Six Einstein Postcards Albert Einstein, 1993-10-19 6 candid views of the great man teaching lecturing relaxing on the beach 3 more Inexpensive ready to mail postcards will delight students scientists admirers of one of the greatest of all physicists Black and white Uniform Trade List Annual, 1977 Lyric Poetry and Space Exploration from Einstein to the Present Margaret Greaves, 2023 Anchored in the postwar period but drawing on a long history of poetry and science Lyric Poetry and Space Exploration from Einstein to the Present charts surprising connections between poetry and extraterrestrial space *The Road to Einstein's Relativity* David Lyth, 2019-01-31 CHOICE Highly Recommended Title August 2019 Expertly guided by renowned cosmologist Dr David Lyth learn about the pioneering scientists whose work provided the foundation for Einstein's formulation of his theories of relativity and about Einstein's groundbreaking life and work as well This highly readable and accessible panorama of the field delicately balances history and science as it takes the reader on an adventure through the centuries Without complex mathematics or scientific formulae this book will be of interest to all even those without a scientific background who are intrigued to find out more about what paved the way for one of our most famous physicists to push the boundaries of physics to new lengths Features Written by an internationally renowned physicist and cosmologist Describes the life and times of Einstein and his important predecessors Focuses on one of the most famous areas of science Einstein's Relativity Theory *Einstein's Pathway to the Special Theory of Relativity* Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity
