**The Greenpeace to Amchitka** Robert Hunter, 2005-04-01 Greenpeace is known around the world for its activism and education surrounding environmental and biodiversity issues With a presence in more than 40 countries across Europe the Americas Asia and the Pacific Greenpeace is undoubtedly a dominant force in the realm of environmental activism This is the story of how Greenpeace came to be In September 1971 a small group of activists boarded a small fishing boat in Vancouver Canada and headed north towards Amchitka a tiny island west of Alaska in the Aleutian Islands where the US government was conducting underground nuclear tests At that time protests against nuclear testing were not common yet the US tests raised genuine concerns Amchitka is not only the last refuge for endangered wildlife but is also located in a geologically unstable region one of the most earthquake prone areas in the world The threat of a nuclear triggered earthquake or tsunami was real Among the people sardined in the fishing boat were Robert Hunter and Robert Keziere The boat named the Greenpeace by the small group of men aboard raced against time as it crashed through the Gulf of Alaska braving the oncoming winter storms Three weeks was all they had to reach Amchitka in an attempt to halt the nuclear test Ultimately the voyage beset by bad weather interpersonal tensions and conflicts with US officials was doomed And yet the legacy of that journey lives on In this visceral memoir based on a manuscript originally written over 30 years ago Robert Hunter vividly depicts the peculiar odyssey that led to the formation of the most powerful environmental organization in the world Features 40 black and white photographs taken during the voyage by Robert Keziere

*The Politics of Sustainability in the Arctic* Ulrik Pram Gad, Jeppe Strandsbjerg, 2018-10-04 *The Politics of Sustainability in the Arctic* argues that sustainability is a political concept because it defines and shapes competing visions of the future In current Arctic affairs prominent stakeholders agree that development needs to be sustainable but there is no agreement over what it is that needs to be sustained In original conservationist discourse the environment was the sole referent object of sustainability however as sustainability discourses have expanded the concept has been linked to an increasing number of

referent objects such as society economy culture and identity This book sets out a theoretical framework for understanding and analysing sustainability as a political concept and provides a comprehensive empirical investigation of Arctic sustainability discourses Presenting a range of case studies from Greenland Norway Canada Russia Iceland and Alaska the chapters in this volume analyse the concept of sustainability and how actors are employing and contesting this concept in specific regions within the Arctic In doing so the book demonstrates how sustainability is being given new meanings in the postcolonial Arctic and what the political implications are for postcoloniality nature and development more broadly Beyond those interested in the Arctic this book will also be of great value to students and scholars of sustainability sustainable development and identity and environmental politics

*European Climate Diplomacy in the USA and China* Katrin Buchmann, 2022-08-22 Buchmann analyses the work of UK German Danish and Swedish embassies in the USA and China on climate change in the late 2000s and early 2010s She relates which coalitions and narratives embassies sought to develop to convince China and the United States that a more progressive climate policy was

possible to achieve gains supporting an agreement under the UNFCCC This book shows that a key interpretation of climate diplomacy was selling trade Europe selling technology solutions to solve climate change In this narrative Europe has already done what needs to be done and outsourcing of production to China e g is ignored In the USA embassies entered coalitions with states faith groups and the military arguing that a more progressive climate policy was mandated by either God or security concerns State politicians including Democrats often actually didn't implement any climate policies Any gains were reversed through climate denial lobbying funded by corporations Embassies did not address this Politics for the Love of Fandom Ashley Hinck,2019-03-13 Politics for the Love of Fandom examines what Ashley Hinck calls fan based citizenship civic action that blends with and arises from participation in fandom and commitment to a fan object Examining cases like Harry Potter fans fighting for fair trade YouTube fans donating money to charity and football fans volunteering to mentor local youth Hinck argues that fan based citizenship has created new civic practices wherein popular culture may play as large a role in generating social action as traditional political institutions such as the Democratic Party or the Catholic Church In an increasingly digital world individuals can easily move among many institutions and groups They can choose from more people and organizations than ever to inspire their civic actions even the fandom for children's book series Harry Potter can become a foundation for involvement in political life and social activism Hinck explores this new kind of engagement and its implications for politics and citizenships through case studies that encompass fandoms for sports YouTube channels movies and even toys She considers the ways in which fan based social engagement arises organically from fan communities seeking to change their world as a group as well as the methods creators use to leverage their fans to take social action The modern shift to networked fluid communities Hinck argues opens up opportunities for public participation that occurs outside of political parties houses of worship and organizations for social action Fan based citizenship performances help us understand the future possibilities of public engagement as fans and creators alike tie the ethical frameworks of fan objects to desired social goal such as volunteering for political candidates mentoring at risk youth and promoting environmentally friendly policy Politics for the Love of Fandom examines the communication at the center of these civic actions exploring how fans nonprofits and media companies manage to connect internet based fandom with public issues **Hitman for the Kindness Club** Captain Paul Watson,2023-07-25 Spanning 1961 to 2022 this electrifying collection of essays captures the spirit mettle and moxie of one of the most intrepid environmentalists of our times Paul Watson developed an enduring passion for the wild as a youngster This zeal propelled him on an uncharted adventure of outward exploration and inner evolution with pivotal turning points bringing him to the realization that his life's mission was to defend the natural world and all its inhabitants Watson takes you along for the ride as he upends the Sierra Club cofounds Greenpeace and eventually establishes Sea Shepherd Conservation Society His courageous often audacious campaigns held on every ocean and every continent are hallmarks of his stalwart defense of Indigenous people marine wildlife and

**Organisation and Complexity** Jacco van Uden, 2004-05 Students of organisation have used complexity theory in many different ways and for many different reasons What characterises the writings of most management thinkers however is that the authors are primarily concerned with the question of how to make this complexity thing work for us This study takes a rather different approach Ideas and concepts of the science of complexity are borrowed to develop the idea that organisations live lives of their own an idea that is very much at odds with the dominant view that understands organisations as tools that we use to realise certain goals To illustrate matters the book discusses the developments of the organisation of Vitesse a mediocre Dutch professional football club that according to its president needed to be transformed into a major player in the family entertainment industry

Contesting the Arctic Philip E. Steinberg, Jeremy Tasch, Hannes Gerhardt, Adam Keul, Elizabeth A. Nyman, 2015-02-16 As climate change makes the Arctic a region of key political interest so questions of sovereignty are once more drawing international attention The promise of new sources of mineral wealth and energy and of new transportation routes has seen countries expand their sovereignty claims Increasingly interested parties from both within and beyond the region including states indigenous groups corporate organizations and NGOs and are pursuing their visions for the Arctic What form of political organization should prevail Contesting the Arctic provides a map of potential governance options for the Arctic and addresses and evaluates the ways in which Arctic stakeholders throughout the region are seeking to pursue them
