including fossils biology and other scientific disciplines Fossils are the ancient remains of the dinosaurs the most familiar
being their bones Biological science is the study of life in general but many scientists compare the dinosaurs to modern day
animals to support their theories Before a talk about dinosaurs can take place it is important that we discuss the theory of
evolution Evolutionary theory supposes that all the animals we know and see today are the direct descendants of animals that

existed millions of years ago The dinosaurs and other creatures that existed millions of years ago either died out or gradually changed into different animals For instance birds are considered to be surviving dinosaurs because their dinosaur ancestors survived the dinosaur extinction event we will discuss this later
