Manhattan Skyscrapers Eric Nash, 1999-08 The city of New York is the city of skyscrapers. Every first-time visitor to Manhattan experiences the awe of gazing up at the soaring stone and steel towers of Wall Street or Midtown and wonders how those structures came to be built. *Manhattan Skyscrapers* answers the question by presenting the 75 most significant tall buildings that make up the city's famous skyline. From Louis Sullivan's Bayard-Condict Building of 1898 on Bleeker Street to the Conde Nast tower currently rising above Times Square, *Manhattan Skyscrapers* lavishly presents over a hundred years of New York's most interesting and important tall buildings. Author Eric P. Nash profiles familiar skyscrapers such as the Woolworth Building, the Empire State Building, the Chrysler Building, the World Trade Towers, the AT&T Building, and also includes quotes from the buildings' architects and the architectural critics of the time. Each skyscraper is illustrated with full-page color photographs by noted photographer Norman McGrath, as well as architectural drawings and plans, archival images of the original interiors, postcards, and other ephemera. *Manhattan Skyscrapers* is essential reading or an ideal gift for anyone interested in the buildings that make New York the ultimate skyscraper city. *Skyscrapers* George H. Douglas, 2004-08-19 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in, lived in, and visited them. Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers, but attention is also given to the steelworkers who built them, the financiers who put up the money, and the daredevils who attempt to conquer them in some inexplicable pursuit of fame. The impact of the skyscraper on popular culture, particularly film and literature, is also explored. Fireproof Magazine, 1907 **Skyscrapers** Matthew Wells, 2005 An investigation of thirty skyscrapers from around the world, both recently built and under construction, that explains the structural principles behind their creation. *eVolo Skyscrapers 3* Carlo Aiello, 2018-07-25 The future of architecture and urban design unveiled by 150 innovative projects submitted to the world-renowned eVolo Skyscraper Competition. The third book in the Skyscraper Competition series showcases visionary designs.

The Black Skyscraper Adrienne Brown, 2017-11-15 How did writers and artists view the intersection of architecture and race in the modernist era Winner of the MSA First Book Prize of the Modernist Studies Association With the development of the first skyscrapers in the 1880s urban built environments could expand vertically as well as horizontally Tall buildings emerged in growing cities to house and manage the large and racially diverse populations of migrants and immigrants flocking to their centers following Reconstruction Beginning with Chicago's early 10 story towers and concluding with the 1931 erection of the 102 story Empire State Building Adrienne Brown's *The Black Skyscraper* provides a detailed account of how scale and proximity shape our understanding of race Over the next half century as city skylines grew American writers imagined the new urban backdrop as an obstacle to racial differentiation Examining works produced by writers painters architects and laborers who grappled with the early skyscraper's outsized and disorienting dimensions Brown explores this architecture's effects on how race was seen read and sensed at the turn of the twentieth century In lesser known works of apocalyptic science fiction light romance and Jazz Age melodrama as well as in more canonical works by W E B Du Bois F Scott Fitzgerald Aaron Douglas and Nella Larsen the skyscraper mediates the process of seeing and being seen as a racialized subject From its distancing apex reducing bodies to specks to the shadowy mega blocks it formed at street level the skyscraper called attention Brown argues to the malleable nature of perception A highly interdisciplinary work *The Black Skyscraper* reclaims the influence of race on modern architectural design as well as the less well understood effects these designs had on the experience and perception of race
