroner, 1975 The Great Ascent Stepping Stones of the Steward Ronald E. Vallet, 1994 Now thoroughly revised with significant Samuel A. Matz, 1963 changes in chapters dealing with faith and money and environmental issues Vallet's inspirational study teaches Christians how to gain a sense of purpose how to properly use resources talents and money and how to reach out with compassion for the welfare of others and for the planet How Capitalism Underdeveloped Black America Manning Marable, 2015-10-27 How Capitalism Underdeveloped Black America dispenses impeccably comprehensive research to expose the realities of African American poverty health employment and education as well as other demographics Marable's conclusions prove an undeniable connection between the oppression and exploitation of Black America and capitalism **Green Politics is Eutopian** Paul Gilk, 2009-02-26 There have been various thinkers who have attempted to explain the Earth altering even ecocidal features in modern life Jacques Ellul for instance a French intellectual became famous for his exposition of technique But technique does not adequately address the institutional context out of which technique itself arises In these essays Paul Gilk stands on the shoulders of two American scholars in particular One is world historian Lewis Mumford whose work spans fifty years of scholarship The other is classics professor Norman O Brown who brought his erudition into a systematic study of Freud From these intellectuals especially Gilk concludes that the accelerating ecocidal characteristics of globalisation are inherent manifestations of perfectionist utopian predatory institutions endemic to civilisation Our great difficulty in arriving at or accepting this conclusion is that civilisation contains no negatives it is strictly a positive construct We are therefore incapable of thinking critically about it A corrective is slowly emerging from Green intellectuals Green politics says Gilk is not utopian but eutopian It is not aimed at perfectionist immortality but rather at earthly wholeness Yet the ethical message of Green politics confronts a society saturated with utopian mythology. The question is to what extent and at what speed ecological and cultural breakdown will dissolve civilised utopian certitudes and provide the requisite openings for the growth of Green eutopian culture The Ends of Modernization David Johnson Lee, 2021-08-15 The Ends of Modernization studies the relations between Nicaragua and the United States in the crucial years during and after the Cold War David Johnson Lee charts the transformation of the ideals of modernization national autonomy and planned development as they gave way to human rights protection neoliberalism and sustainability Using archival material newspapers literature and interviews with historical actors in countries across Latin America the United States and Europe Lee demonstrates how conflict between the United States and Nicaragua shaped larger international development policy and transformed the Cold War In Nicaragua the backlash to modernization took the form of the Sandinista Revolution which ousted President Anastasio Somoza Debayle in July 1979 In the wake of the earlier reconstruction of Managua after the devastating 1972 earthquake and instigated by the revolutionary shift of power in the city the Sandinista Revolution incited radical changes that

challenged the frankly ideological and economic motivations of modernization In response to threats to its ideological dominance regionally and globally the United States began to promote new paradigms of development built around human rights entrepreneurial internationalism indigenous rights and sustainable development Lee traces the ways Nicaraguans made their country central to the contest over development ideals beginning in the 1960s transforming how political and economic development were imagined worldwide By illustrating how ideas about ecology and sustainable development became linked to geopolitical conflict during and after the Cold War The Ends of Modernization provides a history of the late Cold War that connects the contest between the two then prevailing superpowers to trends that shape our present globalized PERSPECTIVES ON INTERNATIONAL BUSINESS John Kuada, 2016-04-04 Globalization has multipolar world produced opportunities and challenges that countries and firms respond to with a variety of policies and strategies Approaches that scholars may find intuitively appealing may be considered inappropriate in some contexts This book highlights the diversity of challenges opportunities as well as the policy and strategy options that governments and businesses have considered useful in different operational contexts It brings together research done by scholars at the International Business Centre Department of Business and Management at Aalborg University Denmark and seeks to provide inspiration for further research into some key international business issues Issues discussed include the following A The role of social capital in the internationalization process of firms A Downstream and upstream aspects of internationalization A Network organizational perspective on globalized innovation processes A Performance assessment in cross border mergers and acquisitions A The human side of national and firm level competitiveness A Country of origin effect on brand perception A Role of culture international joint venture management A Multiculturalism and strategizing in international firms

Anthropology and Contemporary Human Problems John H. Bodley,2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses on globalization cultural ecology social class and inequality the environment sustainability and development

Political Culture, Political Science, and Identity Politics Howard J. Wiarda, 2016-04-08 Political Culture defined as the values beliefs and behavioral patterns underlying the political system has long had an uneasy relationship with political science Identity politics is the latest incarnation of this conflict Everyone agrees that culture and identity are important specifically political culture is important in understanding other countries and global regions but no one agrees how much or how precisely to measure it In this important book well known Comparativist Howard J Wiarda traces the long and controversial history of culture studies and the relations of political culture and identity politics to political science Under attack from structuralists institutionalists Marxists and dependency writers Wiarda examines and assesses the reasons for these attacks and why political culture went into decline only to have a new and transcendent renaissance and revival in the writings of Inglehart Fukuyama Putnam Huntington and many others Today political culture now updated to include identity politics stands as one of these great explanatory paradigms in political science the others being structuralism and institutionalism Rather than seeing them as diametrically exposed Howard Wiarda shows how they may be made complementary and woven together in more complex multicausal explanations. Rich Christians in an Age of Hunger Ronald J. Sider, 2015-07-28 In an age obsessed with wealth Christians seem to have forgotten that scripture encourages believers to give to the poor Why do 1 3 billion people live in abject poverty And what should Christians do about it Despite a dramatic reduction in world hunger 34 000 children still die daily of starvation and preventable disease and 1 3 billion people around the world remain in abject poverty Dr Ron Sider a professor of theology examines the issues of poverty and hunger in modern society While the Bible is full of instructions to care for the poor and

warns against being seduced by riches it s been statistically proven that the richer countries become the less they give Finding that conservatives blame what they consider to be morally reprehensible individual choices and liberals blame what they believe to be constrictive social and economic policy Dr Sider finds himself agreeing with both sides First published in 1978 Rich Christians in an Age of Hunger has had an enormous impact on how believers and churches view questions of poverty and hunger Dr Sider s insights provide a compelling look at what it truly means to follow Christ This edition of Rich Christians in an Age of Hunger is Newly revised expanded and updated Listed as one of the 100 most influential books in religion in the 20th century A resource for Christians seeking to overcome poverty and change the economic structures of our world In this fresh look at an age old problem Dr Sider offers a detailed explanation of the causes of poverty and hunger as well as a comprehensive series of practical solutions for Christians who want to seriously pursue their faith and become better followers of Jesus
