Money for Nothing Sir Pelham Grenville Wodehouse, 1952-01-01 The picturesque village of Rudge in the Vale dozed in the summer sunshine Along its narrow High Street the only signs of life visible were a cat stropping its backbone against the Jubilee Watering Trough some flies doing deep breathing exercises on the hot window sills and a little group of serious thinkers who propped up against the wall of the Carmody Arms were waiting for that establishment to open At no time is there ever much doing in Rudge's main thoroughfare but the hour at which a stranger entering it is least likely to suffer the illusion that he has strayed into Broadway Piccadilly or the Rue de Rivoli is at two o clock on a warm afternoon in July You will find Rudge in the Vale if you search carefully in that pleasant section of rural England where the gray stone of Gloucestershire gives place to Worcestershire's old red brick Quiet in fact almost unconscious it nestles beside the tiny river Skirme and lets the world go by somnolently content with its Norman church its eleven public houses its Pop to quote the Automobile Guide of 3 541 and its only effort in the direction of modern progress the emporium of Chas Bywater Chemist Chas Bywater is a live wire He takes no afternoon siesta but works while others sleep Rudge as a whole is inclined after luncheon to go into the back room put a handkerchief over its face and take things easy for a bit But not Chas Bywater At the moment at which this story begins he was all bustle and activity and had just finished selling to Colonel Meredith Wyvern a bottle of Brophy's Paramount Elixir said to be good for gnat bites Having concluded his purchase Colonel Wyvern would have preferred to leave but Mr Bywater was a man who liked to sweeten trade with pleasant conversation Moreover this was the first time the Colonel had been inside his shop since that sensational affair up at the Hall two weeks ago and Chas Bywater who held the unofficial position of chief gossip monger to the village was aching to get to the bottom of that With the bare outline of the story he was of course familiar Rudge Hall seat of the Carmody family for so many generations contained in its fine old park a number of trees which had been planted somewhere about the reign of Queen Elizabeth This meant that every now and then one of them would be found to have become a wobbly menace to the passer by so that experts had to be sent for to reduce it with a charge of dynamite to a harmless stump Well two weeks ago it seems they had blown up one of the Hall's Elizabethan oaks and as near as a toucher Rudge learned had blown up Colonel Wyvern and Mr Carmody with it The two friends had come walking by just as the expert set fire to the train and had had a very narrow escape Thus far the story was common property in the village and had been discussed nightly in the eleven tap rooms of its eleven public houses But Chas Bywater with his trained nose for news and that sixth sense which had so often enabled him to ferret out the story

behind the story when things happen in the upper world of the nobility and gentry could not help feeling that there was more in it than this He decided to give his customer the opportunity of confiding in him Observations to Determine the Amount of Atmospherical Refraction at Port Bowen in the Years 1824-25 Sir William Edward Parry, 1826 Archaeoastronomy: The <u>Pre-Columbian Astronomy of the Americas</u> Pasquale De Marco, 2025-07-25 Archaeoastronmy The Pre Columbian Astronomy of the Americas is a comprehensive guide to the astronomical knowledge and practices of the ancient civilizations of the Americas Drawing on the latest archaeological and anthropological research this book explores the origins and development of pre Columbianastronomie from the earliest civilizations to the arrival of Europeans Inside this book you will discover The origins and early development of astronomyn the Americas The role of astronomyn pre Columbian societies The importance of celestial alignments in religious and cultural practices. Visions of the Tallgrass James P. Ronda, 2018-09-13 In centuries long past a vast swath of grassland swept down the center of North America from Canada's Prairie Provinces to central Texas This once plentiful prairie has now all but disappeared Humans have grazed mowed and plowed the plains dammed the rivers and imposed their will on the land and its creatures Fortunately some remnants have survived including the Joseph H Williams Tallgrass Prairie Preserve in northeastern Oklahoma In this visually stunning volume wildlife photographer Harvey Payne and historian James P Ronda offer an intimate look at and into one of America's Last Great Places Spanning nearly 40 000 acres in Oklahoma's Osage County the Preserve is a living witness to a world that once existed But the Osage prairie is not a museum or theme park and it is not frozen in time Under the stewardship of The Nature Conservancy which has overseen its restoration the Preserve lives on as a fully functioning ecosystem And for twenty five years Payne and Ronda have explored these lands together and in solitude Rendered here in brilliant color and paired with Ronda's informative yet deeply personal commentary Payne's photographs open our eyes to the ever changing world of the Tallgrass Preserve In chapters focused on grass sky birds bison and fire Ronda and Payne reveal that the Big Empty is in fact teeming with life Through interwoven images and words Visions of the Tallgrass shows that our nation's grasslands are sacred ground a priceless piece of our American past and
