Slash and Burn William John Peters, Leon F. Neuenschwander, 1988 *Sediment Records of Biomass Burning and Global Change* James S. Clark, Helene Cachier, Johann G. Goldammer, Brian J. Stocks, 2013-06-29 Biomass burning profoundly affects atmospheric chemistry the carbon cycle and climate and may have done so for millions of years Bringing together renowned experts from paleoecology fire ecology atmospheric chemistry and organic chemistry the volume elucidates the role of fire during global changes of the past and future Topics covered include the characterization of combustion products that occur in sediments including char soot fly ash and polycyclic aromatic hydrocarbons the calibration of these constituents against atmospheric measurements from wildland and prescribed fire emissions spatial and temporal patterns in combustion emissions at scales of individual burns to the globe

Dynamic and Stochastic Approaches to the Environment and Economic Development Amitrajeet A. Batabyal, 2008 This book is a collection of Amitrajeet A Batabyal s most important papers on the environment and economic development This book s uniqueness stems from the fact that it uses novel modeling tools that are largely unfamiliar to economists to shed valuable light on contemporary problems at the interface of the environment and economic development

Shifting Cultivation in Thailand, Laos and Vietnam: Regional Overview and Policy Recommendations Stephen Bass, Elaine Morrison, 1994 **Tropical Forests and Climate** N. Myers, 2013-06-29 Tropical forests affect climate and the removal of the forests will change climate Or not This book discusses basic questions on how far if at all tropical deforestation leads to climatic change The question of this uncertainty is particularly addressed One important consequence of the uncertainties of whether deforestation affects climate is how scientific findings best illuminate the policy making process

Pearce,2023-05-26 The Causes of Tropical Deforestation 1994 is an analysis of the problem of deforestation using statistical technique a form of environ metrics to discover the true causes of an issue whose basis is hotly debated and attributed to causes as varied as poverty external debt multinational logging companies government corruption the IMF population growth and non sustainable agriculture *Tropical Forests and Their Crops* Nigel J. H. Smith,J. T. Williams,Donald L. Plucknett,Jennifer P. Talbot,2018-05-31 The tropics are the source of many of our familiar fruits vegetables oils and spice as well as such commodities as rubber and wood Moreover other tropical fruits and vegetables are being introduced into our markets to offer variety to our diet Now as tropical forests are increasingly threatened we face a double fold crisis not only the loss of the plants but also rich pools of potentially useful genes Wild populations of crop plants harbor genes that can improve the productivity and disease resistance of cultivated crops many of which are vital to developing economies and to global commerce Eight chapters of this book are devoted to a variety of tropical crops beverages fruit starch oil resins fuelwood fodder spices timber and nuts the history of their domestication their uses today and the known extent of their gene pools both domesticated and wild Drawing on broad research the authors also consider conservation strategies such as parks and reserves corporate holdings gene banks and tissue culture collections and debt for nature swaps They stress the need for a sensitive balance between conservation and the economic well being of local populations If economic growth is part of the conservation effort local populations and governments will be more strongly motivated to save their natural resources Distinctly practical and soundly informative this book provides insight into the overwhelming abundance of tropical forests an unsettling sense of what we may lose if they are destroyed and a deep appreciation for the delicate relationships between tropical forest plants and people around the world *Surveying Marbled Murrelets at Inland Forested Sites* ,1990 Pacific Forest Judith Bennett,2021-10-25 This book addresses the contending views of the uses of Solomon Island forest Ranging from an examination of the interaction between the first settlers and their

forest the book goes on to analyse the attitudes of the British administrators planters and missionaries The colonial government sought to protect the resource but neglected to consider the wishes of the forest s inhabitants in planning for its future economic use The independent governments failed to protect the dwindling forest on customary land in the face of accelerating demands from their own people and of Asian based logging companies while non governmental organisations and aid donors have tried to invoke a more conservative regime of forest use

