Congress,2010 **The Patent-Competition Interface in Developing Countries** Thomas K. Cheng,2021-12-16 This book proposes an approach to the patent competition interface for developing countries It puts forward a theoretical framework after canvassing relevant policy considerations and examines the many reasons why patent protection is not essential for generating innovation incentives in developing countries These include the tendency of the patent system to overcompensate innovators the availability of other appropriation mechanisms for innovators to monetize their innovations and the lack of appropriate technological capacity in many developing countries to take advantage of the incentives generated by the patent system It also argues that developing countries with a small population need not pay heed to the impact of their patent system on the incentives of foreign innovators It then proposes a classification of developing countries into production countries technology adaptation countries and proto innovation countries and argues that dynamic efficiency considerations take on different meanings for developing countries depending on their technological capacities For the vast majority of developing countries bereft of meaningful innovation capacity foreign technology transfer is the main vehicle for technological progress The chief dynamic policy consideration for these countries is hence incentives for technology transfer instead of innovation incentives There are three main means of voluntary technology transfer importation of technological goods foreign direct investment and technology licensing Competition law regulation of patent exploitation practices interacts with these three means of technology transfer in different ways and an appropriate approach to the patent competition interface for these countries needs to take these into account Distilling all these considerations the book proposes a development stage specific approach to the patent competition interface for developing countries The approach is then applied to a number of patent exploitation practices

including unilateral refusal to deal patent tying excessive pricing for pharmaceuticals reverse payment settlements and restrictive licensing practices *Bulletin of the Atomic Scientists* ,1985-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Signal* ,1999

Competing Visions Paul Dobrescu,Flavia Durach,2025-01-17 This book presents an in depth and provoking analysis of the current global landscape and the challenges it presents for development Offering a unique approach examining the implications of strategic uncertainty on strategies for development it discusses contemporary challenges to the field particularly those relating to crisis management Positing that we live in an age of strategic uncertainty the authors progress the notion that crisis responses require extensive and holistic strategic deliberation vis vis economic and social considerations short term and long term projections as well as evaluations of domestic and international spheres of development Tracing the infrastructure of globalization the book acknowledges the need for medium term strategies for each crisis but emphasizes that they must be intricately woven into a larger unitary vision ultimately highlighting the critical role of strategic thinking in addressing complex challenges we face today *Hearings, Reports and Prints of the Joint Economic Committee* United States.
