Spaces of Teaching and Learning Robert A. Ellis,Peter Goodyear,2018-02-19 This integrated collection of perspectives on the spaces of teaching and learning uses learning space to place educational practice in context It considers the complex relationships involved in the design management and use of contemporary learning spaces It sheds light on some of the problems of connecting the characteristics of spaces to the practices and outcomes of teaching and learning The contributions show how research into learning spaces can inform broader educational practices and how the practices of teaching learning and design can inform research The selection of chapters demonstrates the value of gathering together multiple sources of evidence viewed through different epistemological lenses in order to push the field forward in a timely fashion The book provides both a broad review of current practices as well as a deep dive into particular educational and epistemological challenges that the various approaches adopted entail Contrasts and commonalities between the different approaches emphasise the importance of developing a broad robust evidence base for practice in context This is the inaugural book in the series *Understanding Teaching Learning Practice* *Data Book of Social Studies Materials and Resources* ,1980 **Place-Based Science Teaching and Learning** Cory A.