Circular Economy and Sustainable Value Creation through Eco-Innovation Srikanta Patnaik, Leon Miller, Francesco Vigliarolo, 2025-05-28 Circular economy and sustainable value creation through eco innovation are interconnected concepts that revolve around creating a more sustainable and environmentally friendly approach to economic growth and business development In a world confronted by pressing environmental challenges the need for sustainable economic practices has never been more urgent The traditional linear economic model characterized by the take make dispose approach has led to resource depletion environmental degradation and social inequalities In response to these challenges the concepts of circular economy and eco innovation have emerged as powerful frameworks for reshaping our economic systems to prioritize sustainability The circular economy represents a paradigm shift from the linear economic model that has dominated for centuries Instead of viewing resources as finite and disposable the circular economy embraces the idea that resources can be kept in circulation for as long as possible thereby minimizing waste and environmental impact At the core of the circular economy is the efficient use of resources This entails reducing resource consumption reusing products and materials and recycling to extend the life of resources Products are designed with durability and ease of repair in mind ensuring they have a longer lifespan and can be easily maintained Circular practices aim to restore natural systems and reduce harm to the environment whether through reforestation soil regeneration or sustainable agriculture

From Fires to Oceans: Dynamics of Fire-Derived Organic Matter in Terrestrial and Aquatic Ecosystems Samuel Abiven, Cristina Santín, 2019-05-09 Fire derived organic matter also known as pyrogenic carbon PyC is ubiquitous on Earth It can be found in soils sediments water and air In this wide range of environments fire derived organic matter represents a key component of the organic matter pool and in many cases the largest identifiable group of organic compounds PyC is also one of the most persistent organic matter fractions in the ecosystems and its study is therefore particularly relevant for the global carbon cycle From its production during vegetation fires to its transfer into soils sediments and waters PyC goes through different transformations both abiotic and biotic Contrary to early assumptions PyC is not inert and interacts strongly with the environment evidence of microbial decomposition oxidation patterns and interactions with minerals have been described in different matrices PyC travels across these different environments and it is modified chemically and physically but remains persistent This Research Topic explores important questions in our understanding of fire derived organic matter from the characterization and quantification of PyC components to the transformation and mobilization processes taking place on terrestrial and aquatic ecosystems The studies compiled here

provide novel and often unexpected results They all answer some of the questions posed and more importantly provide scope for many more **General Technical Report PSW.** ,1978 *World Fire* Stephen J. Pyne,2014-07-01 Back in PrintWorld Fire is the story of how fire and humans have coevolved The two are inseparable and together they have repeatedly remade the planet Pyne considers the evolution of fire in such diverse regions as Australia Africa Brazil Sweden Greece Iberia Russia and India and then ponders Antarctica the land without fire As he examines changing techniques for and attitudes toward fire control Pyne challenges our concepts of nature and wilderness and explains why the study and management of fire have tremendous environmental cultural and political implications Booklist A sweeping historical treatise that examines our world's love hate relationship with conflagration His engrossing ideas leave bright embers in the memory Outside

Introduction to Forests and Renewable Resources Chad P. Dawson,John C. Hendee,2019-10-24 The introductory course in natural resources is broader and more diverse than ever Today's students need to know how to manage forest wildlife watershed and range resources in a variety of environments and serving the needs of myriad stakeholders To that end Chad Dawson has built on the foundation established by him and the late John Hendee to bring *Introduction to Forests and Renewable Resources* thoroughly up to date The Ninth Edition has been reorganized to better address content for example policy and the differences between managing federal state and private land that applies to all resources While forests continue to be emphasized more coverage is provided to other resources and to achieving management goals for multiple resources when considering topics like fire and recreation *Deforestation Around the World* Paulo Moutinho,2012-03-30 Deforestation and forest degradation represent a significant fraction of the annual worldwide human induced emission of greenhouse gases to the atmosphere the main source of biodiversity losses and the destruction of millions of people's homes Despite local regional causes its consequences are global This book provides a general view about deforestation dynamics around the world incorporating analyses of its causes impacts and actions to prevent it Its 17 Chapters organized in three sections refer to deforestation impacts on climate soil biodiversity and human population but also describe several initiatives to prevent it A special emphasis is given to different remote sensing and mapping techniques that could be used as a source for decision makers and society to promote forest conservation and control deforestation
