Somatic Hybridization In Crop Improvement II:

Somatic Hybridization in Crop Improvement II Toshiyuki Nagata, Y.P.S. Bajaj, 2001-07-17 Somatic hybrids through the fusion of plant protoplasts have widened the genetic variability of cultivated plants. As Somatic Hybridization in Crop Improvement I published in 1994, this volume describes how this discipline can contribute to the improvement of crops. It comprises 24 chapters dealing with interspecific and intergeneric somatic hybridization and cybridization. It is divided into four sections: I Cereals Barley, rice and wheat; II Vegetables and Fruits Arabidopsis, Asparagus, Brassica, chicory, Citrus, Cucumis, Diospyros, Ipomoea and various Solanaceous species e.g. tomato, potato and eggplant; III Medicinal and Aromatic Plants Atropa, Dianthus, Nicotiana and Senecio; IV Legumes Pasture Crops Alfalfa. This book is tailored to the needs of advanced students, teachers and researchers in the fields of plant breeding, genetic engineering and plant tissue culture.

Somatic Hybridization in Crop Improvement II Toshiyuki Nagata, Y.P.S. Bajaj, 2012-12-06 This richly illustrated volume describes how somatic hybrids can contribute to the improvement of crops. It comprises 24 chapters dealing with interspecific and intergeneric somatic hybridization and cybridization, providing valuable tools for plant breeders.

Tobacco BY-2 Cells: From Cellular Dynamics to Omics Toshiyuki Nagata, Ken Matsuoka, Dirk Inzé, 2006-09-22 It is our utmost pleasure to present a new book on tobacco BY-2 cells. Tobacco BY-2 Cells: From Cellular Dynamics to Omics is the 58th volume in the book series Biotechnology in Agriculture and Forestry (BAF). It represents an extension of the previous book Tobacco BY-2 Cells vol. 53 of the BAF. Moreover, the content is rather different from the latter and includes new topics gleaned from the First International Symposium on Tobacco BY-2 Cells held at the Plant Science Center of the RIKEN Yokohama, organized by Nagata, Matsuoka and Inzé in September 2004. To this symposium came more than 200 people from different parts of the world to discuss issues. Although most of the contributors to the previous volume of Tobacco BY-2 Cells gave talks on their subjects, there were many other speakers who presented new topics and approaches. So we enjoyed the symposium very much. Thus we decided to compile a new volume on tobacco BY-2 cells which includes these new topics. In addition, towards the end of the symposium, our common understanding was that the tobacco BY-2 cell system is still important in plant biology, in particular for studying the dynamic features of plant cells. We hope this volume is useful for plant biologists. Contents of the book are as follows: Chapters I 1-6 various aspects of the cell cycle and cellular dynamics using BY-2 cells are described. In Chapters II 1-11 *Haploids in Crop Improvement II* Constantine E. Don Palmer, Wilfred A. Keller, Kenneth J. Kasha, 2006-01-27 Doubled haploid technology is an important tool for plant breeding. It allows for significant time reduction in the achievement of homozygous breeding lines of value in crop improvement. This volume provides an excellent overview of haploid induction and the application of doubled haploids. The authors emphasize advances made in the understanding of microspore embryogenesis but treat also advances in gynogenesis and the manipulation of parthenogenetic haploid development. The text contains a thorough discussion of the application of haploidy to the improvement of a number of

species from various families including Brassicaceae Poaceae and Solanaceae The various methods applicable to these species are described in detail Each chapter contains critical evaluation of the scientific literature and an extensive list of references This volume is ideally suited for plant breeders geneticists and plant cell biologists

Somatic Hybridization in Crop Improvement I Y. P. S. Bajaj, 1994-11-04 Fantasies and dreams have their rightful place in science and sometimes they turn into reality Regeneration of hybrid plants through protoplast fusion is one such dream come true In the early 1970s I shared the pioneering excitement in the field of protoplast technology at the Second International Congress of Plant Tissue Culture held in Strasbourg France Subsequently I participated in three international conferences devoted to plant protoplasts in Salamanca Spain 1972 Versailles France 1972 and Nottingham England 1975 At Versailles Dr P S Carlson presented his work on the successful regeneration of somatic hybrids between *Nicotiana glauca* and *Nicotiana langsdorffii* The enthusiasm shown by the participants was sufficient indication of the bright future of somatic hybridization On my return from Versailles I gathered my thoughts and prepared a concept paper on Potentials of Protoplast Culture Work in Agriculture which was published in *Euphytica* Bajaj 1974 The studies on protoplast fusion and somatic hybridization then gained momentum and active work started in many laboratories Very significant work was done by Melchers et al 1978 who obtained a somatic hybrid between potato and tomato calling it Pomato

