proposes that color is a continuum by hosting a virtual tour through reading trips from the equator out in four directions north east west and south narrating all the way describing and interpreting the topography of human color which cascades in all directions Further the writer suggests that no two persons will have the same color tone spread and texture This is equivalent to saying that there is an individual color but there is no group color It is close to saying that color of the skin is like fingerprints each person s being different from the next So the gross color division of black and white may be salvaged only when used for convenience and only for immediate references Any effort to institutionalize and formalize color betrays its natural constitution and thereby compounds the social economic and political problems that it has caused Progressively the book postulates credible concepts that demonstrate grouping people into black and white is arbitrary is subjective and worse in very significant ways is often prodded with intentional and exploitive motives The book invites readers to imagine the reverse of the current world order surrounding the color of skin putting everyone in good view to appreciate what the world might look like if fortunes tagged to color lines were overturned around the world The scenario presented under the section Imagining the Reverse is one of the light parts of the book but at its core the discourse here is indeed about a very serious matter The author observes that the various configurations used to differentiate countries by slicing them into developed and developing and second and third world countries follow skin color contours The issue of skin color is elevated to international levels drawing plausible conclusions that unfortunately the disadvantages of such perspectives outweigh the advantages The perceptions derived from such consensus affect world outlook on a number of issues immigration bilateral and multilateral economic relations and individual country s aspirations to mention a few perhaps rendering faulty designs on a national and international scale The writer takes futuristic perspective touching on global warming never mind the causes for now flagging it as a colossal development that can have an impact on the color of the skin big time In this vein the author surmises that global warming is likely to relentlessly rub against the human skin turning lighter skin to dull Brown may be the universal color of the future The principal motivation of going the distance the book has stretched to pursuing the issue of skin color is to ameliorate the stark differences biases and prejudices that old positions have unabatedly generated for a long time both in specific countries and worldwide Accordingly a few indicators that are considered to be harbingers of a friendlier cohesive fair peaceful and prosperous world have been identified The layout of the preferences to achieve a new positive and more functional world order leans on cooperation understanding collaboration and peace all demands of global realities of today and tomorrow The discussions that close the book in addition to heralding where the author is going with the stretch of ideas on color of skin demonstrate that integration the impetus for the book is a two way traffic and cannot happen without all parties involved being intentional and prepared to change Often life is about overcoming differences and savoring similarities Where there are differences changes and adaptations are required The section on integration demonstrates this phenomenon Tangentially the book also offers unassuming proposition for peace between Israel and

Palestine and a point of view for restructuring the US refugee program *Skin* Rick Dallison,2016-12-13 A deadly virus spares only those of fairest skin but humanity's fate rests in the hands of one black man In 2019 attempts upon his life force controversial author and historian Professor Walter Banga to flee to Africa to hide amongst his distant relatives the Mbuti pygmies There he is drawn into their desperate life and death struggle to survive While hiding from a brutal Interhamwe militia they unknowingly unleash a lethal unstoppable virus upon humanity Among a handful of survivors transported to CDC in Atlanta Banga watches as the world around him falls into panic and chaos Fearing for their lives he and eleven other survivors escape to the wilderness hiding from a strange new world Ruthlessly sought by white zealots as the survivors are forced to make their final stand the outcome of which will change mankind forever **The wild ass' skin. The chouans, and other stories--[v.2] The country doctor. The quest of the absolute, and other stories** Honoré de Balzac,1899
