Software Engineering Perspectives and Application in Intelligent Systems Radek Silhavy, Roman Senkerik, Zuzana Kominkova Oplatkova, Petr Silhavy, Zdenka Prokopova, 2016-04-26 The volume Software Engineering Perspectives and Application in Intelligent Systems presents new approaches and methods to real world problems and in particular exploratory research that describes novel approaches in the field of Software Engineering Particular emphasis is laid on modern trends in selected fields of interest New algorithms or methods in a variety of fields are also presented The 5th Computer Science On line Conference CSOC 2016 is intended to provide an international forum for discussions on the latest research results in all areas related to Computer Science The addressed topics are the theoretical aspects and applications of Computer Science Artificial Intelligences Cybernetics Automation Control Theory and Software Engineering

Constructing Ambient Intelligence Max Mühlhäuser, Alois Ferscha, Erwin Aitenbichler, 2008-08-17 A foreword for the present workshop proceedings cannot be provided without first looking at the larger context of the AMI conference in which the workshops were organized The AMI 2007 conference has roots in preceding events but in many respects AMI can be called a novel conference format and hence a premiere Among the several aims that inspired and shaped this new conference format the following two are particularly worth considering 1 to provide a forum for the ambient intelligence flavor of research on the Post PC era of computer science complementing the ubiquitous computing and pervasive computing flavors emphasized by already existing conferences 2 to offer an event that attracts contributions from all over the globe yet emphasizes European strengths with particular reference to the Information Society Technologies IST branch of the EU research framework programs FPs which carry the same label as the conference The workshop organization chairs reflected these unique characteristics of the new AMI conference series in the call for workshop proposals using two corresponding measures 1 by particularly soliciting workshops on in depth topics corresponding to the above mentioned ambient intelligence flavor of Post PC research 2 by offering two different workshop threads one usual thread for advanced topics called SW workshops and one thread for workshops related to concrete EU FP6 and FP7 projects called EU workshops

Global Trends in Computing and Communication Systems P. Venkata Krishna, M. Rajasekhara Babu, Ezendu Ariwa, 2012-08-08 This two volume set CCIS 0269 CCIS 0270 constitutes the refereed post conference proceedings of the

International Conference on Global Trends in Computing and Communication ObCom 2011 held in Vellore India in December 2011 The 173 full papers presented together with a keynote paper and invited papers were carefully reviewed and selected from 842 submissions The conference addresses all current issues associated with computing communication and information The proceedings consists of invited papers dealing with the review of performance models of computer and communication systems and contributed papers that feature topics such as networking cloud computing fuzzy logic mobile communication image processing navigation systems biometrics and Web services covering literally all the vital areas of the computing domains

Designing Smart Homes Juan Carlos Augusto, 2006-06-29 The area of smart homes is fast developing as an emergent area which attracts the synergy of several areas of science This volume offers a collection of contributions addressing how artificial intelligence AI one of the core areas of computer science can bring the growing area of smart homes to a higher level of functionality where homes can truly realize the long standing dream of proactively helping their inhabitants in an intelligent way After an introductory section to describe a smart home scenario and to provide some basic terminology the following 9 sections turn special attention to a particular exemplar application scenario provision of healthcare and safety related services to increase the quality of life exploring the application of specific areas of AI to this scenario

Human-Technology Interaction Carsten Röcker, Sebastian Büttner, 2022-12-13 Digitalization and automation are leading to fundamental changes in the industrial landscape In the German speaking countries this development is often summarized under the term Industry 4 0 Simultaneously interaction technologies have made huge developments in the last decades The use of mobile devices and touch screens is ubiquitous augmented and virtual reality technologies have made their way into the market and new interaction concepts have become established While new interaction technologies offer new possibilities for organizing or executing work in the context of Industry 4 0 the transformation of industrial processes also creates a need for new work practices This book sheds light on the interplay of Industry 4 0 and new interaction technologies It presents selected research articles on the topic of Human Technology Interaction in the context of Industry 4 0 Researchers from various disciplines present the current state of research with regard to future interactions with production environments to develop a common vision of how to design future interactions in the industrial domain In this context various topics are covered a detailed overview on assistive systems for supporting manual work is given including technological and design aspects as well as implementation strategies Industrial use cases for extended reality XR technologies such as augmented and virtual reality AR and VR are presented also covering aspects of how to author content in XR environments The role of new work practices is examined for example by presenting concepts of gamification and human machine teamwork for supporting well being Finally topics of trust and technology acceptance are discussed in the context of Industry 4 0 Given this broad perspective a vision is sketched of how to design future human technology interactions in a way that realizes their full technical and human potential

Handbook of Remote Biometrics Massimo Tistarelli, Stan Z. Li, Rama Chellappa, 2009-06-02 The development of technologies for the identification of individuals has driven the interest and curiosity of many people Spearheaded and inspired by the Bertillon coding system for the classification of humans based on physical measurements scientists and engineers have been trying to invent new devices and classification systems to capture the human identity from its body measurements One of the main limitations of the precursors of today's biometrics which is still present in the vast majority of the existing biometric systems has been the need to keep the device in close contact with the subject to capture the biometric measurements This clearly limits the applicability and convenience of biometric systems This book presents an important step in addressing this limitation by describing a number of methodologies to capture meaningful biometric information from a distance Most materials covered in this book have been presented at the International Summer School on Biometrics which is held every year in Alghero Italy and which has become a flagship activity of the IAPR Technical Committee on Biometrics IAPR TC4 The last four chapters of the book are derived from some of the best presentations by the participating students of the school The educational value of this book is also highlighted by the number of proposed exercises and questions which will help the reader to better understand the proposed topics
