The Greek Achievement The Foundation Of The Western World

Suren Pillay

The Greek Achievement The Foundation Of The Western World:

The Greek Achievement Charles Freeman, 1999 Greek history and culture from 1550 B C to 600 A D are covered from the earliest settlements through the Classical Hellenistic and Roman periods to the splendors of Byzantium *How the West Won* Rodney Stark, 2023-07-11 Finally the Truth about the Rise of the West Modernity developed only in the West in Europe and North America Nowhere else did science and democracy arise nowhere else was slavery outlawed Only Westerners invented chimneys musical scores telescopes eyeglasses pianos electric lights aspirin and soap The question is Why Unfortunately that question has become so politically incorrect that most scholars avoid it But acclaimed author Rodney Stark provides the answers in this sweeping new look at Western civilization How the West Won demonstrates the primacy of uniquely Western ideas among them the belief in free will the commitment to the pursuit of knowledge the notion that the universe functions according to rational rules that can be discovered and the emphasis on human freedom and secure property rights Taking readers on a thrilling journey from ancient Greece to the present Stark challenges much of the received wisdom about Western history Stark also debunks absurd fabrications that have flourished in the past few decades that the Greeks stole their culture from Africa that the West's discoveries were copied from the Chinese and Muslims that Europe became rich by plundering the non Western world At the same time he reveals the woeful inadequacy of recent attempts to attribute the rise of the West to purely material causes favorable climates abundant natural resources guns and steel How the West Won displays Rodney Stark's gifts for lively narrative history and making the latest scholarship accessible to all readers This bold insightful book will force you to rethink your understanding of the West and the birth of modernity and to recognize that Western civilization really has set itself apart from other cultures *An Introduction to the Ancient World* Lukas de Blois, R.J. van der Spek, 2008-10-24 Integrating the results of scholarly work from the past decade the authors of *An Introduction to the Ancient World* Lukas de Blois and R J van der Spek have fully updated and revised all sixteen chapters of this best selling introductory textbook Covering the history and culture of the ancient Near East Greece and Rome within the framework of a short narrative history of events this book offers an easily readable integrated overview for students of history classics archaeology and philosophy whether at college at undergraduate level or among the wider reading public This revised second edition offers a new section on early Christianity and more specific information on the religions economies and societies of the ancient Near East There is extended coverage of Greek Macedonian and Near Eastern history of the fourth to second centuries BC and the history of the Late Roman Republic The consequences of Julius Caesar's violent death are covered in more detail as are the history and society of Imperial Rome This new edition is comprehensive covers 3 000 years of ancient history and provides the basis for a typical one semester course lavishly illustrated contains maps line drawings and plates to support and supplement the text with updated captions clearly and concisely written two established and respected university teachers with thirty years experience in the subject areas well

organized traces the broad outline of political history but also concentrates on particular topics user friendly includes chapter menus an extensive and expanded bibliography organized by subject area and three appendices an improved introduction and the addition of an epilogue The Closing of the Western Mind Charles Freeman,2007-12-18 A radical and powerful reappraisal of the impact of Constantine s adoption of Christianity on the later Roman world and on the subsequent development both of Christianity and of Western civilization When the Emperor Contstantine converted to Christianity in 368 AD he changed the course of European history in ways that continue to have repercussions to the present day Adopting those aspects of the religion that suited his purposes he turned Rome on a course from the relatively open tolerant and pluralistic civilization of the Hellenistic world towards a culture that was based on the rule of fixed authority whether that of the Bible or the writings of Ptolemy in astronomy and of Galen and Hippocrates in medicine Only a thousand years later with the advent of the Renaissance and the emergence of modern science did Europe begin to free itself from the effects of Constantine s decision yet the effects of his establishment of Christianity as a state religion remain with us in many respects today Brilliantly wide ranging and ambitious this is a major work of history *An Introduction to the Ancient World* ,

