The Green Count Of Savoy Amadeus Vi And Transalpine Savoy In The Fourteenth Century:

The Green Count of Savoy Eugene L. Cox, 2015-12-08 The fourteenth century is usually portrayed as a period of retrogression and disaster in European history but for the transalpine state of Savoy it was a period of glory During this time almost the entire region between Lombardy and Burgundy was brought under the control of Savoyard rulers The buffer state created between France and Italy hindered French expansion for many centuries and helped preserve the independence of Italy Drawing upon much unpublished material Professor Cox traces the social and political evolution of the principality He discusses how the Savoyard state was governed financed and defended He also provides a fascinating biography of the Green Count Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Women in Medieval Europe Jennifer Ward, 2014-06-11 Women in Medieval Europe were expected to be submissive but such a broad picture ignores great areas of female experience Between the thirteenth and fifteenth centuries women are found in the workplace as well as the home and some women were numbered among the key rulers saints and mystics of the medieval world Opportunities and activities changed over time and by 1500 the world of work was becoming increasingly restricted for women Women of all social groups were primarily engaged with their families looking after husband and children and running the household Patterns of work varied geographically In the northern towns women engaged in a wide range of crafts with a small number becoming entrepreneurs Many of the poor made a living as servants and labourers Prostitution flourished in many medieval towns Some women turned to the religious life and here opportunities burgeoned in the thirteenth century The Middle Ages are not remote from the twenty first century the lives of medieval women evoke a response today The medieval mother faced similar problems to her modern counterpart The sheer variety of women s experience in the later Middle Ages is fully brought out in

this book Warfare in Late Byzantium, 1204-1453 Savvas Kyriakidis, 2011-05-23 This book examines Byzantine attitudes towards warfare at a time of crisis when the empire ceased to be a first rate power in the Mediterranean It investigates the correspondence between official rhetoric and propaganda on the one hand and military realities on the other It explores the military ethos of the late Byzantine aristocracy and examines Byzantine perceptions of military leadership in comparison to contemporary western European military thinking The organisation and nature of military operations and the role of the various groups of soldiers are explored to set Byzantine warfare in the wider geographical and cultural context In addition this book provides a comprehensive analysis of the influences other medieval cultures exerted on Byzantine military thought organisation and practice Codex and Context: Reading Old French Verse Narrative in Manuscript, Volume II Keith Busby, 2022-06-08 **The Realm of St Stephen** Pal Engel, Pal Engel, Andrew Ayton, Pál Engel, 2001-02-23 Now recognised as the standard work on the subject Realm of St Stephen is a comprehensive history of medieval Eastern and Central Europe Pal Engel traces the establishment of the medieval kingdom of Hungary from its conquest by the Magyar tribes in 895 until defeat by the Ottomans at the Battle of Mohacs in 1526 He shows the development of the dominant Magyars who upon inheriting an almost empty land absorbed the remaining Slavic peoples into their culture after the original communities had largely disappeared **The Papacy and the Levant, 1204-1571: The thirteenth and fourteenth centuries** Kenneth Meyer Setton, 1976 The first of 4 vols which trace the history of the later Crusades papal relations with the Levant from the accession of Innocent III in 1198 to the reign of Pius V the battle of Lepanto 1566 71 From the mid 14th cent to the conclusion of his work the author has drawn heavily upon unpub materials collected in the course of 17 trips to the Archivio Segreto Vaticano the Archivi di Stato in Venice Mantua Modena Milan Siena Florence the Archives of the Order of the Hospitallers at Malta In addition to a history of the later crusades to the year 1400 the book deals in passing with various items crusading propaganda the postal service of the 14th cent ecclesiastical feudal lawsuits social conditions in papal Avignon even fashions in footwear **Agincourt in Context** Rémy Ambühl, Craig Lambert, 2018-10-05 This book investigates the Battle of Agincourt which continues to be of immense national and international interest as well as the wider conduct and organisation of war in the late Middle Ages In England Shakespeare s Henry V ensured that the battle holds a place in the English national consciousness and through the centuries that followed the story of Henry s famous victory was used to galvanise English national spirit in times of war In France the immediate impact of the battle was that it helped to galvanise French national awareness in response to an external enemy This book showcases new research into Agincourt and the wider issues of military recruitment naval logistics gunpowder and siege warfare and the conduct of war It also takes a wider European perspective on the events of 1415 by including research on Portuguese military organisation at the time of Agincourt This book was originally published as a special issue of the Journal of Medieval History *Plagues, poisons and potions* William G. Naphy, 2021-02-02 Plagues poisons and potions highlights one of the most fascinating aspects of the

