Marsh, 2009 This comprehensive new book replaces and substantially expands upon the landmark *Fishes of Arizona* which has been the authoritative source since it was first published in 1973 *Inland Fishes of the Greater Southwest* is a one volume guide to native and non native fishes of the lower Colorado River basin downstream from the Grand Canyon and of the northern tributaries of the Sea of Cortez in the United States and Mexico In all there are in depth accounts of more than 165 species representing 30 families The book is not limited to the fish It provides insights into their aquatic world with information on topography drainage relations climate geology vegetational history aquatic habitats human made water systems and conservation A section of the book is devoted to fish identification with keys to native and non native families as well as family keys to species The book is illustrated with more than 120 black and white illustrations 47 full color plates of native fishes and nearly 40 maps and figures Many native fish species are unique to the Southwest They possess interesting and unusual adaptations to the challenges of the region able to survive silt laden floods as well as extreme water temperatures and highly fluctuating water flows ranging from very low levels to flash floods However in spite of being well adapted many of the fish described here are threatened or endangered often due to the acts of humans who have altered the natural habitat For that reason *Inland Fishes of the Greater Southwest* presents a vast amount of information about the ecological relationships between the fishes it describes and their environments paying particular attention to the ways in which human interactions have modified aquatic ecosystems and to how humans might work to ensure the survival of rapidly disappearing native species      *Interaction and Connectivity in the Greater Southwest* Karen Harry, Barbara J. Roth, 2019-03-21 This volume of proceedings from the fourteenth biennial Southwest Symposium explores different kinds of social interaction that occurred prehistorically across the Southwest The authors use diverse and innovative approaches and

a variety of different data sets to examine the economic social and ideological implications of the different forms of interaction presenting new ways to examine how social interaction and connectivity influenced cultural developments in the Southwest The book observes social interactions role in the diffusion of ideas and material culture the way different social units especially households interacted within and between communities and the importance of interaction and interconnectivity in understanding the archaeology of the Southwest s northern periphery Chapters demonstrate a movement away from strictly economic driven models of social connectivity and interaction and illustrate that members of social groups lived in dynamic situations that did not always have clear cut and unwavering boundaries Social connectivity and interaction were often fluid changing over time Interaction and Connectivity in the Greater Southwest is an impressive collection of established and up and coming Southwestern archaeologists collaborating to strengthen the theoretical underpinnings of the discipline It will be of interest to professional and academic archaeologists as well as researchers with interests in diffusion identity cultural transmission borders large scale interaction or social organization Contributors Richard V N Ahlstrom James R Allison Jean H Ballagh Catherine M Cameron Richard Ciolek Torello John G Douglass Suzanne L Eckert Hayward H Franklin Patricia A Gilman Dennis A Gilpin William M Graves Kelley A Hays Gilpin Lindsay D Johansson Eric Eugene Klucas Phillip O Leckman Myles R Miller Barbara J Mills Matthew A Peeples David A Phillips Jr Katie Richards Heidi Roberts Thomas R Rocek Tammy Stone Richard K Talbot Marc Thompson David T Unruh John A Ware Kristina C Wyckoff

**Cable of Fate: The Zimmermann Affair and The Great Southwestern War of 1917** John Eric Vining, 2016-10-26 On both sides of the turn of the twentieth century there emerged a style of writing that was a distant kin to the modern historical novel It was known as Les Guerres Imaginaires which can basically be translated into The Imaginary War It was a literary device used to tell how future wars might occur and be fought This type of novel was written by military authors who sought to mold and enhance their foresight with intricate historical and political analyses Examples of this genre include The Battle of Dorking a 1871 short story in Blackwood s Magazine by Sir George Tomkyns Chesney The Great Naval War of 1887 written in 1886 by Sir William Laird Clowes and Commander Charles N Robinson The Great War of 189 A Forecast by Rear Admiral Philip Colomb written in 1893 The War Inevitable 1908 by Alan H Burgoyne The Valor of Ignorance 1909 by Homer Lea and two great novels of the 1920s Sea Power in the Pacific 1920 and The Great Pacific War 1925 by Hector Bywater John Eric Vining resurrects a mirror image of this genre to look back into history and explore what might have happened if Mexico had taken Germany s 1917 Zimmermann Telegram seriously and attempted to recapture the American Southwest at the height of World War I While this is fantastically unbelievable at first glance a further analysis is warranted What you might find is that not only was a Mexican invasion of the American Southwest quite possible in 1917 the real surprise is that it did not happen in the actual history of World War I Take the plunge and see for yourself if it might have been possible for the United States and Mexico to have fought the Great Southwestern War of 1917