The Greek Achievement Charles Freeman,2000-09 Drawing on the most recent research Freeman provides a new generation of readers with a comprehensive account of Greek history over 2000 years He describes the early settlements the wars with the Persian empire the rise of Macedonia and more **Predicaments of Knowledge** Suren Pillay,2024-09 *Predicaments of Knowledge* explores the difficult questions South African universities face after apartheid Is there a difference between Africanising a university and decolonising a university What about differences between deracialising and decolonising the curricula taught at universities across disciplines Through a range of reflections on race language colonial postcolonial and decolonial knowledge projects from Africa and Latin America this book explores the pitfalls and possibilities that face a post apartheid generation inventing the future of knowledge The distinctions between Africanisation decolonisation and deracialisation are often conflated in the political demands put to universities Suren Pillay emphasises all three as important but distinct imperatives If an intervention is undertaken with the aim of decolonising the university while actually addressing deracialisation it can undermine the effort to decolonise Similarly if an initiative to Africanise the university does not address decolonisation both processes can be undermined Drawing on more than two and a half decades of the author s participation in these debates these essays aim to intervene in and elucidate questions and predicaments rather than offering blue prints they are dialogical in spirit even when polemical in tone In conversation with existing continental African and Latin American experiences they offer incisive reflections on current South African debates

Ancient Greeks on the Human Condition Matthew Sims,2021-08-03 This book examines the writings of four ancient Greeks Homer Thucydides Euripides and Aristophanes Each of these four individuals represents a different approach toward the human condition ranging from the heroic and tragic to the comic and absurd This book focuses on how the human

condition can best be understood within the framework of these four perspectives by examining the major contributions of these Greek writers whether in the form of epic Homer's Iliad history Thucydides History of the Peloponnesian War or drama the plays of Euripides and Aristophanes These various perceptions of Greek thought illuminate our understanding of what it means to be fully human By focusing on the concepts of the heroic tragic comic and absurd we can see how these ancient Greek authors still provide key insights for us today as they clarify those timeless features that define the human condition

The Dream of the West, Pt II Brian Lasater, 2008 This volume looks at the ancient heritage of Greek philosophy and Mesopotamian astronomy and examines the history of map making coastal and celestial navigation and astronomy from 1487 1727

The Great Transformation Karen Armstrong, 2009-02-24 From one of the world's leading writers on religion and the highly acclaimed author of the bestselling A History of God The Battle for God and The Spiral Staircase comes a major new work a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time In one astonishing short period the ninth century BCE the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day Confucianism and Daoism in China Hinduism and Buddhism in India monotheism in Israel and philosophical rationalism in Greece Historians call this the Axial Age because of its central importance to humanity's spiritual development Now Karen Armstrong traces the rise and development of this transformative moment in history examining the brilliant contributions to these traditions made by such figures as the Buddha Socrates Confucius and Ezekiel Armstrong makes clear that despite some differences of emphasis there was remarkable consensus among these religions and philosophies each insisted on the primacy of compassion over hatred and violence She illuminates what this family resemblance reveals about the religious impulse and quest of humankind And she goes beyond spiritual archaeology delving into the ways in which these Axial Age beliefs can present an instructive and thought provoking challenge to the ways we think about and practice religion today A revelation of humankind's early shared imperatives yearnings and inspired solutions as salutary as it is fascinating Excerpt from The Great Transformation In our global world we can no longer afford a parochial or exclusive vision We must learn to live and behave as though people in remote parts of the globe were as important as ourselves The sages of the Axial Age did not create their compassionate ethic in idyllic circumstances Each tradition developed in societies like our own that were torn apart by violence and warfare as never before indeed the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them All the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence and this tells us something important about our humanity

Wilbur Schramm and Noam Chomsky Meet Harold Innis Robert E. Babe, 2015-04-21 Wilbur Schramm and Noam Chomsky Meet Harold Innis is an original critical in depth analysis of the media and communication thought of Canada's most highly acclaimed scholar Harold Adams Innis Even in Canada however Innis's writings until now have been only

partially cited and interpreted Innis is usually stereotyped as being merely an economic historian fixated on previous civilizations whereas in fact he was an astute analyst whose main concerns were with present problems and future trajectories In the United States meanwhile Innis's media and communication writings have been quite neglected and even denigrated Drawing on Innis's less frequently cited work including his long neglected Political Economy in the Modern State Robert Babe opens up Innis's media scholarship as a whole unfolding it in startling critical yet ultimately appreciative ways By comparing Innis's media scholarship with Wilbur Schramm's and Noam Chomsky's moreover Babe tests the claims positions and modes of analysis not only of Innis but also of the other two celebrated scholars as well casting new light on their works and allowing the reader to imagine what sort of discourses might have been possible had the three been in conversation together Wilbur Schramm and Noam Chomsky Meet Harold Innis provides comparative insight into foundational media scholarship in the United States and Canada and explores in some detail the relevance of Innis for twenty first century digitized society

