The Great American College Tuition Ripoff:

The Great American College Tuition Rip-off Paul Streitz, 2005-03 This book is an examination of why American colleges and universities have extraordinarily high tuitions and why those tuitions grow faster than the rate of inflation It examines Hamilton College showing trends in tuition number of faculty comparison to non elite colleges and other information It examines the role that U S News and World Reports plays in increasing college tuition It determines that college tuitions are not set by the actual costs of running a college rather they are set by how much money an institution can obtain It shows the dramatic increases in the number of faculty administrators and staff It shows the proliferation of courses and extra curricular programs unnecessary for an education The book determines that the financial objective of colleges and universities is to spend as much money as possible with no sense of cost consciousness or the impact of higher tuitions on students The institutions then raise tuition and ask for more money from the alumni Tuitions are not set by costs but by demand It concludes that parents and students must organize into Parent Student Associations and make tuition a matter of collective bargaining

The Great Rip-Off in American Education Mel Scarlett, 2012-04-30 This hard hitting critique will serve as a wake up call to university administrators and faculty as well as to the average parent or prospective college student facing ever increasing tuition costs While reports of poor teaching at the elementary and secondary school level have unleashed widespread public outcry for reform little attention has been paid to the quality of teaching in colleges and universities Yet according to the National Commission on Educating Undergraduates in the Research University universities have too often failed and continue to fail their undergraduate populations and the students paying the tuition get in all too many cases less than their money's worth Citing this report and other similar studies experienced university administrator Dr Mel Scarlett criticizes the deficits of the current undergraduate educational system and suggests improvements that would ensure that college students get the education they're paying for Among his suggestions for reform are Renewed emphasis on teaching skills in Ph D programs to ensure that those who do teach have some pedagogical training besides their special expertise The more active role of experienced professors in the teaching of undergraduates to reverse the current trend of using graduate assistants or part time faculty to teach lower level courses Encouraging students active participation in the learning process as opposed to the passive learning model of the lecture method An adjustment of the university's publish or perish reward system which stresses research and ignores teaching Dr Scarlett lists a total of 20 deadly sins committed by universities against undergraduates and 80 improvements that would help to reform the current inadequate higher educational system

The Great American Rip-Off Susan M. Finley, 2008 This book gives the reader a look at the complicated U S health care system through the eyes of a consumer It explores two key questions Why with all of the resources that have been devoted to solving the health care crisis does the situation continue to deteriorate And what exactly could be done differently this time to turn the situation around The author examines obstacles that have stood in the way of

health care reform in the past including politics government red tape profit driven providers moneyed lobbyists and special interest groups and even our own consumer entitlement mentality and challenges the reader to envision a scenario in which innovation in health care might be possible The author argues that consumers are the key to forward progress on health care we ll only see consumer driven solutions when enough people demand them This book is a challenge to consumers to speak up and hold our leaders in the medical community the government and corporate America accountable for developing solutions that work for us Susan M Finley is a small business owner and marketing strategist She began her career as a bank product manager and in 1994 co founded Michaelson Kelbick Partners Inc MKP a firm specializing in marketing and communications for the financial services industry Over the course of a decade the agency managed marketing communications for some of the largest bank mergers in recent history In 2003 she left MKP now renamed mkp communications inc Her knowledge and understanding of the complicated U S health care financing system comes from a three year research and consulting project started in the hopes of serving as a catalyst for consumer driven changes in health care She lives in North Carolina where she and her husband have recently founded Finley and Finley LLC to continue their research on potential avenues for innovation in the health care and financial services industries

The Great American Jobs Scam Greg LeRoy, 2005-07-21 For the past 20 years corporations have been receiving huge tax breaks and subsidies in the name of jobs jobs jobs But as Greg LeRoy demonstrates in this important new book it s become a costly scam Playing states and communities off against each other in a bidding war for jobs corporations reduce their taxes to next to nothing and win subsidy packages that routinely exceed 100 000 per job But the subsidies come with few strings attached So companies feel free to provide fewer jobs or none at all or even outsource and lay people off They are also free to pay poverty wages without health care or other benefits All too often communities lose twice They lose jobs or gain jobs so low paying they do nothing to help the community and lose revenue due to the huge corporate tax breaks That means fewer resources for maintaining schools public services and infrastructure In the end the local governments that were hoping for economic revitalization are actually worse off They re forced to raise taxes on struggling small businesses and working families or reduce services or both Greg LeRoy uses up to the minute examples naming names including Wal Mart Raytheon Fidelity Bank of America Dell and Boeing to reveal how the process works He shows how carefully corporations orchestrate the bidding wars between states and communities He exposes shadowy site location consultants who play both sides against the middle and he dissects government and corporate mumbo jumbo with plain talk The book concludes by offering common sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off

The Great American Education-Industrial Complex Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the

past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future *The American Review of Reviews* ,1908 *American Journal of Education and College Review* ,1857 Vol 25 is the report of the commissioner of education for 1880 v 29 report for 1877 **The American-Scandinavian review** ,1922 **The American Review of Reviews** Albert Shaw,1928 *The American Journal of Education and College Review* Henry Barnard,1856 *Research Universities and the Public Good* Jason Owen-Smith,2018-09-11 In a political climate that is skeptical of hard to measure outcomes public funding for research universities is under threat But if we scale back support for these institutions we also cut off a key source of value creation in our economy and society Research Universities and the Public Good offers a unique view of how universities work what their purpose is and why they are important Countering recent arguments that we should unbundle or disrupt higher education Jason Owen Smith argues that research universities are valuable gems that deserve support While they are complex and costly their enduring value is threefold they simultaneously act as sources of new knowledge anchors for regional and national communities and hubs that connect disparate parts of society These distinctive features allow them more than any other institution to innovate in response to new problems and opportunities Presenting numerous case studies that show how research universities play these three roles and why they matter this book offers a fresh and stirring defense of the research university **The Modern Review** Ramananda Chatterjee,1912 Includes section Reviews and notices of books *Methodist Magazine and Quarterly Review* ,1867 **American-Scandinavian Review** ,1922 *Bulletin* ,1960 *Bulletin* United States. Office of Education,1911 **American Physical Education Review** ,1922 Includes the proceedings of the association s annual convention **American Monthly Review of Reviews** Albert Shaw,1901 **New England Journal of Education** ,1897 **New England Journal of Education** Thomas Williams Bicknell,Albert Edward Winship,Anson Wood Belding,1901