history of early modern plague In the sixteenth and seventeenth centuries outbreaks of plague in and around the ancient Duchy of Savoy led to the arrests of many people who were accused of conspiring to spread the disease Those implicated in the conspiracies were usually poor female migrants working in the plague hospitals under the direction of educated professional male barber surgeons These conspirators were subsequently tried for spreading plague among leading and wealthy people from urban areas so that they could rob them while the afflicted homeowners were confined to their beds In order to understand how this phenomenon developed and was regarded at the time this study examines the courts the judiciary and the part played by torture in the trials which frequently concluded with the spectacular and gruesome execution of the suspects The author goes on to consider the socio economic conditions of the workers and in doing so highlights an early modern form of class warfare However what makes this phenomenon especially interesting is that in an age dominated by superstition religious strife and witch hunts the conspiracies were always given a more rational explanation and motivation profit Both teachers and students of early modern history will be fascinated by this enlightening study into the fears of European society the spread of the disease and the judicial procedures of the time *Routledge Revivals: Medieval Italy (2004)*. technologies in the context of the economic and social developments which made them possible He looks at how military engineers obtained their skills and the possible link with scholastic scientific awareness With the increased survival of government records from the middle ages engineers acquire names and individuals can be identified And the fifteenth century the age of polymaths such as Leonardo da Vinci saw a new type of literate military engineer part of a recognized profession but with its roots in a thousand years of historical development PETER PURTON D Phil Oxon FSA has written extensively on medieval fortifications and siege warfare his publications include the comprehensive two volume history of the medieval siege Boydell 2010

Controlling Contagion Sheilagh Ogilvie, 2025-02-18 How human institutions markets states communities religions guilds and families have helped both to control and to exacerbate epidemics throughout history How do societies tackle epidemic disease In *Controlling Contagion* Sheilagh Ogilvie answers this question by exploring seven centuries of pandemics from the Black Death to Covid 19 For most of history infectious diseases have killed many more people than famine or war and in 2019 they still caused one death in four Today we deal with epidemics more successfully than our ancestors managed plague smallpox cholera or influenza But we use many of the same approaches Long before scientific medicine human societies coordinated and innovated in response to biological shocks sometimes well sometimes badly Ogilvie uses historical epidemics to analyse how human societies deal with externalities situations where my action creates costs or benefits for others beyond those that I myself incur Social institutions markets states communities religions guilds and families help us manage the negative externalities of contagion and the positive externalities of social distancing sanitation and immunization Ogilvie shows how each institution enables us to coordinate innovate and inspire each other to limit contagion But each institution also has weaknesses that can make things worse Markets shut down voluntarily during every epidemic in history but they also brought people together spreading contagion States mandated quarantines sanitation and immunization but they also waged war and censored information exacerbating epidemics Religions admonished us to avoid infecting our neighbours but they also preached against science and medical innovations What decided the outcome Ogilvie argues was a temperate state an adaptable market and a strong civil society where a diversity of institutions played to their own strengths and checked each other's flaws

State and Status Samuel Clark, 1995-06-14 Arguing that states emerged in Western Europe as powerful political geographical centres rather than nation states or national states Samuel Clark examines and compares the centres and peripheries of these two large regional zones focusing not only on England and France but also on Wales Scotland Ireland Savoy and the Southern Low Countries This wide ranging and multifaceted work shows how the state shaped the aristocracy and transformed its political economic cultural and status power From a theoretical perspective State and Status is both innovative and significant Clark is the first to link the anti functionalist historical sociology of Western Europe with the functionalist or neofunctionalist tradition in sociology
