Ashmole,1932-01-03 A reprint of the original book first issued in 1932 **Greek Sculpture** Mark D. Fullerton,2016-05-02 Greek Sculpture presents a chronological overview of the plastic and glyptic art forms in the ancient Greek world from the emergence of life sized marble statuary at the end of the seventh century BC to the appropriation of Greek sculptural traditions by Rome in the first two centuries AD Compares the evolution of Greek sculpture over the centuries to works of contemporaneous Mediterranean civilizations Emphasizes looking closely at the stylistic features of Greek sculpture illustrating these observations where possible with original works rather than copies Places the remarkable progress of stylistic changes that took place in Greek sculpture within a broader social and historical context Facilitates an understanding of why Greek monuments look the way they do and what ideas they were capable of expressing Focuses on the most recent interpretations of Greek sculptural works while considering the fragile and fragmentary evidence uncovered

*Greek Sculpture* John Boardman,1978 This handbook chronicles the development of Classical Greek sculpture and includes not only illustrations of the masterpieces of architectural sculptural from the temple of Zeus at Olympia and the Parthenon but also many original works of bronze sculpture from that period some of which have only recently been discovered *Oriental Influences in Early Greek Sculpture ...* Edith Roberts McIntosh,1945 *Greek Sculpture and Painting to the End of the Hellenistic Period* John Davidson Beazley,1932 *Images in Mind* Deborah Steiner,2001 It not only shows that ancient viewers conceived of images as more operative than aesthetic but additionally reveals how poets and philosophers found in sculpture a practice good to think with Polykleitos, the Doryphoros, and Tradition Warren G. Moon,1995 Polykleitos the Doryphoros and Tradition displays an impressive range of approaches beginning with commentary on the artistic and philosophical antecedents that influenced Polykleitos own aesthetic as well as the role of contemporary Greek anatomical knowledge in his representation of the human form Many of the essays offer extended analysis and detailed illustration of his surviving sculptures later copies of his work and reflections of his style in sculpture paintings coins and other art in Greece Italy and Asia Minor Several essays offer an extended discussion of Polykleitos original bronze Doryphoros its pose its relation to other spearbearer sculptures and the fine Roman marble copy of it now at the Minneapolis Institute of Arts Prayers in Stone Brunilde S. Ridgway,1999-08-31 Classical Greek architectural sculpture has never before been fully studied as a single topic Personal Styles in Greek Sculpture Όλγα Παλαγιά,J. J. Pollitt,Department of

Classics, Yale University Staff, 1998 The aim of this 1996 book is to identify and evaluate the distinctive styles of five important ancient Greek sculptors whose work is discussed by ancient writers Its underlying assumption is that the history of Greek sculpture was not simply governed by impersonal evolutionary forces but that like the sculpture of later periods it was shaped by the intuitions predilections and innovations of particular individuals The international group of authors whose essays appear here recognize that the problematical and fragmentary nature of the surviving evidence makes their task a difficult one Nevertheless by drawing upon the evidence of recent archaeological finds and by re evaluating both the ancient literary sources and earlier scholarly literature they expand our understanding of the role of personal styles in ancient Greek art
