Cretaceous Project 200, Volume 1: The Cretaceous World M.B. Hart, S.J. Batenburg, B.T. Huber, G.D. Price, N. Thibault, M. Wagreich, I. Walaszczyk, 2025-04-02 The Cretaceous was first mentioned in the legend of a geological map largely centred on France published in 1822 by Jean Baptiste Julien d Omalius d Halloy Two hundred years of research have demonstrated that the Cretaceous records some of the highest sea levels atmospheric temperatures and extreme events in Earth history It was also a time of significant palaeogeographical changes and continental fragmentation This volume draws together a collection of papers that demonstrate these particularly Cretaceous events of warm climates sea level change and the impact of major volcanic events on the fauna and flora of the time Geochemical and stable isotope data are used to interpret these changing environments and their impact on the Cretaceous ecosystem The volume closes with a description of the recent drilling of the Chicxulub bolide impact site

War and Algorithm Max Liljefors, Gregor Noll, Daniel Steuer, 2019-10-11 New military technologies are animated by fantasies of perfect knowledge lawfulness and vision that contrast sharply with the very real limits of human understanding law and vision Thus various kinds of violent acts are proliferating while their precise nature remains unclear Especially man machine ensembles guided by algorithms are operating in ways that challenge conceptual understanding War and Algorithm looks at the increasing power of algorithms in these emerging forms of warfare from the perspectives of critical theory philosophy legal studies and visual studies The contributions in this volume grapple with the challenges posed by algorithmic warfare and trace the roots of new forms of war in the technological practices and forms of representation of the digital age Together these contributions provide a first step toward understanding and resisting our emerging world of war

Schopf,2022-08-19 Over the past half century studies of the evolution of life have themselves evolved markedly Life's earliest history unknown and thought unknowable for the 100 years following publication of Darwin's great opus in 1859 has finally come to light as the documented fossil record has been extended an astonishing sevenfold from 500 million to now 3 500 million years No longer are studies of evolution based solely on ancient fossils now augmented by the evidence of life's long development encoded in its genetic and biochemical make up Indeed as new knowledge of the history of plants and animals and of their ever changing environment has been unearthed understanding of the overriding impact of the sequential co evolution of the two groups plants leading the charge with animals following their fodder has become increasingly

acknowledged Intended for a non specialist audience students and laypersons alike this book presents an up to date well illustrated encapsulation of the Phanerozoic history of life the 550 million year long advance of plants and animals that set the stage for the rise of humans The presentation deals with the human side of science not just the science itself as it illuminates how scientific discoveries are actually made It is a wondrous read as it wends its way through a terrifically interesting remarkable tale showing that surprisingly and stunningly it is true beyond all doubt that from plants to people bacteria to bats microbes to man all life is linked
