

# WHAT TOO LITTLE SLEEP DOES TO YOUR BODY

## Colds.

A study of 164 healthy people found that those who slept <5 hours per night were more likely to get a cold compared to those who slept 7+ hours, regardless of demographics and weight.

## Tummy troubles.

Not sleeping can make the symptoms of **Inflammatory Bowel Disease** and acid reflux worse and may put you more at risk of developing IBD and **inflammatory bowel syndrome**.

## Difficulty learning.

Sleep deprivation **interferes** with our ability to **remember and process** new information. Researchers recommend **pushing back** early work and school start times to help ensure we get enough sleep.

## Irritability and mood swings.

Researchers found that interruptions and disturbances tend to **bother us more** when we haven't slept.

## Headaches and migraines.

Research links **poor sleep quality** to migraines and sleep apnea to headaches.

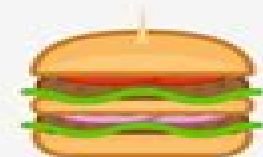

## Depleted sex drive.

Getting enough sleep is important for promoting **healthy sexual desire and genital response**. It also appears to play a role in **how often** we engage in sexual activity with our partners.

## Poor vision.

Sleep deprivation is linked with **tunnel vision, double vision, and dimness**. The longer you're awake, the more **visual errors** you'll see and the more likely you are to **hallucinate**.

## Weight gain.

When we don't get enough shut-eye, researchers found, we also tend to **snack more** and pick **calorie-rich foods** over lighter ones—especially for kids.

*GO AFTER YOUR DREAMS* Dr. Margaret Curlew, 2019-07-07 Did you have big dreams growing up How many of those dreams have you worked on How many have you accomplished 1 2 5 or none And why is that In this inspirational book you will learn To own your brilliance Embrace your failures as they are stepping stones to your success Empower yourself Explore the world Go after your dreams and don't give up Seek and surround yourself with positive energy Handbook of Clinical Behavior Therapy with Adults Alan S. Bellack, Michel Hersen, 2012-12-06 Despite the occasional outcries to the contrary the field of behavior therapy is still growing and the asymptote has not been reached yet The umbrella of behavior therapy continues to enlarge and still is able to encompass new theories new concepts new research new data and new clinical techniques Although the number of new behavioral journals now has stabilized we still see a proliferation of books on the subject In the past few years however we have seen considerable specialization within behavior therapy No longer is it possible to be a generalist and remain fully abreast of all the relevant developments Thus we see behavior therapists who deal with adults those who deal with children those whose specialty is hospital psychiatry and those who see themselves as practitioners of behavioral medicine Even within a subarea such as behavioral medicine specialization runs supreme to the extent that there are experts in the specific addictions adult medical problems and child medical problems Given the extent of specialization there are numerous ways to skin the proverbial cat We therefore have chosen to look at the contemporary work in behavior therapy that is being carried out with adults in part of course because of our long standing interest in this area as teachers researchers and clinicians In so doing we have chosen to highlight the clinical aspects of the endeavor but not at the expense of the rich research heritage for each of the specific adult disorders **The Selected Works of Sir Hall Caine** Sir Hall Caine, Old Deemster Christian of Ballawhaine was a hard man hard on the outside at all events They called him Iron Christian and people said Don't turn that iron hand against you Yet his character was stamped with nobleness as well as strength He was not a man of icy nature but he loved to gather icicles about him There was fire enough underneath at which he warmed his old heart when alone but he liked the air to be congealed about his face He was a man of a closed soul One had to wrench open the dark chamber where he kept his feelings but the man who had done that had uncovered his nakedness and he cut him off for ever That was how it happened with his son the father of Philip He had two sons the elder was an impetuous creature a fiery spirit one of the masterful souls who want the restraint of the curb if they are not to hurry headlong into the abyss Old Deemster Christian had called this boy Thomas Wilson after the serene saint who had once been Bishop of Man He was intended however for the law not for the Church The office of Deemster never has been and never can be hereditary yet the Christians of Ballawhaine had been Deemsters through six generations and old Iron Christian expected that Thomas Wilson Christian would succeed him But there was enough uncertainty about the succession to make merit of more value than precedent in the selection and so the old man had brought up his son to the English bar and afterwards

called him to practise in the Manx one The young fellow had not altogether rewarded his father s endeavours During his residence in England he had acquired certain modern doctrines which were highly obnoxious to the old Deemster New views on property new ideas about woman and marriage new theories concerning religion always re christened superstition the usual barnacles of young vessels fresh from unknown waters but the old man was no shipwright in harbour who has learnt the art of removing them without injury to the hull The Deemster knew these notions when he met with them in the English newspapers There was something awesome in their effect on his stay at home imagination as of vices confusing and difficult to true men that walk steadily but above all very far off over the mountains and across the sea like distant cities of Sodom only waiting for Sodom s doom And yet lo here they were in a twinkling shunted and shot into his own house and his own stackyard

Cognitive Behavioral Protocols for Medical Settings Jennifer Labuda,Bradley Axelrod,James Windell,2018-04-09 This book offers specific evidence based behavioral treatment plans for the most commonly observed symptoms seen in medical and clinical settings It will address the needs of therapists who work in fast paced clinics and are often mandated to provide time limited and effective treatment Intended for early career clinicians as well as experienced psychotherapists clear goal directed protocols are outlined in a specific manner to assist the clinician in treating frequently reported pain complaints somatic illnesses anxiety sleep difficulties panic agitation anger management and more A brief review of symptoms is followed by specific cognitive behavioral treatment strategies quantitative treatment tracking tools and methods to address obstacles and facilitate progress This clinician friendly manual will guide research based interventions and documentation needs while also showing how the intervention can best be used to avoid common pitfalls in treatment

Fisher, MD,Peter W. Kaplan,2004-12-01 Many patients referred for an epilepsy evaluation actually suffer from one of many conditions that can imitate it Imitators of epilepsy are a diverse group that involve consideration of many areas of internal medicine neurology and psychiatry The most important imitators of epileptic seizures are dizziness vertigo syncope complicated migraine and somewhat less frequently sleep disorders transient cerebral ischemia paroxysmal movement disorders endocrine or metabolic dysfunction delirium psychiatric conditions or transient global amnesia Clearly under recognized are hyperventilation episodes panic attacks and other psychogenic and psychiatric paroxysmal disorders that may simulate epileptic seizures This volume provides a comprehensive review of the differential diagnosis of seizures how do the imitators of epilepsy present clinically what are their particular distinguishing historical features and what tests are helpful with diagnosis Expanding beyond the first edition this second edition is divided into four sections The first deals with an introduction and approach diagnosing spells the electroencephalography of epilepsy and its imitators and specialized tests of diagnosis such as measurement of serum

prolactin There are chapters on epileptic seizures that do not look like typical epileptic seizures and conversely apparent epileptic seizures that are not A second section approaches imitators of epileptic seizures along age based lines i e what sorts of spells are likely to beset infants children or the elderly A third section addresses individual imitators of epilepsy ranging from the common to the rare from dizziness and faintness to startle disease arranged according to whether they might simulate partial generalized or both types of epileptic seizures The volume finishes off with hyperventilation syndrome psychogenic seizures with or without epilepsy and panic disorders Most chapters review the basic definitions and physiology of the respective imitator followed by the clinical characteristics Emphasis is given to those features that may differentiate it from an epileptic event but also mark it for what it is and give possible criteria for an alternate diagnosis Case vignettes are used to illustrate particular aspects along with tables that compare and contrast phenotypically similar conditions Based on their extensive clinical experience the authors provide a personal perspective on diagnosis and treatment **Delphi**
