German Tanks in France 1940 Steven J. Zaloga, 2024-04-25 A fully illustrated new assessment of the German tank force that won its greatest victory in France during 1940 The German conquest of France in 1940 was arguably the Wehrmacht's greatest military achievement conquering France in several weeks after having failed to do so in World War I New Panzer tactics dubbed Blitzkrieg were at the heart of the German victory In this book renowned armor expert Steven J Zaloga reassesses the armored force that made the triumph possible and explains that although the German Panzers won their reputation in France they were far from being a technological juggernaut The vast majority were the small PzKpfw I and PzKpfw II light tanks The more effective medium tanks such as the PzKpfw III and PzKpfw IV were available in relatively small numbers Their effectiveness had far more to do with training and doctrine than technology With illustrations including unpublished photos and superb new artwork this book examines the wide range of German tanks employed in France in 1940 as well as their organization and tactical doctrine

ABT760 - TANKS OF THE WEHRMACHT, Light Panzers Thomas Anderson, 2025-04-24 This highly illustrated new study tells the full story of the German light Panzers in World War II The light Panzers that equipped the first Panzer divisions were originally intended as training or stopgap machines suitable only until the arrival of the better armed and armoured PzKpfw III and PzKpfw IV However despite their limitations they ended up playing key roles in the victorious campaigns waged by the German Army from 1939 to 1942 This highly illustrated title describes the development and organizational history of the PzKpfw I introduced in 1934 and the PzKpfw II introduced in

1936 It explains how the annexation of German speaking Sudetenland in 1938 and subsequently of Czechoslovakia itself delivered an unexpected bonus for the Panzerwaffe in the form of two Czech Army light tanks introduced into German service as the PzKpfw 35 t and PzKpfw 38 t It goes on to cover the considerable operational service of these tanks in Poland France and the invasion of the Soviet Union in 1941 From late 1941 onwards they were withdrawn from front line service but the chassis were used until the end of the war for self propelled artillery and tank destroyers German armour expert Thomas Anderson draws on archival material after action reports and rare photographs in this comprehensive study of the German light Panzers that played a key role in the early years of World War II **Tank Gun Systems** William Andrews,2023-06-30

Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system *Tanks of Hitler's Eastern Allies 1941-45*

Steven J. Zaloga,2013-04-20 The titanic armor battles of the Russian Front are widely known but the role of Germany's eastern allies is less so Romania and Hungary manufactured their own tanks as well as purchasing tanks from Germany older obsolete types such as the PzKpfw 35 t all the way up to the latest and best German vehicles including the Tiger I and Hetzer These tanks played a frequent role in the battles in southern Russia and Ukraine and were especially prominent in the disaster at Stalingrad where the Red Army specifically chose the weaker Romanian and Hungarian salients for their critical envelopment operation Ideal for modellers and armor enthusiasts this is a broad survey of the various and colorful tanks used in these battles As well as the largest of these Axis tank forces the book features coverage of the many smaller and lesser known forces including the Italian contingent in Russia the Finnish armored force and the small but interesting armored forces of the Russian Vlasov RONA Croatian Bulgarian and Slovakian armies **German Tanks in Barbarossa**

1941 Steven J. Zaloga,2025-06-19 A detailed illustrated study of Germany's Panzer forces that invaded the Soviet Union explaining how and why they performed as they did Operation Barbarossa Nazi Germany's huge and fateful invasion of the Soviet Union was the culmination of nearly two years of European conquests By the time of Barbarossa Germany's Panzer

forces had honed their Blitzkrieg methods of fast moving warfare but fighting across the wide expanses of eastern Europe would present them with their greatest challenge yet While the Germans overran the Red Army at the start of the campaign Barbarossa would end in failure Written by one of the world s experts on armoured warfare and presenting newly uncovered data on the forces involved this book explains the doctrine organization and technical capabilities of the Panzer forces with a short overview on the armour of other Axis forces including Hungary Romania Slovakia Finland and Italy The speed and shock value of the Panzer divisions was essential for the Wehrmacht to prevail over the Red Army in a brief campaign of annihilation Packed with archive photos and superb original tank illustrations this book explains how problems with the Panzers were a significant reason for the eventual failure of Barbarossa *Bulgarian armoured units* Paolo

Crippa,2023-07-06 Having been defeated in the First World War Bulgaria as a result of the implementation of peace treaty clauses could not purchase tanks until the early 1930s Due to the lack of industrialisation it was forced to turn to the countries that were the main producers of armoured vehicles at that time Thus the CV33 fast tanks were purchased from Italy the Vickers Mk E from England and the LT vz 35 After the first units were established thanks to Germany into whose sphere of influence Bulgaria had entered French wartime French tanks the Renault R35 and new Czechoslovak tanks were purchased In 1943 with the establishment of the Bronirana Brigada Panzer IVs and StuG IIIs arrived In 1944 after the coup d tat Bulgaria changed allegiance and joined the Red Army in the liberation of Yugoslavia and Hungary fighting the Germans with its armoured units until the end of the conflict in May 1945

Panzer 38(t) Steven J. Zaloga,2014-10-20 This title offers a detailed study of a successful but little known German tank of World War II the Panzer 38 t Germany s annexation of Czech provinces in 1938 gave it control of the large Czech armament industry one of the jewels of which was the very modern LT 38 tank The type was fully integrated into the Wehrmacht as the Panzer 38 t becoming one of the few foreign designs to continue in production for the Wehrmacht It was an important element in the 1940 battle of France and its most famous use was in the hands of Rommel s 7 Panzer Division The Panzer 38 t became one of the key weapons in the German invasion of Russia in the summer of 1941 and was widely used in the Eastern Front campaigns of 1941 42 This illustrated study gives a uniquely detailed account of the technical history and combat record of one of the most successful early World War II tanks

The Forgotten Axis J. Lee Ready,2012-09-26 The mention of World War II German soldiers conjures images of strong Aryan young men born in Germany and raised under the Third Reich However throughout the war more than 3 million foreigners served in Nazi Germany s armed services comprising 18 percent of the entire German force These non German soldiers included 1 5 million Austrians 350 000 Sudetenlanders and approximately 200 000 Poles as well as Czechs Slovaks Norwegians Danes Belgians Romanians Finns Bulgarians and other nationalities Whether converts conscripts or reluctant volunteers these foreigners served throughout the armed forces and participated in all major operations This volume offers the first in depth exploration of the motives and experiences of these non German German soldiers providing a
