Melton, 2007-11-01 Mutiny on the Bounty is one of history s greatest naval stories yet few know the similar tale from America s own fledgling navy in the dying days of the Age of Sail a tale of mutiny and death at sea on an American warship In 1842 the brig of war Somers set out on a training cruise for apprentice seamen commanded by rising star Alexander Mackenzie Somers was crammed with teenagers Among them was Acting Midshipman Philip Spencer a disturbed youth and a son of the U S Secretary of War Buying other crew members loyalty with pilfered tobacco and alcohol Spencer dreamed up a scheme to

kill the officers and turn Somers into a pirate ship In the isolated world of a warship a single man can threaten the crew's discipline and the captain's authority But one of Spencer's followers warned Mackenzie who arrested the midshipman and chained him and other ringleaders to the quarterdeck Fearing efforts to rescue the prisoners officers had to stay awake in round the clock watches Steering desperately for land sleep deprived and armed to the teeth battling efforts to liberate Spencer Somers's captain and officers finally faced a fateful choice somehow keep control of the vessel until reaching port still hundreds of miles away or hang the midshipman and his two leading henchmen before the boys could take over the ship The results shook the nation A naval investigation of the affair turned into a court martial and a state trial and led to the founding of the Naval Academy to provide better officers for the still young republic Mackenzie's controversial decision may have inspired Herman Melville's great work *Billy Budd* The story of Somers raises timeless questions still disturbing in twenty first century America the relationship between civil and military law the hazy line between peace and war the battle between individual rights and national security and the ultimate challenge of command at sea The Publishers Weekly, 1986 **Bulletin of Marine Science of the Gulf and Caribbean**, 1991 *Sea Frontiers*, 1987 **Sea Frontiers, Sea Secrets**, 1987 British Naval History Since 1815 Eugene L. Rasor, 1990 A historiographical and bibliographical survey of the published literature of the naval and maritime history of Great Britain in modern times An annotation in narrative form includes evaluation and critical assessments integration of the various interpretations theses approaches and methodologies into the overall literature and suggestions for further research The bibliographical listing includes selected secondary materials official publications dissertations and important articles in Western languages published since 1960 Annotation copyrighted by Book News Inc Portland OR *Nautical Research Journal*, 2006 Rule Britannia! James Taylor, Virginia Museum of Fine Arts, 2007 The British monarchy's abiding connection to the sea during the age of exploration was a critical factor in the establishment of Britain's first colonies in the New World It is unsurprising then that alongside grand portraiture a strong tradition of maritime painting was established in the royal court during the seventeenth century *Rule Britannia* explores the rich artistic culture of Elizabethan and Stuart England and the artists who forged their reputations in the alternately violent and decadent circles of some of the last exponents of absolute monarchy Although trade wars with the Dutch featured large in the period it was to be Dutch and Flemish artists who dominated the artistic landscape Lely van Dyck Rubens Willaerts and the van de Veldes found ample opportunity for patronage from both king and courtiers and some of their finest works are featured here Paintings from the Royal Collection the National Maritime Museum and other private and museum collections in England Ireland and the United States bring alive an era of grandeur in which the first tentative steps of imperial expansion occurred *Ports of the World* Cindy McCreery, 1999 This book showcases some of the finest examples of The National Maritime Museum's collection of prints of ports from this period Prints are analysed as commercial and art objects rather than as simple historical records of matters maritime The aim is to address a broad audience

including general readers of eighteenth and nineteenth century British and colonial history those interested in ports and maritime affairs and those with an interest in prints themselves The eighteenth and nineteenth centuries were a period of enormous political and commercial development across the globe Of particular importance was the revolution in transportation and communication by sea with the concomitant growth in size and importance of the seaport Despite growing awareness that the eighteenth and nineteenth centuries were a formative period in the development of maritime art there has been relatively little exploration of maritime prints This is extraordinary since the period c 1700 1870 was a golden age of print production and saw the development of new forms of engraving such as aquatint and lithography as well as the production of beautiful examples of line engraving and woodcut The eighteenth and nineteenth centuries saw the establishment and expansion of major ports not just in Britain but in continental Europe Africa Asia Australia and in North and South America The National Maritime Museum upon which collection this book is based is at the centre of the preservation and display of Britain's maritime heritage Its print collection reveals the firm link between art and commerce in the development of these ports

In Search of Heritage J. Magnus Fladmark, 1998 This is a series of papers focussing on the subject of heritage management They are from the 1996 international conference to promote exchange amongst policy makers professionals and academics
