Hines's firsthand experience working with Drexler *Architecture and Design at the Museum of Modern Art* analyzes how MoMA became a touchstone for the practice and study of midcentury architecture **Makers of 20th-Century Modern**

Terms of Appropriation Amanda Reeser Lawrence, Ana Miljački, 2017-12-06 This collection focuses on how architectural material is transformed, revised, swallowed whole, plagiarized or in any other way appropriated. It charts new territory within this still unexplored yet highly topical area of study by establishing a shared vocabulary with which to discuss or contest the workings of appropriation as a vital and progressive aspect of architectural discourse. Written by a group of rising scholars in the field of architectural history and criticism, the chapters cover a range of architectural subjects that are linked in their investigations of how architects engage with their predecessors.

Global Perspectives on Critical Architecture Gevork Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice, it appears that architecture is deeply in crisis. New design and production techniques, together with the globalization of capital and even skilled labour, have reduced architecture to a commodified object, its aesthetic qualities tapping into the current pervasive desire for the spectacular. These developments have changed the architect's role in the design and production processes of architecture. Moreover, critical architectural theories, including those of Breton, Heidegger and Benjamin, which explored the concepts of technology, modernism, labour and capital, and how technology informed the cultural, along with later theories from the 1960s which focused more on the architect's theorization of his/her own design strategies, seem increasingly irrelevant. In an age of digital reproduction and commodification, these theoretical approaches need to be reassessed. Bringing together essays and interviews from leading scholars such as Kenneth Frampton, Peggy Deamer, Bernard Tschumi, Donald Kunze and Marco Biraghi, this volume investigates and critically addresses various dimensions of the present crisis of architecture. It poses questions such as: Is architecture a conservative cultural product servicing a given producer-consumer system? Should architecture's affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm? Is architecture's infusion into the cultural the reason for the visibility of architecture today? What room does the city leave for architecture beyond the present delirium of spectacle? Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism? Or alternatively, putting the notion of criticality aside, is it enough to confine criticism to the production of insightful and pleasurable texts?

Modern Women: Women Artists at The Museum of Modern Art Alexandra Schwartz, 2010 This text examines the collection of feminist art in the Museum of Modern Art. It features essays presenting a range of generational and cultural perspectives.

The Architect Spiro Kostof, 2000 The Architect traces the role of the profession across the centuries and in different cultures, showing the architect both as designer and as mediator between the client and the builder.

Architecture of the Early Twenty-first Century: A Global Need for Sustainability Shirley Montgomery, 2013-01-30 This book is about the global need for sustainable building. The number of people on earth and their use of the resources of the planet for energy make it necessary to build differently. The planet is showing serious signs of stress.
