highlights the eighteenth century as a watershed in the modern history of technology analyzing how scientific developments in physics and chemistry spurred the mechanical innovations of the Industrial Revolution From the steam engine to electrical power to nuclear energy to today s world of electronics and computers this book opens a discussion of how science and technology together change our lives Originally published as *The Norton History of Technology* *Spectacular Flops* Michael Brian Schiffer,2018-12-31 Many technologies begin life as someone s vision of an ambitious perhaps audacious technology that is expected to have a revolutionary impact on consumers whether families companies or societies However if this highly touted technology fails prematurely at some point in its life history it becomes a spectacular flop Employing a behavioral perspective this book presents a sample of twelve spectacular flops encompassing the past three centuries ranging from the world s first automobile to the nuclear powered bomber Because technologies may fail from many different causes spectacular flops pose a special challenge to the author s long term project of furnishing generalizations about technological change Instead of constructing generalizations that apply to all spectacular flops this book provides limited generalizations that pertain to particular groups of technologies bounded by parameters such as long term development projects and one off projects The reader need have no prior familiarity with the technologies because basic principles are introduced as needed *An Empire of Magnetism* Edward J. Gillin,2024 This book offers an in depth global history of the British Magnetic Survey the nineteenth century British government funded efforts to measure and understand the earth s magnetic field These scientific efforts are situated within the context of the development of global science and the ways they intersected with empire and colonialism *Troubled IT Projects* John M. Smith,2001 This book provides systematic guidance on how to avoid the causes of IT project failure at every stage It includes a detailed analysis of the 40 root causes of troubled IT **World Trade Since 1431** Peter J. Hugill,1993 In 1431 the Portuguese navigator Velho set sail into the Atlantic establishing a trade route to the Azores and marking the beginning of commerce with the West as we know it today Equipped with reliable maps and instruments for open ocean navigation and highly sea worthy three masted cannon armed ships Portugal soon dominated the Atlantic trade routes until the diffusion of Portuguese technologies to wealthier polities made Holland the eventual successor owing to its geographic position and its immense commercial fleet **Brunel** R. Angus Buchanan,2006-06-19 **"Death does seem to have all he can attend to"** George A. Hitchcock,2014-03-06 On August 7 1862 George Alfred Hitchcock born in Massachusetts in 1844 was mustered into Company A 21st Massachusetts Infantry From this date until January 1 1865 he kept a meticulous daily diary His first experience in battle was at Fox s Gap on South Mountain and then an attack across Burnside s Bridge at Antietam Then came the disastrous Union advance toward Marye s Heights at Fredericksburg a journey by rail to Paris Kentucky via Pittsburgh Columbus drunken 21st Infantry soldiers in conflict with local security and Cincinnati the protection of the Mount Sterling Kentucky area from guerrillas an expedition from Camp Nelson through the Cumberland Gap to eastern Tennessee Burnside s Knoxville campaign the arduous winter
