Leone, 2011-05-27 The book contains collective memoirs about family traditions memories travel stories and special Italian American memories It is a keepsake for future generations Also the book shows the ways in which we remain connected to our Italian traditions and memories

Slices of Life from Wisconsin H. G. Zahn and Friends, 2007-11-01 My Creative Mind came to me while driving around Wausau one day and wondering where it all came from and where will it go like great mysteries in life I shall never know At that point I got off the road before I had an accident I pulled in the parking lot of Pick N Save on Bridge St and started writing By that time I always had pen and paper with me My memory isn't that good This poem also won an Editor's Choice Award from Poetry Com Aunt Laura's Wine Cellar also won Editor's Choice from Poetry com I started writing this one about an upcoming family reunion and it just sort of became Aunt Laura's There really was an Aunt Laura and yes she really did have a wine cellar This is one of those things that became a part of our family's history I shared it at the reunion and it

brought back a lot of great memories It also seems I wasn't the only one to find an excuse to go downstairs to get something for Aunt Laura Of course she knew what we were up to but we think she was flattered by the attention too Then there was cousin Karen who said hey wait a minute guys I was never in Aunt Laura's wine cellar where was it Well sorry Karen It seems you were the only one never in it Geeze that's really too bad Aunt Laura has been passed on for some time now but oh what memories she left us with Thank you Aunt Laura I was getting to know more about Ginger Hartman and realized how much she had endured in life and yet survived My first poem was basically a response to her poems and life and to prove that hey I can write one too Well I did and haven't stopped Perhaps I never will The first poem was entitled How the Hell Did You Do It It's a bit of an unusual name but the words bare out an explanation I wrote a few more about her about her and me about myself and then about many other people places and things Without her poems I never would have tried to write even one I owe my creative endeavors to Ginger and shall be forever grateful for her inspiration support and encouragement You never know what life will send your way but when it does just grab on with both hands and let life happen

Matlin, 2022-05-10 A close look at Gnter Blobel's transformative contributions to molecular cell biology The difficulty of reconciling chemical mechanisms with the functions of whole living systems has plagued biologists since the development of cell theory in the nineteenth century As Karl S Matlin argues in Crossing the

Boundaries of Life it is no coincidence that this longstanding knot of scientific inquiry was loosened most meaningfully by the work of a cell biologist the Nobel laureate G nter Blobel In 1975 using an experimental setup that did not contain any cells at all Blobel was able to target newly made proteins to cell membrane vesicles enabling him to theorize how proteins in the cell distribute spatially an idea he called the signal hypothesis Over the next twenty years Blobel and other scientists were able to dissect this mechanism into its precise molecular details For elaborating his signal concept into a process he termed membrane topogenesis the idea that each protein in the cell is synthesized with an address that directs the protein to its correct destination within the cell Blobel was awarded the Nobel Prize in Physiology or Medicine in 1999 Matlin argues that Blobel s investigative strategy and its subsequent application addressed a fundamental unresolved dilemma that had bedeviled biology from its very beginning the relationship between structure and function allowing biology to achieve mechanistic molecular explanations of biological phenomena Crossing the Boundaries of Life thus uses Blobel s research and life story to shed light on the importance of cell biology for twentieth century science illustrating how it propelled the development of adjacent disciplines like biochemistry and molecular biology
