A few years after his release from a North Vietnamese prisoner of war camp in 1973 Colonel Joseph Kittinger retired from the Air Force Restless and unchallenged he turned to ballooning a lifelong passion as well as a constant diversion for his imagination during his imprisonment His primary goal was a solitary circumnavigation of the globe and in its pursuit he set several ballooning distance records including the first solo crossing of the Atlantic in 1984 But the aeronautical feats that first made him an American hero had occurred a quarter of a century earlier By the time Kitting

*The Stargazer's Companion* James K. Blum,1990-09 A guidebook to the night sky with photographs historical notes and practical information on stargazing      [The Roswell Report](#) James McAndrew,1997

In July 1994 at the request of the Government Accounting Office the U S Air Force completed a thousand page report to explain the events that transpired in and near Roswell in the summer of 1947 The Roswell Report Case Closed is the follow up to that report and contains additional materials and analysis intended to reach a complete open and final explanation of the events that occurred in the Southwest many years ago While this explanation may not be as titillating as tales of unearthly craft and creatures it is a fascinating story nonetheless      *Stratonauts* Manfred "Dutch" von Ehrenfried,2013-12-13

Just what does it take to be a stratonaut soaring to higher and higher altitudes of Earth s atmosphere Brave men and women have reached extreme heights in balloons aircraft and rocket ships over the past two centuries from the first untethered balloon flight to the first flights in the newly defined stratosphere through to the present flights that continue to set new records This book defines the altitudes related to the stratosphere how it changes with latitude and the effects on ascending aviators Also described is how over time technology enabled aircraft and balloons to achieve higher altitudes The book shows the clear influence of the military on designs that initially focused on speed and maneuverability but only later on reaching new altitudes The early flights into the troposphere and eventually the mid to upper reaches of the stratosphere are chronicled with great emphasis on flight operations This includes decompression bailouts inertia coupling ejections catastrophic disintegration crashes and deaths Although the book highlights major altitude attempts and records it also focuses on the life threatening problems confronting the would be stratonaut and the causes of many of their deaths In doing so it tries to define just what it takes to be a stratonaut      **From Casual Stargazer to Amateur Astronomer** Dave Eagle,2013-10-16

The beginning astronomical observer passes through a series of stages The initial stage is hugely exciting and gives the beginner a real buzz as he discovers some of the faint fuzzy objects markings on the planets rings around Saturn and the craters on the Moon But as the novice observer progresses he or she wants to know what more there is than looking at faint fuzzy blobs or indistinct planet

markings Many jump to the conclusion wrongly that they need to spend lots of money on expensive equipment to progress From Casual Stargazer to Amateur Astronomer has been written specifically to address this group of budding stargazers Astronomy is much more than a quick sightseeing tour Patient observers who can develop their skills will start to appreciate what they are seeing and will know exactly what to look out for on any particular night And equally important they will learn what not to expect to see From Casual Stargazer to Amateur Astronomer is for those who want to develop observing skills beyond mere sightseeing and learn some of the techniques used to carry out enjoyable and scientifically useful observations It will also direct readers to make informed choices about what can be seen and when This book is for anyone keen to develop their skills as an amateur astronomer Benjamin Banneker Rose Blue,Corinne J. Kennedy,2007 Project Manhigh took humans to the threshold of space using balloons In the 1950s a small band of Air Force doctors were on the cutting edge of the United States space research programs Working at the Aeromedical Field Laboratory at Holloman Air Force Base in southern New Mexico they used balloons to carry laboratory animals followed by human pilots above 99% of the atmosphere Drawing upon flight reports and technical data this book documents Project Manhigh and the high altitude flights that preceded it The Manhigh flights were in many ways prototypes for future space missions On each of the three flights the Air Force placed a lone pilot in a sealed capsule nineteen miles above the ground At such extreme altitudes the pilots were well within the functional equivalent of outer space and needed the sealed capsule to survive Manhigh existed prior to the creation of NASA and helped pave the way for human space exploration *The Roswell Report* United States Air Force,2013-04-10 Throughout the twentieth century and into the twenty first the subject of unidentified flying objects UFOs has evoked strong opinions and emotions For some the belief in or study of UFOs known as ufology has taken on the dimensions of a religious quest Others remain nonbelievers or at least skeptical of the existence of alien beings and elusive vehicles which never quite seem to manifest themselves Regardless of one s conviction nowhere has the debate about UFOs been more spirited than over the events that unfolded near the small New Mexico city of Roswell in the summer of 1947 Numerous witnesses including former military personnel and respectable members of the local community have come forward with tales of humanoid beings alien technologies and government cover ups that have caused even the most skeptical observers to pause and take notice In July 1994 at the request of the Government Accounting Office the U S Air Force completed a thousand page report to explain the events that transpired in and near Roswell in the summer of 1947 That report sought to bring all the facts to light declassify all the documents and present the definitive truth to the public The Roswell Report Case Closed is the follow up to that report and contains additional materials and analysis intended to reach a complete open and final explanation of the events that occurred in the Southwest many years ago While this explanation may

not be as titillating as tales of unearthly craft and creatures it is a fascinating story nonetheless *Star Myths of the Greeks and Romans* Theony Condos,1997-01-01 This A to Z reference offers in depth information on the history and mythologies of the forty eight classical constellations with excerpts from ancient texts The nightly appearance of the stars their arrangement in the sky their regular risings and settings through the course of the year have been a source of endless wonder and speculation But where did the constellations come from and what are the myths associated with them *Star Myths of the Greeks and Romans* puts the answers at your fingertips Included in this handbook are the only surviving works on the constellation myths that have come down to us from antiquity an epitome of *The Constellations of Eratosthenes* never before translated into English and *The Poetic Astronomy of Hyginus* Also provided are accurate and detailed commentaries on each constellation myth and complete references for those who wish to dig deeper This book is a comprehensive sourcework for anyone interested in astronomy or mythology and an ideal resource for the occasional stargazer **Best STEM Resources for NextGen Scientists** Jennifer L.
