urgency for mitigation and adaptation responses that deal with the resulting challenges Theoretical information sits alongside practical design guidelines so architects designers and planners can not only see clearly what problems they face but also find the solutions they need in order to respond to power and water supply needs Considers use of materials structures site issues and planning in order to provide design solutions Examines recent climate events in the US and UK and looks at how architecture was successful or not in preventing building damage Adapting Buildings and Cities for Climate Change is an essential source not just for architects engineers and planners facing the challenges of designing our building for a changing climate but also for everyone involved in their production and use **The Athenaeum**,1903 Bulletin of the Brooklyn Public Library Brooklyn Public Library,1920 "The" Athenaeum James-Silk Buckingham,1841
