among the business users of the integration partners on the one hand and among the IT experts of the integration partners on the other. Misunderstandings between any two negotiation partners potentially affect the agreements between all other negotiation partners.

Werner & Ingbar's the Thyroid Sidney C. Werner, Sidney H. Ingbar, Robert D. Utiger, 2000. Brandon Hill suggests this classic text both for an initial purchase and as essential for the minimal core collection. The ninth edition, edited by Braverman, Boston U School of Medicine and Utiger, Harvard Medical School, presents revised and updated material with 81 chapters grouped into nine sections. Among the chapter topics are genomic and nongenomic actions of thyroid hormones, chronic autoimmune thyroiditis, genetic defects causing hypothyroidism, subclinical hypothyroidism, subclinical thyrotoxicosis, and thyroid disease during pregnancy. Several topics merit multiple chapters, including hypothyroidism in infants and children, carcinoma of follicular epithelium, Graves disease, and thyrotropin. Each chapter is signed and concludes with a lengthy bibliography.

Forthcoming Books Rose Arny, 2003. *The Endocrine Society - Annual Meeting, Program and Abstracts*. Endocrine Society, Endocrine Society Meeting, 1990.

*Computer Security - ESORICS 2014*. Miroslaw Kutylowski, Jaideep Vaidya, 2014-08-15. The two-volume set LNCS 8712 and LNCS 8713 constitutes the refereed proceedings of the 19th European Symposium on Research in Computer Security, ESORICS 2014, held in Wroclaw, Poland, in September 2014. The 58 revised full papers presented were carefully reviewed and selected from 234 submissions. The papers address issues such as cryptography, formal methods, and theory of security, security services, intrusion anomaly detection, and malware mitigation; security in hardware systems; security, network security, database, and storage security; software and application security; human and societal aspects of security and privacy.

*Qualitative Reasoning about Physical Systems*. Daniel G. Bobrow, 2012-12-02. This volume brings together current work on qualitative reasoning. Its publication reflects the maturity of qualitative reasoning as a research area and the growing interest in problems of reasoning about physical systems. The papers present knowledge bases for a number of very different domains, including heat flow, transistors, and digital computation. A common theme of all these papers is explaining how physical systems work. An important shared criterion is that the behavioral description must be compositional: that is, the description of a system's behavior must be derivable from the structure of the system. This material should be of interest to anyone concerned with automated reasoning about the real physical world.

*Readings in Qualitative Reasoning About Physical Systems*. Daniel S. Weld, Johan De Kleer, 2013-09-17. *Readings in Qualitative Reasoning about Physical Systems* describes the automated reasoning about the physical world using qualitative representations. This text is divided into nine chapters, each focusing on some aspect of qualitative physics. The first chapter deals with qualitative physics, which is concerned with representing and reasoning about the physical world. The goal of qualitative physics is to capture both the commonsense knowledge of the person on the street and the tacit knowledge underlying the quantitative knowledge used by engineers and scientists. The succeeding chapter discusses the qualitative calculus and its role in constructing an environment that

includes behavior over both mythical time and elapsed time These topics are followed by reviews of the mathematical aspects of qualitative reasoning history based simulation and temporal reasoning as well as the intelligence in scientific computing The final chapters are devoted to automated modeling for qualitative reasoning and causal explanations of behavior These chapters also examine the qualitative kinematics of reasoning about shape and space This book will prove useful to psychologists and psychiatrists
