Animals in Film Jonathan Burt, 2004-02-03 From Salvador Dalí to Walt Disney, animals have been a constant yet little considered presence in film. Indeed, it may come as a surprise to learn that animals were a central inspiration to the development of moving pictures themselves. In *Animals in Film*, Jonathan Burt points out that the mobility of animals presented technical and conceptual challenges to early film makers, the solutions of which were an important factor in advancing photographic technology, accelerating the speed of both film and camera. The early filming of animals also marked one of the most significant and far-reaching changes in the history of animal representation and has largely determined the way animals have been visualized in the twentieth century. Burt looks at the extraordinary relationship between animals, cinema and photography, including the pioneering work of Eadweard Muybridge and Jules Etienne Marey and the technological developments and challenges posed by the animal as a specific kind of moving object. *Animals in Film* is a shrewd account of the politics of animals in cinema, of how movies and video have developed as weapons for animal rights activists and of the roles that animals have played in film from the avant-garde to Hollywood.

The Great Show Business Animals David Rothel, 1980

Facing the Wild Chilla Bulbeck, 2012-06-25 What do wild animals mean to humans? Will they survive both rampant habitat loss and extinction caused by human encroachment and, as ecotourists, our enthusiasm for them? With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins, going on safari or bird watching ever more popular, these are critical questions. Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry, conservation efforts and society at large. *Facing the Wild* is the first serious empirical examination of why people seek out animals in their natural environment, what the desire for this experience tells us about the meanings of animals, nature, authenticity and wilderness in

contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike
