The Greens And The Politics Of Transformation:

The Greens and the Politics of Transformation John Rensenbrink, 1992 **The Politics of Transformation** Betty H. Zisk, 1992-10-30 This book is a study of local grassroots activism in two major political areas the peace and environmental movements over a period of five years Interviews with leaders of 166 different groups in five states Massachusetts Maine New Hampshire California and Oregon supplemented by personal observation and participation in several of those groups are the foundations of this analysis The major concerns are the components of group and movement successes both short run and long run and activist group adaptations to change in the larger social and political world in light of political upheaval in Eastern Europe the Gulf War and several environmental crises that occurred during the period in question Finally Zisk focuses on the growing convergence and barriers to convergence of the movements After examining short run accomplishments Zisk concludes that most of the groups in both movements are faring poorly few of their concrete goals are achieved media attention is poor and membership growth is problematic For both movements the transformational wings those that press for basic changes use consensus decision making have few paid staff members are not doing so well as the incremental wings those seeking limited goals using traditional decision techniques employing larger staffs This book should be of interest to students and teachers of political science and sociology Transformational Politics Stephen

Woolpert, Christa Daryl Slaton, Edward W. Schwerin, 1998-08-13 Argues that traditional political science is failing to identify and address fundamental political phenomena of our time and proposes an alternative value based political science

Historical Dictionary of the Green Movement Miranda Schreurs, Elim Papadakis, 2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of *Historical Dictionary of the Green Movement* contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement **The Evolution of Green Politics** Jon Burchell, 2014-04-08 The emergence of Green parties throughout Europe during the 1980s marked the arrival of a new form of political movement and a challenge to existing party

models This work presents an in depth thematic comparative approach to the analysis of recent Green party development and change questioning whether the process of party evolution has resulted in the ideological dilution of Green ideals and objectives With Green parties across Europe experiencing a significant upturn in support in recent years if we are to gain a clearer picture of the impact Green parties should have in the 21st century we need to understand the issues and themes that have shaped their re emergence as a more mature political challenge **Ecological Politics** John Rensenbrink,2016-11-21

Rejection of politics is deep and widespread Even sincere and responsible individuals who practice it hold their nose while doing so Yet politics must be practiced and well if the planet and the people are to survive A clue for our future success as a species lies in the fact that ecology has never really been tried in politics Yet ecology holds the secret of success for planet and people precisely in politics Deep in ecology is the astounding fact scientifically examined and attested to that we are already related Though taught by elite after elite that we are separate from nature and thus from everyone and everything this can now be seen as the great mistake and a perpetuated lie from generation to generation A new ontology of being related is the gateway of consciousness to a new and exciting politics for survival and democracy Waves of transformation lap at barriers in the political sphere But they are repulsed by an entrenched politics rooted not only in the greed and power hunger of a dominant few or in outmoded structures of economic and political power but in the old millennial ontology of being separate Our extraordinary times call for a new political party animated by the ecology of being related It is a party of a different kind one that frees itself from giant worldwide corporations is fully and overtly dedicated to non violence and rooted in the awareness that the people come first This party knows that elections must be fair and equal and must enable undistorted dialogue and that people in government must not only proclaim but practice the principle of being of for and by the people This book challenges The Green Party now on a footing in over 100 countries to be this party of a different kind

Bioregionalism and Global Ethics Richard Evanoff,2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike

anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

Ecological Politics Greta Gaard, 1998 An illuminating account of two interconnected social movements from their grassroots origins in the 1970s to the 1996 Green presidential campaign

The No-nonsense Guide to Green Politics Derek Wall, 2010 Green issues and politics are no longer separate entities and as environmental issues will only become more pertinent in the future it will dominate the political spectrum From climate chaos to consumerism the crisis facing human civilisation is clear Yet the response from politicians at present is still inadequate and environmental activists focus on single campaigns rather than electoral politics The new addition to the No Nonsense Guides measures the rising tide of eco activism and awareness and explains why it heralds a new political era worldwide

Rethinking Green Politics John Barry, 1999-02-22 Winner of the PSA Mackenzie Prize for best politics book of 1999 Rethinking Green Politics offers a wide ranging overview and critical analysis of the theoretical framework that underpins the values principles and concerns of contemporary green politics and the appropriate institutional means for realizing green ends

Realism in Green Politics Helmut Wiesensthal, 1993 This study provides a critique of ecological fundamentalism based on the experience of West German Green politics It proposes structural reforms for achieving sustainable resources in modern societies and advocates political realism as the best way to reconcile social and ecological objects

