small personal experiences with craft into a more widespread movement When shared via social media craft anecdotes such as the first time one had a beer interrupt and repeat one another building a sense of familiarity and identity among otherwise unconnected people Aggregation the practice of joining unlike items into one space builds on this network identity establishing a connection to particular brands or locations both real and virtual The public releases of craft beers are used to explore the concept of craft delivery which involves multiple actors across multiple spaces and results in multiple meanings Finally Rice highlights how personal sharing operates within the community of craft beer enthusiasts who share online images of acquiring trading for and consuming a wide variety of beers These shared stories and images while personal for each individual reflect the dependence of craft on systems of involvement Throughout Rice relates and reflects on his own experience as a craft beer enthusiast and his participation via social media in these systems Both an objective scholarly study and an engaging personal narrative about craft beer *Craft Obsession* provides valuable insights into digital writing storytelling and social media *Hopped Up* Jeffrey M. Pilcher, 2024 A highly readable history of beer and the brewing industry around the world over the centuries *Hopped Up* narrates the oscillations between distinctive regional and national preferences and the capitalist global standardization of beer style and taste in a work that will appeal to historians and beer connoisseurs alike **California.
