Smart Companies Smart Tools Transforming Business Processes Into Business Assets:

Smart Companies, Smart Tools Thomas M. Koulopoulos, 1997 Smart Companies Smart Tools is about the inextricable connections between business process and business assets This concise user friendly guide provides key insights into implementing new processes and strategically using workflow to provide faster delivery of products and services while improving quality minimizing errors and reducing costs Identifying, Measuring, and Valuing Knowledge-Based Intangible Assets: New Perspectives Vallejo-Alonso, Belen, Rodriguez-Castellanos, Arturo, Arregui-Ayastuy, Gerardo, 2010-10-31 The main scope of the book is to highlight the importance of intangible resources in business management evidenced in their measurement and financial valuation and the need for a strategic analysis that enables them to be identified and then assessed Provided by publisher Transforming the Organization Howard W. Oden, 1999-11-30 The rapidly increasing rate of world change demands not just incremental change that organizations have used in the past but fast radical alterations of their strategy culture structure and processes Nothing less than transformation will do says Dr Oden a complex continuing effort that may be closer to revolution than evolution Oden lays it out in his customarily clear programmatic way He covers actions that must precede the initiation of a transformation guidance on how to perform the technical social and behavioral tasks and the actions required to wrap up and integrate everything into a complete workably transformed organization His book provides a clear goal for the transformation an excellent description of transformational leadership and a simple powerful model of the process The result is essential reading for upper management in private and public sector organizations and for their colleagues in the academic community Part I covers the preparatory actions that organizations should take before initiating a transformation without which the effort is doomed to failure says Dr Oden In Part II he covers the technical or engineering aspects of the transformation First he develops a process map of the organization as the basis for process improvement then he diagnoses the existing and future organization to determine how processes should be improved In Part III he looks at the various organizational change methods that are available conducts a broad design of the total organization and then designs the human resource support processes for the transformed organization Finally in Part IV Dr Oden shows how to incorporate the redesigned processes into the existing system the most difficult part of the transformation and ends by showing how better integration can be achieved to provide better overall transformational results