Body Studies: The Basics Niall Richardson, Adam Locks, 2014-07-25 Consideration of the body as a subject for study has increased in recent years with new technologies forms of modification debates about obesity and issues of age being brought into focus by the media Drawing on contemporary culture Body Studies The Basics introduces readers to the key concerns and debates surrounding the study of the sociological body cutting across disciplines to cover topics which include Nature vs Culture how we build and transform our bodies Conformity and resistance in bodily practice Issues of body image beauty diet exercise and age Sporting bodies and the pursuit of ideals Enfreakment disability and monstrosity Cyborgs and virtual online bodies With further reading signposted throughout this accessible book is essential reading for anyone studying the body through the lens of sociology cultural studies sports studies media studies and gender studies and all those with an interest in how the physical body can be a social construct

Landscape of the Mind John F. Hoffecker, 2011-05-31 In Landscape of the Mind John F Hoffecker explores the origin and growth of the human mind drawing on archaeology history and the fossil record He suggests that as an indirect result of bipedal locomotion early humans developed a feedback relationship among their hands brains and tools that evolved into the capacity to externalize thoughts in the form of shaped stone objects When anatomically modern humans evolved a parallel capacity to externalize thoughts as symbolic language individual brains within social groups became integrated into a neocortical Internet or super brain giving birth to the mind Noting that archaeological traces of symbolism coincide with evidence of the ability to generate novel technology Hoffecker contends that human creativity as well as higher order consciousness is a product of the superbrain He equates the subsequent growth of the mind with human history which began in Africa more than 50 000 years ago As anatomically modern humans spread across the globe adapting to a variety of climates and habitats they redesigned themselves technologically and created alternative realities through tools language and art Hoffecker connects the rise of civilization to a hierarchical reorganization of the super brain triggered by explosive population growth Subsequent human

history reflects to varying degrees the suppression of the mind's creative powers by the rigid hierarchies of nationstates and empires constraining the further accumulation of knowledge The modern world emerged after 1200 from the fragments of the Roman Empire whose collapse had eliminated a central authority that could thwart innovation Hofferer concludes with speculation about the possibility of artificial intelligence and the consequences of a mind liberated from its organic antecedents to exist in an independent nonbiological form

Consummation of the Ages vol I Henry Epps,2012-08-29 The consummation of the ages vol I talks about the accumulation of the end of the ages and global change Jesus will return and restore cosmos order

Democracy Paul Cartledge,2016-03-03 In ancient Greece there can be traced not only the rudiments of modern democratic society but the entire Western tradition of anti democratic thought In Democracy A Life Paul Cartledge provides a detailed history of this ancient political system

Race and Rhetoric in the Renaissance I. Smith,2009-12-07 This book argues that the sixteenth century preoccupation with rehabilitating English tells the larger story of an anxious nation redirecting attention away from its own marginal minority status by racially scapegoating the barbarous African

