continues to be increasingly linked to the qualification of personhood which appears to be the only one capable of bridging the gap between human being and citizen right and life and soul and body opened up at the very origins of Western civilization The radical and alarming thesis put forward in this book is that the notion of person is unable to bridge this gap because it is precisely what creates this breach Its primary effect is to create a separation in both the human race and the individual between a rational voluntary part endowed with particular value and another purely biological part that is thrust by the first into the inferior dimension of the animal or the thing In opposition to the performative power of the person whose dual origins can be traced back to ancient Rome and Christianity Esposito pursues his strikingly original and innovative philosophical inquiry by inviting reflection on the category of the impersonal the third person in removing itself from the exclusionary mechanism of the person points toward the ordinary unity of the living being

The Gift Echo Bodine, 2003 Bestselling author and popular workshop leader Bodine presents an accessible guide to understanding and exploring one's own psychic abilities The book begins by dispelling common myths about psychics and defining the four psychic gifts It then discusses the implications of becoming a professional psychic

Béla Bartók and Turn-of-the-Century Budapest Judit Frigyesi, 1998 This text grounds Bartók's art in turn of the century Hungary and its modernist movement It argues that Hungarian modernism and Bartók's aesthetic should be understood in terms of a collective search for wholeness in life and art

The Radius of Us Marie Marquardt, 2017-01-17 What happens when you fall in love with someone everyone seems determined to fear Ninety seconds can change a life not just daily routine but who you are as a person Gretchen Asher knows this because that's how long a stranger held her body to the ground When a car sped toward them and Gretchen's attacker told her to run she recognized a surprising terror in his eyes And now she doesn't even recognize herself Ninety seconds can change a life not just the place you live but the person others think you are Phoenix Flores Flores knows this because months after setting off toward the U S Mexico border in search of safety for his brother he finally walked out of detention But Phoenix didn't just trade a perilous barrio in El Salvador for a leafy suburb in Atlanta He became that person the one his new neighbors crossed the street to avoid Ninety seconds can change a life so how will the ninety seconds of Gretchen and Phoenix's first encounter change theirs Told in alternating first person points of view *The Radius of Us* is a story of love sacrifice and the journey from victim to survivor It offers an intimate glimpse into the causes and devastating impact of Latino gang violence both in the U S and in Central America and explores the risks that victims take when they try to start over Most importantly Marie Marquardt's *The Radius of Us* shows how people struggling to overcome trauma can find healing in love

Strugglebook Robert Thornborough, 2008-08-05 *Strugglebook* A Logical Search for the Truth of GOD explores the probability for the existence of God based primarily on the logic derived from science While it addresses issues applicable to theology it is not a theological work There are literally hundreds of books on this subject most detailing a standard set of arguments This book follows that pattern for the first part but then extends itself

into a series of coalescing arguments built on the latest science all of which results in a unique presentation on the subject Forming a conclusion respecting the reality of God on something as cold as logic is contrary to approaches generally considered acceptable to religious organizations that favor perhaps more ephemeral means based on redemption and faith Those approaches based on other than logic have proven very successful for many individuals That notwithstanding the author is representative of that very large group of people who live in environments replete with corporate missions budget building and spreadsheets strength weakness opportunity and threat exercises performance yields compensation management management by objective measuring outcomes and mini MBA courses The resulting objectivity built through vocation results for many individuals including the author in a need to question the rationale behind faith and God This book is the record of a search for the reality of God consistent with satisfying the needs dictated by the logic often demanded by the modern mind Do world and personal events result in a questioning of your faith Do you wonder about a God that could allow 9 11 or the deaths of tens of thousands in a cyclone Have you watched as someone you love suffers and as a result questioned the very existence of God Have the truths of modern science served to displace your belief in God Does your working life consumed with spreadsheets schedules logical analysis objectives investment returns getting the job done on time and all the other appendages of working life impose an atmosphere that works against belief in God Do you feel unsure about sharing your beliefs with others because you may be ridiculed Have you been exposed to the views of Richard Dawkins through his book The God Delusion or other well known atheists who attempt seemingly with some success to use science to prove God doesn't exist and in so doing relegate your beliefs as unworthy These questions and situations imposed themselves on the author of this book an educator and computer application designer who decided to take a year out of his life and find the answers This book chronicles his search for the truth of God Calling on history and using the very latest scientific knowledge coupled with related philosophy and sometimes delivered somewhat irreverently the book delves into the issues presenting positive and dissenting views respecting the existence of God and then argues the case from the data presented The reader shares the full rationale for decisions made
