The Discovery of Cerebellar-vestibular Syndromes and Therapies Harold N. Levinson, 2000 *Raising Happy Healthy Children* Sally Goddard Blythe, 2020-05-10 With new information carefully added this book examines the crucial early years from a child's perspective. It draws on the latest scientific research to show how the first few years determine the way children develop body and mind for the rest of their lives. The keys to this development are parents and in particular mothers. Raising Happy Healthy Children presents convincing research to show how a baby's relationship with its mother has a lasting deep impact. Recent social changes such as delayed motherhood, juggling of work-life balance, limited uptake of breastfeeding and use of parent substitute baby equipment and electronic devices are interfering with key developmental milestones that are essential for wellbeing in later life.

Total Concentration Harold N. Levinson, 1992 The ability to pay total attention to the subject at hand is an ability most of us lack to some extent. In this book he shows how we can learn to overcome distractions and can even learn to make them work for us.

Phobia Free Harold N. Levinson, Steven Carter, 1988 Levinson, a professor of psychiatry at New York University Medical School, claims to have discovered that the inner ear is responsible for phobic behavior. He argues that such behavior consists of sensory misprocessing triggered by concussion, mononucleosis, prolonged air travel, menopause and similar physiologically destabilizing factors. Treatment can be limited to medications for motion sickness. Levinson's style may be overly insistent but he gives his controversial work a clear and convincing format that includes case histories and definitions of symptoms. His advice on obtaining proper diagnosis and treatment is particularly welcome. For subject collections. William Abrams, Portland State Univ Lib, Ore. Library Journal
