George-Kanentiio, Ka-Hon-Hes, 1998 Presents illustrated retellings of nine ancient stories of the Iroquois peoples *The Great Law and the Longhouse* William Nelson Fenton, 1998 The Great Law a living tradition among the conservative Iroquois is sustained by celebrating the condolence ceremony when they mourn a dead chief and install his successor for life on good behavior This ritual act reaching back to the dawn of history maintains the League of the Iroquois the legendary form of government that gave way over time to the Iroquois Confederacy Fenton verifies historical accounts from his own long experience of Iroquois society so that his political ethnography extends into the twentieth century as he considers in detail the relationship between customs and events His main argument is the remarkable continuity of Iroquois political tradition in the face of military defeat depopulation territorial loss and acculturation to European technology *The Ojibwa Woman* Ruth Landes, 1997-01-01 In the 1930s young anthropologist Ruth Landes crafted this startlingly intimate glimpse into the lives of Ojibwa women a richly textured ethnography widely recognized as a classic study of gender relations in a native society Sexuality and violence marital rights and responsibilities and more are thoughtfully examined Landes s pioneering work continues to inspire lively debate today Seneca myths and folk tales Arthur C. scientists and water management experts this volume provides an overview of key water management challenges specific to Indigenous peoples proposes possible policy solutions both at the international and national levels and outlines culturally relevant tools for assessing vulnerability and building capacity In recent decades global climate change particularly drought has brought about additional water management challenges especially in drought prone regions where increasing average temperatures and diminishing precipitation are leading to water crises Because their livelihoods are often dependent on the land and water Indigenous groups native to those regions have direct insights into the localized impacts of global environmental change and are increasingly developing their own adaptation and mitigation strategies and solutions based on local Indigenous knowledge IK Many Indigenous groups around the globe are also faced with mounting pressure from extractive industries like mining and forestry which further threaten their water resources The various cases presented in Indigenous Water and Drought Management in a Changing World provide much needed insights into the particular issues faced by Indigenous peoples in preserving their water resources as well as actionable information that can inform future scientific research and policymaking aimed at developing more integrated region specific and culturally relevant solutions to these critical challenges Includes diverse case studies from around the world Provides cutting edge perspectives about Indigenous peoples water management issues and IK based solutions Presents maps for most case studies along with a summary box to conclude each chapter

Native American Literature: A Very Short Introduction Sean Teuton, 2017-12-20 North American indigenous literature began over thirty thousand years ago when indigenous people began telling stories of emergence and creation journey and quest and heroism and trickery By setting indigenous literature in historical moments Sean Teuton skillfully traces its evolution from the ancient role of bringing rain and healing the body to its later purpose in resisting European invasion and colonization into its current place as a world literature that confronts dominance while celebrating the

imagination and resilience of indigenous lives By the time Europeans arrived in North America indigenous people already understood the power of written language and the need to transmit philosophy history and literature across generations and peoples Seeking out multiple literary forms such as sermon poetry and novel to serve differing worldviews indigenous authors have shaped their writing into North American indigenous literature as we recognize it today In this lucid narrative Sean Teuton leads readers into indigenous worlds He describes the invention of a written indigenous language the first indigenous language newspaper and the literary occupation of Alcatraz Island Along the way readers encounter the diversity of indigenous peoples who owing to their differing lands livelihoods and customs molded literature to a nation's specific needs As Teuton shows indigenous literature is one of the best places for understanding indigenous views about land and society and the role of humanity in the cosmos In turning to celebrated contemporary authors such as Thomas King Leslie Silko Sherman Alexie Louise Erdrich and James Welch Teuton demonstrates that like indigenous people indigenous literature continues to survive because it adapts both honoring the past and reaching for the future

Indigenous Intergenerational Resilience Lewis Williams, 2021-11-04 This book argues that there is a need to develop greater indigenous led intergenerational resilience in order to meet the challenges posed by contemporary crises of climate change cultural clashes and adversity In today's media the climate crisis is kept largely separate and distinct from the violent cultural clashes unfolding on the grounds of religion and migration but each is similarly symptomatic of the erasure of the human connection to place and the accompanying tensions between generations and cultures This book argues that both forms of crisis are

intimately related under scored and driven by the structures of white supremacy which at their most immediate and visible manifest as the discipline of black bodies and at more fundamental and far reaching proportions are about the power privilege and patterns of thinking associated with but no longer exclusive to white people In the face of such crisis it is essential to bring the experience and wisdom of Elders and traditional knowledge keepers together with the contemporary realities and vision of youth This book s inclusive and critical perspective on Indigenous led intergenerational resilience will be valuable to Indigenous and non Indigenous interdisciplinary scholars working on human ecological resilience **Shelley Niro-paperback** Madeline Lennon,2017-09-27 Madeline Lennon s Shelley Niro Seeing Through Memory is the first major book devoted to Niro an internationally acclaimed First Nations artist and filmmaker Published as part of the Canadian Artist Monograph Series CAMS this illustrated study of the work of an important First Nations artist in Canada includes an interview with Niro conducted by the author **One Thousand One Papua New Guinean Nights: Tales from 1972-1985** Thomas H. narrative in its broad sense as the representation in art of an event or story Glocal Narratives of Resilience investigates the contemporary approaches to resilience through the analyses of cultural narratives that engage aesthetically and ideologically in re shaping the notion of resilience going beyond the scales of the personal and the local to consider the entanglement of the regional national and global aspects embedded in the production of crises and the resulting call for resilience After an introductory survey of the state of the art in resilience thinking the book grounds its analyses of a wide range of narratives from the American continent Europe and India in various theoretical strands spanning Psycho social Resilience Socio Ecological Resilience Subaltern Resilience Indigenous survivance and resurgence Neoliberal Resilience and Compromised Resilience thinking among others thus opening the path toward the articulation of a cultural narratology of resilience
