Justification Ester Herlin-Karnell,2019-04-18 This book explores the implications of freedom as a non domination oriented
view for understanding EU security regulation and its constitutional implications At a time when the European borders are
under pressure and with the refugee and migration crisis which escalated in 2015 the idea of exploring a constitutional
theory for the Area of Freedom Security and Justice AFSJ might seem to be a utopian project This appears especially true in
the light of the increased threat of terrorism in Europe and on a global scale and where the expanding EU security agenda is
often advanced through the administrative law path in contrast to the constitutional trajectory Add to this the prolonged
financial crisis which continues to cast a long shadow on the future development of EU integration and which suggests that
Europe needs to re invent itself beyond the sphere of economics Therefore it is precisely because of the current uncertainties
regarding the progress of the EU and the constitutional law project that a constitutional take on the AFSJ is of particular
importance The book investigates the meaning of non domination and the idea of justice and justification in the area of EU
security regulation In doing so it focuses on the development of an AFSJ what it means and why it represents a fascinating
example of contemporary constitutional law with interacting layers of security regulation human rights law and transnational
legal theory at its core *The Dublin University Magazine* ,1868 *Protection of Foreign Investments in an Intra-EU*
Context Moskván, Dominik,2022-02-04 The Achmea judgment revolutionised intra EU investment protection by declaring

intra EU bilateral investment treaties intra EU BITs incompatible with EU law This incisive book investigates whether intra EU foreign investments benefit from this alteration which discontinued the parallel applicability of intra EU BITs and EU law in the EU internal market In addition to comparative legal analysis from an investor perspective Dominik Moskvan puts forward a proposal for a creation of a permanent intra EU foreign investment court to ensure a balanced economic development of the EU internal market *The European Convention of Human Rights Regime* Dia Anagnostou,2022-10-27 Prompted by an unprecedented rise of litigation since the 1990s this book examines how the European Convention of Human Rights ECHR system and the Strasbourg Court interact with states and non governmental actors to influence domestic change Focusing on European Court of Human Rights litigation and state implementation of judgments related to minority discrimination and asylum migration it argues that a fundamental transformation of the Convention system has been under way Repeat and strategic litigation shifting methods of supervision and state implementation to remedy systemic violations and above all the growing engagement of civil society and non governmental actors have prompted a distinctive trend of human rights experimentalism The emergence of experimentalism has profound implications for the legitimacy effectiveness and further reform of the ECHR system This study provides an original constitutive account of regional human rights regimes and how they are activated by societal actors to claim rights advance case law and pressure for domestic legal and policy change It will be of interest to international law and international relations scholars political scientists specialists on the ECHR the Strasbourg Court as well as to scholars interested in the human rights of immigrants and minorities *An Introduction to Cyberpsychology* Irene Connolly, Marion Palmer, Hannah Barton, Gráinne Kirwan,2016-03-17 An Introduction to Cyberpsychology is the first book to provide a student oriented introduction to this rapidly growing and increasingly studied topic It is designed to encourage students to critically evaluate the psychology of online interactions and to develop appropriate research methodologies to complete their own work in this field The book is comprised of four main sections An overview of cyberpsychology and online research methodologies Social psychology in an online context The practical applications of cyberpsychology The psychological aspects of other technologies Each chapter includes Explanations of key terms and a glossary to facilitate understanding Content summaries to aid student learning Activity boxes discussion questions and recommended reading to guide further study Further resources for students and instructors are available on the book s companion website including audio and video links essay questions a multiple choice test bank and PowerPoint lecture slides Uniquely combining a survey of the field with a focus on the applied areas of psychology the book is designed to be a core text for undergraduate modules in cyberpsychology and the psychology of the internet and a primer for students of postgraduate programs in cyberpsychology **The Journal of the Historical and Archeological Association of Ireland** Anonymous,2023-03-18 Reprint of the original first published in 1872 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve

The European Union seems to have rescued its single currency but it has not yet put an end to the crisis In this major new book a group of fifteen international philosophers economists political scientists sociologists and legal experts compare the economic political constitutional social and cultural interpretations of the European crisis They describe the challenges the EU faces in relation to legitimacy and democracy and address head on the uncertainty over the future of Europe The book considers different possible scenarios from the Union s dissolution with or without the continuation of the integration process to its reinforcement through the building of a political union addressing the challenges of legitimacy democracy and justice Such a strengthened union could mark a new stage for democracy not the democracy of ancient cities and modern states but one convenient to the complex entities neither national nor supra national of which the European Union despite the crisis is still the best modern example