Somaclonal Variation in Crop Improvement II Y. P. S. Bajaj, 2012-12-06 In continuation of Somaclonal Variation and Crop Improvement I 1990 this volume is comprised of twenty four chapters dealing with somaclonal variants showing resistance to salt drought herbicides viruses *Alternaria* *Fusarium* *Glomerella* *Verticillium* *Phytophthora* fall armyworm etc in a number of plants of economic importance It is divided into two sections Section I Somaclonal Variation in Agricultural Crops wheat rice maize sorghum potato tomato Lotus *Stylosanthes* banana strawberry citrus colt cherry Section II Somaclonal Variation in Medicinal and Aromatic Plants *Atropa* *Carthamus* *Hypericum* *Lavatera* *Nicotiana* *Primula* *Rauwolfia* *Scilla* and *Zinnia* This book will be of great assistance to research workers teachers and advanced students of plant pathology tissue culture pharmacy horticulture and especially plant breeding

Transgenic Crops III Y.P.S. Bajaj, 2013-06-29 There has been tremendous progress in the genetic transformation of agricultural crops and plants resistant to insects herbicides and diseases have been produced field tested and patented Transgenic Crops III compiles this information on ornamental aromatic medicinal and various other crops It comprises 26 chapters and is divided into two sections I Ornamental Aromatic and Medicinal Plants *Anthurium* *Antirrhinum* *Artemisia* *Begonia* *Campanula* carnation chrysanthemum *Dendrobium* *Eustoma* *Gentiana* *Gerbera* *Gladiolus* *Hyoscyamus* *muticus* *Hyssopus officinalis* ornamental *Ipomoea* *Leontopodium alpinum* *Nierembergia* *Phalaenopsis* *Rudbeckia* *Tagetes* and *Torenia* II Miscellaneous Plants *Craterostigma* *plantagineum* *Flaveria bidentis* *Moricandia* *Solanum brevidens* and freshwater wetland monocots The book is of special interest to advanced students teachers and research workers in the fields of plant breeding genetics molecular biology plant tissue culture and plant biotechnology in general

Tobacco BY-2 Cells Toshiyuki

Nagata, Seiichiro Hasezawa, Dirk Inzé, 2013-03-09 The first compilation of a wealth of knowledge on tobacco BY 2 cells often cited as the HeLa cell line of higher plants Basic issues of cell cycle progression cytokinesis cell organization and factors that are involved in these processes are covered in detail Since the tobacco cell line is used as a tool for research in molecular and cellular biology several chapters on such studies are also included Further changes of primary and secondary metabolites during culture and factors that affect these processes are treated Last but not least the so far unpublished historical background of the BY 2 cell line is described This volume is a must for any scientist working in the field of plant biology

Cryopreservation of Plant Germplasm II L.E. Towill, Y.P.S. Bajaj, 2013-03-14 Ex situ preservation of germplasm for higher plant species has been accomplished using either seeds or clones but storage of these under typical conditions does not provide the extreme longevities that are needed to minimize risk of loss Costs of maintenance and regeneration of stocks are also high Systems that provide virtually indefinite storage should supplement existing methods and it is within this context that cryopreservation is presented The use of low temperature preservation was initially more a concern of medicine and animal breeding and was expanded to plants in the 1970s Survival after cryogenic exposure has now been demonstrated for diverse plant groups including algae bryophytes fungi and higher plants If survival is commonplace then the eventual application is a cryopreservation system whereby cells tissues and organs are held indefinitely for use often in the unforeseen future The increasing interest and capabilities for application could not have occurred at a more opportune time since expanding human populations have placed unprecedented pressures on plant diversity This book emphasizes cryopreservation of higher plants and was initially driven by the concern for loss of diversity in crops and the recognized need that this diversity would be essential for continued improvement of the many plants used by society for food health and shelter The interest in cryopreservation has been expanded by conservationists and their concerns for retaining as much as possible the diversity of natural populations The need for cryopreservation thus is well established

Brassica Eng Chong Pua, Carl J. Douglas, 2013-04-17 Recent advances in plant cell and molecular biology have opened new avenues for the improvement of crop plants in the genus *Brassica* oilseeds and vegetables of worldwide economic importance This volume reviews advances in various areas of *Brassica* biotechnology It covers the use of rapid cycle brassicas tissue culture and gene transfer molecular genetics biotic and abiotic stress resistance and molecular farming Contributors are world leading international *Brassica* researchers The volume is an invaluable reference for plant breeders researchers and graduate students in the fields of plant biotechnology agronomy horticulture genetics and cell and molecular biology

Somatic Hybridization In Crop Improvement Ii Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In todays fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Somatic Hybridization In Crop Improvement Ii PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek.
