Independent and Supplementary Prescribing Molly Courtenay, Matt Griffiths, 2004-09-02 Prescribing and medicines management is one of the most common interventions in health care delivery and in the future will become part of the role of many thousands of nurses pharmacists and other professions allied to medicine PAMs Independent and Supplementary Prescribing An Essential Guide is the first book of its kind and explores a number of key areas for prescribers including the ethical and legal issues surrounding prescribing the psychology and sociology of prescribing prescribing within a public health context evidence based prescribing prescribing within a team context basic pharmacology monitoring skills and drug calculations Each of these topics is written by a recognised expert in the field and will provide readers with the theoretical underpinning upon which safe and effective prescribing is based This book is essential reading for nurses pharmacists and other professions allied to medicine that will soon have the power to prescribe

Intelligent Drug Prescribing in Psychiatry Peter Tyrer, 2024-09-26 This new book drawing on the author's distinguished career in front line psychiatric practice describes how to bring patient and prescriber together in an active partnership whereby there is better understanding of the positive and negative elements of drug prescription At present there is a gap between expectations with doctors not always able to admit their ignorance of some aspects of drug action and patients kept unaware of these uncertainties Balanced decision making with joint involvement is needed to separate those drugs that are needed regularly to maintain health those that are only needed when required and those that are mere fashion accessories Greater care is needed over the explanation of the first prescription the expected duration of treatment and the plans for eventual withdrawal The consequence of a better partnership will be less over prescribing a reduction of polypharmacy and a lessened need for deprescribing the planned systematic reduction of drug treatment that has got completely out of control Concentrating on routine prescribing for psychiatric and mental health disorders rather than unusual conditions and illustrated with real life anecdotes and case histories this is essential reading for trainee and practising psychiatrists general practitioners and pharmacists
