Tiger Bone & Rhino Horn Richard Ellis, 2013-02-22 In parts of Korea and China moon bears black but for the crescent shaped patch of white on their chests are captured in the wild and brought to bear farms where they are imprisoned in squeeze cages and a steel catheter is inserted into their gall bladders The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns The bear may live as long as fifteen years in this state Rhinos are being illegally poached for their horns as are tigers for their bones thought to improve virility Booming economies and growing wealth in parts of Asia are increasing demand for these precious medicinals Already endangered species are being sacrificed for temporary treatments for nausea and erectile dysfunction Richard Ellis one of the world s foremost experts in wildlife extinction brings his alarm to the pages of Tiger Bone Rhino Horn in the hope that through an exposure of

this drug trade something can be done to save the animals most direly threatened Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia and poaching is increasing at an alarming rate Most of traditional Chinese medicine relies on herbs and other plants and is not a cause for concern Ellis illuminates those aspects of traditional medicine but as wildlife habitats are shrinking for the hunted large species the situation is becoming ever more critical One hundred years ago there were probably 100 000 tigers in India South China Sumatra Bali Java and the Russian Far East The South Chinese Caspian Balinese and Javan species are extinct There are now fewer than 5 000 tigers in all of India and the numbers are dropping fast There are five species of rhinoceros three in Asia and two in Africa and all have been hunted to near extinction so their horns can be ground into powder not for aphrodisiacs as commonly thought but for ailments ranging from arthritis to depression In 1930 there were 80 000 black rhinos in Africa Now there are fewer than 2 500 Tigers bears and rhinos are not the only animals pursued for the sake of alleviating human ills the list includes musk deer sharks saiga antelope seahorses porcupines monkeys beavers and sea lions but the dwindling numbers of those rare species call us to attention Ellis tells us what has been done successfully and contemplates what can and must be done to save these animals or sadly our children will witness the extinction of tigers rhinos and moon bears in their lifetime

Wildlife Resources Harald H. Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their

social function and the indirect economic benefits which can be derived from them has developed. Thus as regards these traditional resources multi use concepts comprising economically oriented utilisation as well as recreational educational and social use have become widely accepted. Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining economic development all over the world. Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries. This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987.

Deadly Medicine Peter C. Mancall, 2018-07-05 An important work of scholarship with powerful concise and objective insights into the complicated history of alcohol use among Native American peoples. Impeccably researched cogently argued and clearly written Peter Mancall's book is both an eye opener for the lay reader and an invaluable resource for the expert. Michael Dorris author of *The Broken Cord A Family's Ongoing Struggle with Fetal Alcohol Syndrome*. Alcohol abuse has killed and impoverished American Indians since the seventeenth century when European settlers began trading rum for furs. In the first book to probe the origins of this ongoing social crisis Peter C. Mancall explores the liquor trade's devastating impact on the Indian communities of colonial America. Mancall recounts how English settlers quickly found a market for alcohol among the Indians and traffic in rum became a prominent source of revenue for the British Empire. In spite of the colonists growing awareness that some Indians abused alcohol and that drinking threatened the stability of countless Indian villages already decimated by European diseases they expanded the liquor trade into virtually every Indian community from the Atlantic to the Mississippi. In response Indians created one of the most important temperance movements in American history a movement that was nevertheless unable to halt the lucrative commerce. The author follows the trail of rum from the West Indian producers to the colonial distributors and on to the Indian consumers in the eastern woodlands. To discover why Indians participated in the trade and why they experienced such a powerful desire for alcohol he addresses current medical views on alcoholism and reexamines the colonial era as a time when Indians were forming new strategies for survival in a world that had been radically changed. Finally Mancall compares Indian drinking in New France and New Spain with that in the British colonies. Forever shattering the stereotype of the drunken Indian Mancall offers a powerful indictment of English participation in the liquor trade and a new awareness of the trade's tragic cost for the American Indians.

'How Best Do We Survive?' Kenneth McPherson,2012-12-06 This book traces the social and political history of the Muslims of south India from the later nineteenth century to Independence in 1947 and the contours that followed It describes a community in search of political survival amidst an ever changing climate and the fluctuating fortunes it had in dealing with the rise of Indian nationalism the local political nuances of that rise and its own changing position as part of the wider Muslim community in India The book argues that Partition and the foundation of Pakistan in 1947 were neither the goal nor the necessarily inescapable result of the growth of communal politics and sentiment and analyses the post 1947 constructions of events leading to Partition Neither the fact of Muslim communalism per se before 1947 nor the existence of separate Muslim electorates provide an explanation for Pakistan The book advances the theory that micro level studies of the operation of the former and the defence of the latter in British India can lead to a better understanding of the origins of communalism The book makes an important contribution to understanding and dealing with the complexities of communalism be it Hindu Muslim or Christian and its often tragic consequences

Wildlife Production Systems Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role
