The Oxford Handbook of African Archaeology Peter Mitchell, Paul Lane, 2013-07-04 Africa has the longest and arguably the most diverse archaeological record of any of the continents It is where the human lineage first evolved and from where Homo sapiens spread across the rest of the world Later it witnessed novel experiments in food production and unique trajectories to urbanism and the organisation of large communities that were not always structured along strictly hierarchical lines Millennia of engagement with societies in other parts of the world confirm Africa's active participation in the construction of the modern world while the richness of its history ethnography and linguistics provide unusually powerful opportunities for constructing interdisciplinary narratives of Africa's past This Handbook provides a comprehensive and up to date synthesis of African archaeology covering the entirety of the continent's past from the beginnings of human evolution to the archaeological legacy of European colonialism As well as covering almost all periods and regions of the continent it includes a mixture of key methodological and theoretical issues and debates and situates the subject's contemporary practice within the discipline's history and the infrastructural challenges now facing its practitioners Bringing together essays on all these themes from over seventy contributors many of them living and working in Africa it offers a highly accessible contemporary account of the subject for use by scholars and students of not only archaeology but also history anthropology and other disciplines

Ban Chiang, a Prehistoric Village Site in Northeast Thailand, Volume 1 Michael Pietrusewsky, Michele Toomay Douglas, 2002 The inaugural volume in the Thai Archaeology Monograph Series describes in detail the human skeletal remains from Ban Chiang in northeast Thailand The skeletal material spans a period from 2100 B C to A D 200 and includes premetal Bronze Age and Iron Age deposits from a series of prehistoric societies The history of Homo sapiens in Asia has long been a topic of interest among scholars investigating human biology This study which is based on one of the larger comprehensively analyzed skeletal series ever excavated in the region makes fundamental contributions to understanding human settlement in eastern Asia The volume includes detailed summaries of metric and nonmetric variation recorded in teeth skulls and the rest of the skeleton and evidence of disease of the Ban Chiang people These data

are used to examine a number of questions Where did the people of Ban Chiang come from Did more intensified agriculture influence the health of the people How do the people of Ban Chiang compare to the inhabitants of other ancient sites in Thailand and to the modern peoples of Thailand and neighboring regions Contrary to other groups experiencing similar transitions elsewhere in the world no clear evidence for a decline in health over time is noted in the Ban Chiang skeletal series suggesting continuity in a broad based subsistence strategy even in the face of intensifying agriculture The skeletal evidence further suggests a rigorous physical lifestyle with little evidence for infectious disease or interpersonal violence Content of this book s CD ROM may be found online at this location <http://core.tdar.org/project/376534> Thai Archaeology Monograph Series Joyce C White Series Editor University Museum Monograph 111 *The Arctic* Jack D. Ives, Roger G. Barry, 2019-09-18 Originally published in 2000 The Arctic provides a comprehensive overview of the region s rapidly changing physical and human dimensions and demonstrates the importance of communication between natural scientists social scientists and local stakeholders in response to the tremendous challenges and opportunities facing the Arctic It is an essential resource for all Arctic researchers particularly those developing multidisciplinary projects It provides an overview of key areas of Arctic research by renowned specialists in the field and each chapter forms a detailed varied and accessible account of current knowledge Each author introduces the subject to a specialist readership while retaining intellectual integrity and relevance for specialists Overall the richness of the material presented in this volume reflects the ecological and cultural diversity of this vast and environmentally critical part of the globe **Archaeological Science** Michael P. Richards, Kate Britton, 2020-01-16 An accessible and wide ranging introduction to the exciting and expanding field of archaeological science for students professionals and academics *The Peopling of East Asia* Roger Blench, Laurent Sagart, Alicia Sanchez-Mazas, 2005-03-20 Recent findings in the fields of East Asian archaeology linguistics and genetics are collected together here making this an ideal reference tool for scholars in all disciplines working on the reconstruction of the East Asian past The Comparative Approach in Evolutionary Anthropology and Biology Charles L. Nunn, 2011-07-05 Comparison is fundamental to evolutionary anthropology When scientists study chimpanzee cognition for example they compare chimp performance on cognitive tasks to the performance of human children on the same tasks And when new fossils are found such as those of the tiny humans of Flores scientists compare these remains to other fossils and contemporary humans Comparison provides a way to draw general inferences about the evolution of traits and therefore has long been the cornerstone of efforts to understand biological and cultural diversity Individual studies of fossilized remains living species or human populations are the essential units of analysis in a comparative study bringing these elements into a broader comparative framework allows the puzzle pieces to fall into place creating a means of testing adaptive hypotheses and generating new ones With this book Charles L Nunn intends to ensure that evolutionary anthropologists and organismal biologists have the tools to realize the potential of comparative research Nunn provides a wide ranging investigation of the

comparative foundations of evolutionary anthropology in past and present research including studies of animal behavior biodiversity linguistic evolution allometry and cross cultural variation He also points the way to the future exploring the new phylogeny based comparative approaches and offering a how to manual for scientists who wish to incorporate these new methods into their research
