various levels and of course for all operational flying Obtaining all these different formulas from various sources is time consuming as this author has discovered over the years They are not readily available in one book This is the reason for writing Formulas for the Air Navigation Computer it is a unique collection of air navigation computer formulas The formulas are written as they appear when set up on the E6 B Air Navigation Computer A full description on how to solve each formula is included along with a worked example and also the methods for using the wind slide to calculate wind triangle and other navigational problems associated with the wind slide The book is easy to follow by the novice pilot and a convenient reference source for the more experienced pilot The book is complete with all the formulas a pilot of any level should need to know It is laid out in a simple way with over 122 formulas and methods covering Time Speed Distance Air Speed Altitude Navigation VNAV One in Sixty Rule Wind triangle Calculations Wind Finding methods Fuel Calculations Pressure Pattern Navigation and more *Air University Periodical Index* ,1958 *Air University Library Index to Military Periodicals* ,1958