Green Ethics and Philosophy Julie Newman, 2011-05-03 Green Ethics and Philosophy An A to Z Guide covers the moral relationship between humans and their natural environment specifically targeting the contemporary green movement Since the 1960s green ethics and philosophies have helped give birth to the civil rights feminist and gay rights movements as well as contemporary environmentalism With a primary focus on green environmental ethics this reference work available in both print and electronic formats presents approximately 150 signed entries organized A to Z traversing a wide range of curricular disciplines including philosophy psychology business economics religion and political science A rich blend of topics from the Hannover Principle to green eco feminism responsible eco tourism corporate values and sustainability and more are explained by university professors and scholars all contributing to an outstanding reference mainly for academic and public libraries Vivid photographs searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the Green Society volumes ideal for classroom use as well as for research

The Greens in British Politics James Dennison, 2016-11-18 This book explains how the Greens went from obscurity to England's third largest party in just one year quadrupling their vote share and securing their place in Britain's refigured party system on the way Sophisticated quantitative analyses of the Greens voters and members as well as interviews with all of the leading party insiders are used to explain how internal dynamics changing political opportunities and a forgotten portion of the electorate

resulted in an unprecedented Green Surge that defied decades of British party membership decline and a lack of historic far left electoral success in the UK Not only does James Dennison untangle a fascinating political case study but he also shines a light on how technological attitudinal and demographic changes are reshaping politics and forcing us to question many of our previous assumptions about political parties and how voters choose India, Climate Change, and the Global Commons A. Damodaran, 2024-05-12 This book explores the genesis of the concept of global commons against the backdrop of the global environmental problems of climate change biodiversity conservation desertification and the transboundary movement of hazardous wastes It highlights blockchains and cryptocurrencies and their role in transforming global institutions It delves on the advent of COVID 19 as a global common and the way the pandemic has been handled by the world community The book also explores the way the current geopolitics of the world is contributing to the resolution of the conservation problem associated with global commons **The Politics of the Earth** John S. Dryzek, 2022 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future **Green Politics** Stephen Rainbow, 1993 Green politics looks at contemporary green arguments seeing them as direct descendants of a variety of nineteenth century romantic and utopian movements These put value again in non material aspects of social life and offer a critique of current models of development and growth which rely on a narrow conception of economic factors Rainbow acknowledges that this is a very important philosophical base Nonetheless his response and suggestions for the way forward are pragmatic Rainbow s argument is that the State as well as individuals must take a responsibility for a sustainable future In order to attain this political influence green activists need to adopt achievable and credible strategies for change Green politics is a unique resource it analyses green political movements in New Zealand and internationally it analyses and evaluates current and past green philosophies it offers practical suggestions towards gaining a sustainable future Back cover

Green Politics in Japan Lam Peng-Er, 2005-06-22 An important comparative study of Japanese politics that reveals that green issues have yet to displace the traditional urban politics of post industrial Japan This is unlike the rise of green parties and politics in Europe Unlike Europe it seems that political values in Japan are still informed by the conservative values of hierarchy and deference The Federal Republic of Germany at Fifty Peter H. Merkl, 2016-07-27 Fifty years after the formation of the Federal Republic and a decade after German unification we stand on the cusp of a new century and a new millennium of German history At the same time EMU marks a giant stride towards European integration and the end of the Deutschmark In this book leading international scholars reflect on the dramatic transformations of Germany s past and on Germany s future prospects Post war democratic and economic renewal is set in the context of continuing debates about German identity There are assessments of all major leaders parties and ideologies of the still unfinished agenda of integrating East and West of how the next generation of German leaders will interact with ageing governmental structures of

the Bundesbank and the successes and failures of economic policy the trade unions and the media and of Germany's emerging new role in Europe and the world *The Politics of Actually Existing Unsustainability* John Barry, 2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive *Australian Greens* Stewart Jackson, 2016-02-01 The Australian Greens played a pivotal role after the 2010 federal election It ensured the Gillard minority government went full term and won its first House of Representatives seat But what do we really know about the Greens in Australia Is the party really just an extension of the environment movement or a professional party capable of influencing the major parties This book examines the people who make the party tick Uncover the members and activists of the party The Australian Greens From Activism to Australia's Third Party asks whether the Greens has made the transition from a home for tree huggers and alternative lifestyleers to a party ready to work in Government
