Packard,2018-07-19 Skills and Jobs in Brazil An Agenda for Youth is a new report focusing on the challenge of economic engagement among the Brazilian youth In the context of a fast aging population Brazil s greatest economic opportunity is to increase its labor productivity especially that of

youth This report documents important new facts about the extent of the youth economic disengagement while at school and at work Today close to half of the Brazilian youth aged 15 29 years old is not fully economically engaged because they are neither working nor studying are studying in schools of poor quality or are working in informal and precarious jobs The report shows how the youth prospects in the labor market are dimmed by policies favoring existing workers over new entrants in addition it shows how youth are often ill equipped to meet an increasingly challenging labor market The report suggests new education skills and jobs policy changes that Brazil could prioritize moving forward so that it can take advantage of the last wave of its demographic transition The report discusses in particular depth policies aiming to increase learning and reduce school dropouts in upper secondary education and labor market policies that aim to support more effective and faster youth transitions from school to work

**Economic Modeling in the Post Great Recession Era** John E. Silvia, Azhar Iqbal, Sarah Watt House, 2016-12-14 Reality based modeling for today s unique economic recovery Economic Modeling in the Post Great Recession Era presents a more realistic approach to modeling using direct statistical applications to address the characteristics and trends central to current market behaviors This book s unique focus on the reality of today s markets makes it an invaluable resource for students and practitioners seeking a comprehensive guide to more accurate forecasting While most books treat the economy as if it were in a vacuum building models around idealized or perception biased behaviors this book deals with the economy as it currently stands in a state of recovery limited by financial constraints imperfect information and lags and disparities in price movements The authors identify how these characteristics impact various markets behaviors and quantify those behaviors using SAS as the primary statistical tool Today s economy bears a number of unique attributes that usual modeling methods fail to consider This book describes how to approach modeling based on real world observable data in order to make better informed decisions in today s markets Discover the three economic characteristics with the greatest impact on various markets Create economic models that mirror the current post recession reality Adopt statistical methods that identify and adapt to structural breaks and lags Factor real world imperfections into modeling for more accurate forecasting The past few years have shown a clear demarcation between policymakers forecasts and actual outcomes As the dust settles on the Great Recession after effects linger and impact our current recovery in ways that diverge from past experience and theoretical expectations Economic Modeling in the Post Great Recession Era provides comprehensive guidance grounded in reality for today s economic decision makers Seattle Job Bank Bob Adams Publishers, 1998-04