Mythology for the Microcosm A. Brian Lasater,2005-12 About my book Although there is nothing new under the sun it is always useful to reevaluate old ideas and principles and express them in new and original ways There are many books on the Kabala but based on what I have seen and read there is room for a comprehensive approach Many authors leave out fundamental principles altogether like the authors who don't even mention the celestial bodies and the Zodiac On the other hand scholars of mythology generally do not even refer to astrology and the Kabala and apparently do not recognise that the celestial bodies were the principle gods of the ancient pantheon My approach has been to briefly discuss some of the fundamental elements of the old theologies and relate them to astrology and the Kabala from a modern perspective Thus I have laid an essential foundation for the Kabala and astrology and placed them in the context of Greek and Roman mythology Since I have adopted a broad perspective the reader has a basis for pursuing these subjects in a variety of ways I have not seen any other book that relates astrology and the Kabala to Greek and Roman mythology the Bible and then relates these to Mesopotamian and Egyptian mythology The ancient theologies have many fundamental elements in common and these form key parts of the foundation of astrology and the Kabala In addition I have given a concise discussion of the Four Alchemical Elements the Signs of the Zodiac and the Celestial Bodies and placed them in a Kabalistic framework To truly comprehend the Kabala and Astrology it must be remembered that it is one complete whole and it is broken down to make analysis practicable Therefore I have discussed Creation and the Ten Sephiroth the trinity in some of its forms as sacred elements in Creation and in Man and Woman the Four Elements and the Zodiac Then from a mythological and theological perspective I have looked briefly at Mesopotamia and Egyptian As a counterweight to our cynical age I have looked at the Golden Age of Atlantis and the mythological heroes and heroines of the primordial past serve as exemplars and encourage us to strive to attain some of Occidental Civilization's highest ideals On the other hand Atlantis is a warning the misuse of knowledge and

power leads to the destruction of civilization Further from a theological and mythical perspective the Sephiroth were divine instruments used in Creation On a more mundane level the Kabala and astrology are a means to know ourselves and obey the injunction Know Thyself that used to be inscribed on Apollo's temple at Delphi This book is based on the work of the ancients whose writing is superb The quotes in English from the ancients are the best part of the book and it is a pleasure to read

Helen of Troy Bettany Hughes,2009-06-03 For 3 000 years the woman known as Helen of Troy has been both the ideal symbol of beauty and a reminder of the terrible power beauty can wield In her search for the identity behind this mythic figure acclaimed historian Bettany Hughes uses Homer's account of Helen's life to frame her own investigation Tracing the cultural impact that Helen has had on both the ancient world and Western civilization Hughes explores Helen's role and representations in literature and in art throughout the ages This is a masterly work of historical inquiry about one of the world's most famous women

Land Between the Rivers Bartle Bull,2024-09-10 The epic five millennia history of the region between the Tigris and Euphrates Rivers that was the birthplace of civilization and remains today the essential crossroads between East and West At the start of the fourth millennium BC at the edge of historical time civilization first arrived with the advent of cities and the invention of writing that began to replace legend with history This occurred on the floodplains of southern Iraq where the great rivers Tigris and Euphrates meet the Persian Gulf By 3000 BC a city called Uruk from which Iraq is derived had 80 000 residents Indeed as Bartle Bull reveals in his magisterial history if one divides the 5 000 years of human civilization into ten periods of five centuries each during the first nine of these the world's leading city was in one of the three regions of current day Iraq or to use its Greek name Mesopotamia Inspired by extensive reporting from the region to spend a decade delving deep into its history Bull chronicles the story of Iraq from the exploits of Gilgamesh almost certainly an historical figure to the fall of the Iraqi monarchy in 1958 that ushered in its familiar modern era The land between the rivers has been the melting pot and battleground of countless outsiders from the Akkadians of Hammurabi and the Greeks of Alexander to the Ottomans of Suleiman the Magnificent Here by the waters of Babylon Judaism was born and the Sunni Shia schism took its bloody shape Central themes play out over the millennia humanity's need for freedom versus the co eternal urge of tyranny the ever present conflict and cross fertilization of East and West with Iraq so often the hinge We tend to view today's tensions in the Middle East through the prism of the last hundred years since the Treaty of Versailles imposed a controversial realignment of its borders Bartle Bull's remarkable sweeping achievement reminds us that the region defined by the land between the rivers has for five millennia played a uniquely central role on the global stage

Higher Education in the New Century ,2007-01-01 Higher education worldwide faces similar challenges how to cope with globalization the provision of access to underserved populations and others Higher Education in the New Century has identified six key challenges and has focused careful analysis on them The topics are The academic profession Access and equity Higher education and social cohesion Private higher education International student circulation The

research university Each of these themes is analyzed by a group of international scholars in order to provide a multidisciplinary and cross national perspective This book stems from the Fulbright New Century Scholars Program an international research project involving more than 20 countries Because of its broad perspective this book brings a fresh analysis to central issues For example the analysis of how universities can contribute to social cohesion in divided societies is unique International student flows are discussed from a south south perspective
