Song From The Forest My Life Among The B:

Song from the Forest Louis Sarno, 2015-04-07 As a young man American Louis Sarno heard a song on the radio that gripped his imagination With some funding from musician Brian Eno he followed the mysterious sounds all the way to the Central African rain forest and found their source with the Bayaka Pygmies a tribe of hunters and gatherers Nothing could have prepared him for life among the Pygmies a people legendary for their short stature and musical wealth Sarno never left Considered outwardly lazy by some scrounging and near alcoholic the Pygmies Sarno met had seemingly lost all desire to hunt or make music Only after he had lived with them for some time on a diet of tadpoles was he allowed to join them in the rain forest where they still in relative harmony with nature There Sarno experienced the extraordinary beauty and spiritual sophistication of their culture and the supreme importance of music as the principal means by which they communicate with the rain forest and its magical spirits Over the decades Sarno has recorded more than 1 000 hours of unique Bayaka music He is a fully accepted member of the Bayaka society and married a Bayaka woman Permanently changed by his experience and captivated by a Bayaka culture In *Song from the Forest* Sarno has chronicled his attempt to protect the fragile existence of the Pygmies in an increasingly destructive world Once when his son Samedi became seriously ill and Sarno feared for his life he held his son in his arms through a frightful night and made him a promise If you get through this one day I ll show you the world I come from Now the time has come to fulfill his promise In a new major documentary film Sarno tells the story of the Bayaka as he travels with Samedi from the African rain forest to another jungle one of concrete glass and asphalt New York City Together they meet Louis family and old friends including his closest friend from college Jim Jarmusch Carried by the contrasts between rainforest and urban America and a fascinating soundtrack Louis and Samedi s stories are interwoven to form a touching portrait of an extraordinary man and his son *SONG FROM THE FOREST* is a modern epic film set between rainforest and skyscrapers

Art and Intimacy Ellen Dissanayake, 2015-08-03 To Ellen Dissanayake the arts are biologically evolved propensities of human nature their fundamental features helped early humans adapt to their environment and reproduce themselves successfully over generations In Art and Intimacy she argues for the joint

evolutionary origin of art and intimacy what we commonly call love It all begins with the human trait of birthing immature and helpless infants To ensure that mothers find their demanding babies worth caring for humans evolved to be lovable and to attune themselves to others from the moment of birth The ways in which mother and infant respond to each other are rhythmically patterned vocalizations and exaggerated face and body movements that Dissanayake calls rhythms and sensory modes Rhythms and modes also give rise to the arts Because humans are born predisposed to respond to and use rhythmic modal signals societies everywhere have elaborated them further as music mime dance and display in rituals which instill and reinforce valued cultural beliefs Just as rhythms and modes coordinate and unify the mother infant pair in ceremonies they coordinate and unify members of a group Today we humans live in environments very different from those of our ancestors They used ceremonies the arts to address matters of serious concern such as health prosperity and fecundity that affected their survival Now we tend to dismiss the arts to see them as superfluous only for an elite But if we are biologically predisposed to participate in artlike behavior then we actually need the arts Even or perhaps especially in our fast paced sophisticated modern lives the arts encourage us to show that we care about important things **Nature and Experience**

Bryan Bannon, 2016-05-18 What do we mean when we speak about and advocate for nature Do inanimate beings possess agency and if so what is its structure What role does metaphor play in our understanding of and relation to the environment How does nature contribute to human well being By bringing the concerns and methods of phenomenology to bear on questions such as these this book seeks to redefine how environmental issues are perceived and discussed and demonstrates the relevance of phenomenological inquiry to a broader audience in environmental studies The book examines what phenomenology must be like to address the practical and philosophical issues that emerge within environmental philosophy what practical contributions phenomenology might make to environmental studies and policy making more generally and the nature of our human relationship with the environment and the best way for us to engage with it *Children, Childhood, and the Future* Andrea Kleeberg-Niepage, 2020-01-10

Although most of the world's children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children's lives
